<b>1</b>	<b>Electron Tomography: A Primer</b> . . . . .	<b>1</b>
	Andrew Leis	
1.1	An Introduction to Electron Tomography . . . . .	1
1.2	Principles of Electron Tomography . . . . .	4
1.3	Sample Preparation for Electron Tomography . . . . .	6
1.3.1	Scenario 1: Plastic sections . . . . .	7
1.3.2	Scenario 2: Frozen-hydrated specimens . . . . .	8
1.4	Radiation Damage . . . . .	9
1.5	Acquisition of Projections . . . . .	9
1.6	Special Acquisition Case: Block-Face SEM . . . . .	12
1.7	Alignment of Projections . . . . .	13
1.8	Reconstruction of an Aligned Tilt Series . . . . .	15
1.9	Resolution . . . . .	17
1.10	Post-reconstruction Image Processing . . . . .	18
1.10.1	Segmentation and denoising . . . . .	19
1.10.2	Template matching . . . . .	20
1.10.3	Subtomogram averaging . . . . .	21
1.11	Recommendations and Future Perspectives . . . . .	22
1.12	The Importance of Sample Geometry . . . . .	23
1.13	Conclusion . . . . .	25
1.14	Protocol . . . . .	26
	References . . . . .	27
<b>2</b>	<b>STEM Tomography in Biology</b> . . . . .	<b>33</b>
	Sharon Grayer Wolf, Eyal Shimoni, Michael Elbaum and Lothar Houben	
2.1	Introduction . . . . .	33
2.2	Basics of STEM Imaging of Biological Material . . . . .	35
2.2.1	Electron-Sample Interactions . . . . .	35
2.2.2	STEM Contrast of Biological Samples . . . . .	38

2.2.3	Resolution and Thick Sample Effects . . . . .	39
2.2.4	Elemental Analysis . . . . .	42
2.3	STEM Tomography . . . . .	43
2.3.1	Historical Background . . . . .	43
2.3.2	STEM Tomography of Thick Plastic-Embedded Sections . . . . .	45
2.3.3	Cryo-STEM Tomography for Vitrified, Unstained Cells . . . . .	46
2.3.4	CSTET and Elemental Analysis of Bacteria . . . . .	47
2.3.5	CSTET and Elemental Analysis of Eukaryotic Cells . . . . .	48
2.4	Conclusions and Future Prospects. . . . .	50
2.5	STEM Tomography Experimental Setup at the Weizmann Institute. . . . .	53
2.5.1	CSTET data collection protocol. . . . .	53
2.5.2	Plastic section data collection . . . . .	54
	References. . . . .	55
<b>3</b>	<b>Electron Cryo-Tomography . . . . .</b>	<b>61</b>
	Josie L. Ferreira, Teige R. S. Matthews-Palmer and Morgan Beeby	
3.1	Introduction . . . . .	61
3.2	ECT: Overview and Key Concepts. . . . .	64
3.3	Specimen Preparation for ECT . . . . .	65
3.3.1	Vitrifying Thin Specimens: Plunge-Freezing . . . . .	66
3.3.2	Vitrifying Thick Specimens: Strategies Towards Tractability . . . . .	67
3.4	Tilt Series Acquisition . . . . .	68
3.4.1	Hardware Configuration. . . . .	68
3.4.2	Data Acquisition Software. . . . .	71
3.4.3	Data Collection: Electron Dose Considerations . . . . .	73
3.4.4	Data Collection: Choosing Microscope Defocus . . . . .	74
3.4.5	Data Collection: Magnification . . . . .	74
3.4.6	Data Collection: Tilt Scheme Considerations. . . . .	74
3.4.7	Data Collection: Energy Filters and Phase Plates . . . . .	77
3.5	Tomogram Reconstruction: From Tilt Series Data to Biological Insights . . . . .	77
3.5.1	Alignment . . . . .	77
3.5.2	Reconstruction. . . . .	78
3.5.3	Post-processing to Maximize Signal in Tomograms . . . . .	79
3.5.4	Visualization and Interpretation of Denoised Tomograms . . . . .	80
3.6	Examples of ECT . . . . .	81
3.6.1	Bacterial Cell Shape Maintenance . . . . .	81
3.6.2	The Eukaryotic Nuclear Pore Complex . . . . .	84

3.7	Future Challenges: What Do We Need from ECT for Better Mechanistic Insights into Biology? . . . . .	85
3.8	Concluding Remarks. . . . .	87
3.9	Practical Guide . . . . .	87
	Bibliography . . . . .	88
<b>4</b>	<b>Large-Scale Electron Tomography of Cells Using SerialEM and IMOD . . . . .</b>	<b>95</b>
	Eileen O'Toole, Peter van der Heide, J. Richard McIntosh and David Mastronarde	
4.1	Introduction . . . . .	96
4.2	Specimen Preparation for Large-Scale Tomography . . . . .	99
4.3	Using SerialEM for Automated Single Frame or Montaged Serial Tilt Series Acquisition . . . . .	99
4.4	Using IMOD's Etomo Interface to Compute Basic Single Frame or Montage Tilt Series . . . . .	102
4.5	The Etomo Batch Tomogram Interface . . . . .	103
4.6	Using IMOD's Join Interface to Stack Serial Reconstructions. . . . .	104
4.7	Using IMOD's 3dmod for Modeling Features in Serial Reconstructions. . . . .	106
4.8	Special Topics: Increasing Area for 'Supermontage' Reconstructions. . . . .	108
4.8.1	Using SerialEM to Acquire Supermontage Tilt Series . . . . .	108
4.8.2	Using IMOD's Etomo Interface to Compute Individual Montage Panels . . . . .	110
4.8.3	Using IMOD to Stitch Supermontages Laterally . . . . .	110
4.8.4	Setupstitch. . . . .	110
4.8.5	Edgepatches. . . . .	111
4.8.6	Fitpatches . . . . .	112
4.8.7	Stitchalign . . . . .	112
4.8.8	Tomostitch. . . . .	112
4.9	Conclusions and Future Directions . . . . .	113
	References. . . . .	114
<b>5</b>	<b>Volume Scanning Electron Microscopy: Serial Block-Face Scanning Electron Microscopy Focussed Ion Beam Scanning Electron Microscopy . . . . .</b>	<b>117</b>
	Richard I. Webb and Nicole L. Schieber	
5.1	Introduction . . . . .	117
5.2	Volume Scanning Electron Microscopy—SBEM and FIB-SEM . . . . .	118

5.2.1	Sample Processing . . . . .	122
5.2.2	Imaging . . . . .	124
5.3	Serial Block-Face Scanning Electron Microscopy (SBF-SEM or SBEM). . . . .	126
5.3.1	Sample Processing . . . . .	126
5.3.2	Sample Setup and Mounting . . . . .	129
5.3.3	SBEM Operation . . . . .	130
5.4	Focused Ion Beam Scanning Electron Microscopy . . . . .	134
5.4.1	Sample Processing . . . . .	135
5.4.2	Sample Setup and Mounting . . . . .	137
5.4.3	FIB-SEM Operation . . . . .	139
5.5	Discussion . . . . .	141
	References. . . . .	143
<b>6</b>	<b>Conjugate Immunofluorescence—SEM Array Tomography for Studying Mammalian Synapses and Axons . . . . .</b>	<b>149</b>
	Kristina D. Micheva and Kristen D. Phend	
6.1	Introduction/Background. . . . .	149
6.2	Approaches to Large-Scale Molecular and Ultrastructural Imaging . . . . .	150
6.3	Array Tomography: A Different Kind of Tomography . . . . .	153
6.4	Array Tomography Sample Preparation: Workflow and General Considerations. . . . .	155
6.5	Array Tomography: Computer Assisted Imaging of Serial Sections on Rigid Substrates. . . . .	159
6.6	Application of Conjugate IF-SEM Array Tomography for the Study of Mammalian Synapses and Axons . . . . .	161
6.7	Variations of the Method . . . . .	164
6.8	Detailed Protocol for Conjugate IF-EM AT Using Freeze Substitution and Embedding in Lowicryl HM-20 . . . . .	166
6.9	Conclusions . . . . .	179
	References. . . . .	179
<b>7</b>	<b>Alignment of Tilt Series . . . . .</b>	<b>183</b>
	A. Verguet, C. Messaoudi, C. O. S. Sorzano and S. Marco	
7.1	Why Do We Need to Align Tilt Series?. . . . .	183
7.2	Standard Alignment Process . . . . .	185
7.2.1	Precentering the Tilt Series . . . . .	186
7.2.2	Determining the Orientation of the Tilt Axis. . . . .	190
7.3	Advanced Alignment Methods . . . . .	194
7.3.1	Multiscale Registration . . . . .	194
7.3.2	Invariant Feature Recognition . . . . .	197
7.4	Extension to Data Other than Tilt Series . . . . .	203
7.4.1	Data Alignment in Multiple-Axis Tomography . . . . .	203

7.4.2	Serial Images Alignment . . . . .	204
7.5	Conclusion . . . . .	205
