

Contents

Lignocellulosic Materials of Brazil—Their Characterization and Applications in Polymer Composites and Art Works	1
Kestur G. Satyanarayana, Thais H. S. Flores-Sahagun and Pamela Bowman	
Retting Process as a Pretreatment of Natural Fibers for the Development of Polymer Composites	97
L. Sisti, G. Totaro, M. Vannini and A. Celli	
Pretreatments of Natural Fibers for Polymer Composite Materials	137
A. Orue, A. Eceiza and A. Arbelaiz	
Mechanical and Thermal Properties of Less Common Natural Fibres and Their Composites	177
Fabrizio Sarasini	
Lignocellulosic Fibres Reinforced Thermoset Composites: Preparation, Characterization, Mechanical and Rheological Properties	215
Hind Abdellaoui, Rachid Bouhfid and Abou El Kacem Qaiss	
Pineapple Leaf Fiber: From Waste to High-Performance Green Reinforcement for Plastics and Rubbers	271
Nanthaya Kengkhetkit, Thapanee Wongpreedee and Taweechai Amornsakchai	
Lightweight Wood Composites: Challenges, Production and Performance	293
Sandra Monteiro, Jorge Martins, Fernão D. Magalhães and Luísa Carvalho	
Design and Fabrication of Kenaf Fibre Reinforced Polymer Composites for Portable Laptop Table	323
S. M. Sapuan, K. R. Purushothman, M. L. Sanyang and M. R. Mansor	

Lignocellulosic Materials for Geotextile and Geocomposites for Engineering Applications	357
Jaideep Adhikari, Suwendu Manna, Sukanya Chowdhury Saha, Prosenjit Saha, Debasis Roy and Basudam Adhikary	
Lignocellulosic Fibres-Based Biocomposites Materials for Food Packaging	389
H. Angellier-Coussy, V. Guillard, E. Gastaldi, S. Peyron and N. Gontard	
Lignocellulosic Fibres Reinforced Polymer Composites for Acoustical Applications	415
Elammaran Jayamani and Muhammad Khusairy Bin Bakri	

Lignocellulosic Composite Materials

Kalia, S. (Ed.)

2018, XII, 444 p. 195 illus., 113 illus. in color.,

Hardcover
