Contents

1 Introduction 1
1.1 Artificial Intelligence and Neural Networks 4
1.2 Learning with a Critic 5
1.3 Scope of Study 6
References 9

2 Object of Research 11
2.1 Two-Wheeled Mobile Robot 11
2.1.1 Description of the Kinematics of a Mobile Robot 12
2.1.2 Description of the Dynamics of a Mobile Robot 21
2.2 Robotic Manipulator 31
2.2.1 Description of the Kinematics of a Robotic Manipulator 32
2.2.2 Description of the Dynamics of a Robotic Manipulator 41
References 49

3 Intelligent Control of Mechatronic Systems 51
3.1 Methods for Control of Nonlinear Systems 51
3.2 Neural Control 54
3.2.1 Random Vector Functional Link Neural Network 56
3.2.2 Neural Network with Gaussian-Type Activation Functions 57
References 58

4 Optimal Control Methods for Mechatronic Systems 61
4.1 Bellman's Dynamic Programming 61
4.2 Linear-Quadratic Regulator 65
4.3 Pontryagin's Maximum Principle 71
4.4 Summary 80
References 83

5 Learning Methods for Intelligent Systems 85
5.1 Supervised Learning 85
5.1.1 Steepest Descent Algorithm 86
5.1.2 Variable Metric Algorithm 87
5.1.3 Levenberg–Marquardt Algorithm 88
5.1.4 Conjugate Gradient Method 89
5.2 Learning with a Critic 90
5.2.1 Q-Learning Algorithm 92
5.3 Learning Without a Teacher 93
5.3.1 Winner-Take-All Networks 93
5.3.2 Winner-Take-Most Networks 94
References 95

6 Adaptive Dynamic Programming - Discrete Version 97
6.1 Neural Dynamic Programming 97
6.2 Model-Based Learning Methods 101
6.2.1 Heuristic Dynamic Programming 102
6.2.2 Dual-Heuristic Dynamic Programming 106
6.2.3 Global Dual-Heuristic Dynamic Programming 117
6.3 Model-Free Learning Methods 120
6.3.1 Action-Dependent Heuristic Dynamic Programming 120
References 123

7 Control of Mechatronic Systems 127
7.1 Tracking Control of a WMR and a RM with a PD Controller 129
7.1.1 Synthesis of PD-Type Control 130
7.1.2 Simulation Tests 130
7.1.3 Conclusions 140
7.2 Adaptive Tracking Control of a WMR 140
7.2.1 Synthesis of an Adaptive Control Algorithm 141
7.2.2 Simulation Tests 144
7.2.3 Conclusions 148
7.3 Neural Tracking Control of a WMR 148
7.3.1 Synthesis of a Neural Control Algorithm 148
7.3.2 Simulation Tests 152
7.3.3 Conclusions 156
7.4 Heuristic Dynamic Programming in Tracking Control of a WMR 156
7.4.1 Synthesis of HDP-Type Control 157
7.4.2 Simulation Tests 163
7.4.3 Conclusions 174
7.5 Dual-Heuristic Dynamic Programming in Tracking Control of a WMR and a RM 175

7.5.1 Synthesis of DHP-Type Control 175
7.5.2 Simulation Tests 182
7.5.3 Conclusions 195
7.6 Globalised Dual-Heuristic Dynamic Programming in Tracking Control of a WMR and a RM 195
7.6.1 Synthesis of GDHP-Type Control 196
7.6.2 Simulation Tests 202
7.6.3 Conclusions 214
7.7 Action Dependent Heuristic Dynamic Programming in Tracking Control of a WMR 214
7.7.1 Synthesis of ADHDP-type Control 215
7.7.2 Simulation Tests 218
7.7.3 Conclusions 223
7.8 Behavioural Control of WMR's Motion 224
7.8.1 Behavioural Control Synthesis 228
7.8.2 Simulation Tests 234
7.8.3 Conclusions 241
7.9 Summary 242
7.9.1 Selection of Value of the Future Reward Discount Factor γ 248
References 249

8 Reinforcement Learning in the Control of Nonlinear Continuous Systems 255
8.1 Classical Reinforcement Learning 256
8.1.1 Control Synthesis, Stability of a System, Reinforcement Learning Algorithm 256
8.1.2 Simulation Tests 261
8.1.3 Conclusions 266
8.2 Approximation of Classical Reinforcement Learning 266
8.2.1 Control System Synthesis, Stability of the System, Reinforcement Learning Algorithm 267
8.2.2 Simulation Tests 269
8.2.3 Conclusions 270
8.3 Reinforcement Learning in the Actor-Critic Structure 271
8.3.1 Synthesis of Control System, System Stability, Reinforcement Learning Algorithm 272
8.3.2 Simulation Tests 277
8.3.3 Conclusions 280
8.4 Reinforcement Learning of Actor-Critic Type in the Optimal Adaptive Control 280
8.4.1 Control Synthesis, Stability of a System, Reinforcement Learning Algorithm 280
8.4.2 Simulation Tests 284

8.4.3 Conclusions . . . 286
8.5 Implementation of Critic's Adaptive Structure in Optimal Control . . . 287
8.5.1 Control Synthesis, Critic's Learning Algorithm, Stability of a System . . . 287
8.5.2 Simulation Tests . . . 292
8.5.3 Conclusions . . . 295
References . . . 296

9 Two-Person Zero-Sum Differential Games and H∞ Control . . . 299
9.1 H∞ control . . . 299
9.2 A Two-Person Zero-Sum Differential Game . . . 301
9.3 Application of a Two-Person Zero-Sum Differential Game in Control of the Drive Unit of a WMR . . . 302
9.3.1 Simulation Tests . . . 303
9.3.2 Conclusions . . . 308
9.4 Application of a Neural Network in the Two-Person Zero-Sum Differential Game in WMR Control . . . 308
9.4.1 Simulation Tests . . . 312
9.4.2 Conclusions . . . 315
References . . . 316

10 Experimental Verification of Control Algorithms . . . 317
10.1 Description of Laboratory Stands . . . 317
10.1.1 WMR Motion Control Stand . . . 317
10.1.2 RM Motion Control Stand . . . 319
10.2 Analysis of the PD Control . . . 321
10.2.1 Analysis of the WMR Motion Control . . . 321
10.2.2 Analysis of the RM Motion Control . . . 326
10.2.3 Conclusions . . . 328
10.3 Analysis of the Adaptive Control . . . 329
10.3.1 Analysis of the WMR Motion Control . . . 329
10.3.2 Conclusions . . . 333
10.4 Analysis of the Neural Control . . . 333
10.4.1 Analysis of the WMR Motion Control . . . 333
10.4.2 Conclusions . . . 337
10.5 Analysis of the HDP Control . . . 337
10.5.1 Analysis of the WMR Motion Control . . . 337
10.5.2 Conclusions . . . 346
10.6 Analysis of the DHP Control . . . 347
10.6.1 Analysis of the WMR Motion Control . . . 347
10.6.2 Analysis of the RM Motion Control . . . 352
10.6.3 Conclusions . . . 357
10.7 Analysis of the GDHP Control . . . 357

10.7.1 Analysis of the WMR Motion Control 358
10.7.2 Conclusions 362
10.8 Analysis of the ADHDP Control 362
10.8.1 Analysis of the WMR Motion Control 362
10.8.2 Conclusions 366
10.9 Analysis of Behavioral Control 366
10.9.1 Analysis of the WMR Motion Control 368
10.9.2 Conclusions 372
10.10 Summary 373
References 379
