<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	A Short Historical Review	1
1.2	Modern Solid State Imaging	3
1.3	Motivation	5
1.4	Main Contributions	7
1.5	Thesis Outline	9
	References	10
<b>2</b>	<b>Low-Noise CMOS Image Sensors</b>	<b>13</b>
2.1	Pinned Photodiodes	13
2.1.1	Brief Historical Review	13
2.1.2	Device Physics	15
2.1.3	Device Operation	20
2.2	CIS Global Architecture	22
2.3	Pixel Architectures	23
2.3.1	Source Follower Based Pixel	24
2.3.2	Common Source Based Pixel	25
2.4	Column-Level Amplification	26
2.5	Correlated Sampling and Analog-to-Digital Conversion	28
2.5.1	Correlated Double Sampling	28
2.5.2	Correlated Multiple Sampling	29
2.6	Summary	32
	References	33
<b>3</b>	<b>Noise Sources and Mechanisms in CIS</b>	<b>35</b>
3.1	Photon Shot Noise	35
3.2	Dark Current	36
3.2.1	Depleted Area Generation	38
3.2.2	Field-Free Area Generation	39
3.2.3	Dark Current Shot Noise	40

3.3	Transfer Noise . . . . .	40
3.3.1	Charge Transfer Non-idealities . . . . .	40
3.4	Electronic Noise . . . . .	42
3.4.1	Thermal Noise . . . . .	44
3.4.2	1/f and RTS Noise . . . . .	47
3.4.3	Leakage Current Shot Noise . . . . .	51
3.5	Fixed Pattern Noise . . . . .	54
3.5.1	Spatial Gain Variation . . . . .	55
3.5.2	Offset Variations . . . . .	56
3.6	Discussion . . . . .	57
	References . . . . .	59
<b>4</b>	<b>Detailed Noise Analysis in Low-Noise CMOS Image Sensors . . . . .</b>	<b>61</b>
4.1	Preamble . . . . .	61
4.2	Noise Calculation Method . . . . .	63
4.3	Impact of CMS on Noise . . . . .	65
4.4	In-Pixel Source Follower Based Readout Chain . . . . .	67
4.4.1	The Conversion Gain . . . . .	67
4.4.2	Thermal Noise . . . . .	69
4.4.3	1/f Noise . . . . .	73
4.4.4	Leakage Current Shot Noise . . . . .	74
4.5	In-Pixel Common Source Based Readout Chain . . . . .	76
4.5.1	Conversion Gain . . . . .	76
4.5.2	Thermal Noise . . . . .	78
4.5.3	1/f Noise . . . . .	79
4.5.4	Leakage Current Shot Noise . . . . .	80
4.6	Discussion . . . . .	80
	References . . . . .	82
<b>5</b>	<b>Noise Reduction in CIS Readout Chains . . . . .</b>	<b>85</b>
5.1	Thermal Noise Reduction . . . . .	85
5.1.1	Column-Level Circuits Optimization . . . . .	86
5.1.2	Pixel-Level Optimization . . . . .	88
5.2	Flicker Noise Reduction . . . . .	88
5.2.1	Correlated Sampling . . . . .	89
5.2.2	Pixel-Level Optimization . . . . .	90
5.3	Thin Oxide Source Follower: A Good Match . . . . .	95
5.4	Summary . . . . .	98
	References . . . . .	98
<b>6</b>	<b>Design of a Sub-electron Readout Noise Pixel in a Standard CIS Process . . . . .</b>	<b>101</b>
6.1	The Optimized Pixel Design . . . . .	101
6.2	Test Chip Architecture . . . . .	102
6.3	Test Description and Measurement Results . . . . .	104

6.3.1	Test Setup . . . . .	104
6.3.2	Conversion Gain Measurement . . . . .	106
6.3.3	Input-Referred Read Noise . . . . .	107
6.3.4	Pixel Voltage Swing . . . . .	108
6.4	Conclusion . . . . .	110
	Reference . . . . .	110
<b>7</b>	<b>Characterization of a Sub-electron Readout Noise VGA</b>	
	<b>Imager in a Standard CIS Process . . . . .</b>	<b>111</b>
7.1	Chip Architecture and Circuit Design . . . . .	111
7.1.1	Imager Architecture . . . . .	111
7.1.2	Pixel Design and Layout . . . . .	112
7.1.3	Column-Level Amplifier . . . . .	113
7.1.4	Column-Level SSADC . . . . .	115
7.1.5	Physical Implementation . . . . .	117
7.2	Test and Characterization . . . . .	118
7.2.1	Experimental Setup . . . . .	118
7.2.2	Conversion Gain Measurement . . . . .	119
7.2.3	Temporal Read Noise . . . . .	120
7.2.4	Photo-Response Non-uniformity . . . . .	121
7.2.5	Dark Current . . . . .	121
7.2.6	Imager Lag . . . . .	122
7.2.7	Quantum Efficiency . . . . .	123
7.2.8	Imaging Demonstration . . . . .	123
7.3	Discussion and Comparison to State-of-the-Art . . . . .	125
7.4	Conclusion . . . . .	127
	References . . . . .	127
