

# Contents

<b>1</b>	<b>Micro- and Nanotechnologies to Probe Brain Mechanobiology . . . .</b>	<b>1</b>
1.1	Introduction . . . . .	1
1.2	Tools to Explore the Effects of Biomechanical Forces on the Brain . . . . .	5
1.2.1	Conventional Tools . . . . .	5
1.2.2	Microtechnology Tools . . . . .	8
1.2.3	Nanotechnology Tools . . . . .	9
1.3	Effects of Biomechanical Forces on Cellular Functions . . . . .	10
1.3.1	Regulation of Gene Expression and Calcium Influx . . . . .	10
1.3.2	Regulation of Synapses and Neurotransmitter Release. . . . .	15
1.3.3	Regulation of Neurite Growth . . . . .	17
1.3.4	Regulation of Circuitry and Plasticity . . . . .	19
1.3.5	Regulation of Brain Folding . . . . .	20
1.3.6	Traumatic Brain Injuries . . . . .	21
1.4	Conclusions . . . . .	23
	References. . . . .	23
<b>2</b>	<b>Acute Neural Stimulation. . . . .</b>	<b>31</b>
2.1	Introduction . . . . .	31
2.2	Results and Discussions. . . . .	33
2.2.1	Experimental Setup . . . . .	33
2.2.2	Characterization of Starch- and Chitosan-Coated MNPs . . . . .	33
2.2.3	Location and Uptake of MNPs . . . . .	35
2.2.4	Nano-Magnetic Forces Induce $\text{Ca}^{2+}$ Influxes. . . . .	36
2.2.5	The Location of MNPs Affected the Response of Cortical Neural Networks to Nano-Magnetic Forces . . . . .	38
2.2.6	Mechanism of Stimulation. . . . .	38
2.2.7	Lipid Bilayer Stretch Model . . . . .	42

2.3	Conclusions . . . . .	42
2.4	Materials and Methods. . . . .	45
2.4.1	Fabrication of Magnetic Chips. . . . .	45
2.4.2	Cortical Neural Culture . . . . .	46
2.4.3	Characterization of Nanoparticle Properties . . . . .	46
2.4.4	Nanoparticle Incubation. . . . .	47
2.4.5	Calcium Dye Incubation and Magnetic Force Stimulation. . . . .	47
2.4.6	Immunofluorescent Labeling. . . . .	48
2.4.7	Cytotoxicity Assay. . . . .	48
2.4.8	Flow Cytometry Analysis . . . . .	48
2.4.9	Image Acquisition, Analysis, and Statistical Evaluations . . . . .	48
	References. . . . .	49
<b>3</b>	<b>Chronic Neural Stimulation. . . . .</b>	<b>55</b>
3.1	Modulation of Excitatory: Inhibitory Ion Channel Ratio in Neurons with Magnetic Stimulation . . . . .	55
3.2	Conclusions . . . . .	57
3.3	Materials and Methods. . . . .	59
3.3.1	Quantification of Magnetic Forces. . . . .	59
3.3.2	Chronic Magnetic Force Stimulation. . . . .	59
3.3.3	Statistical Significance . . . . .	60
	References. . . . .	60
<b>4</b>	<b>Phenotypic Selection of <i>Magnetospirillum magneticum</i> (AMB-1) Over-Producers Using Magnetic Ratcheting . . . . .</b>	<b>61</b>
4.1	Introduction . . . . .	61
4.2	Results and Discussions. . . . .	63
4.2.1	Development of Magnetic Ratcheting Platform . . . . .	63
4.2.2	Generation of AMB-1 Library with Magnetic Ratcheting . . . . .	63
4.2.3	The Properties of Magnetosomes Produced by Over-producers Were Similar to Wild Type . . . . .	63
4.3	Conclusions . . . . .	65
4.4	Materials and Methods. . . . .	66
4.4.1	Culture Conditions. . . . .	66
4.4.2	Characterization of Cellular Magnetization ( $C_{mag}$ ) . . . . .	67
4.4.3	Isolation of Magnetosomes . . . . .	67
4.4.4	SQUID Characterization . . . . .	67
4.4.5	Chip Fabrication. . . . .	67
4.4.6	Automated Ratcheting System and Particle Experiments . . . . .	68
4.4.7	Electron Microscopy . . . . .	68
	References. . . . .	68

<b>5</b>	<b>Magnetic Microfluidic Separation for Estimating the Magnetic Contents of Magnetotactic Bacteria</b>	<b>71</b>
5.1	Introduction	71
5.2	Results and Discussions	72
5.2.1	Design of Magnetic Microfluidic Device	72
5.2.2	Optimizing Flow Ratio with Particles	72
5.2.3	Minimizing Flagella Motion	74
5.2.4	Assessing the Precision of Quantitative Estimation of Magnetic Contents in AMB-1 Mutants	74
5.2.5	Parallelized Design for Microfluidic Bioreactor	77
5.3	Conclusions	77
5.4	Materials and Methods	77
5.4.1	Microfabrication	77
5.4.2	Device Characterization with Beads	79
5.4.3	Magnetic Field Measurements	79
5.4.4	Culture Conditions	79
5.4.5	Trajectory Tracking	80
5.4.6	Microscopy	80
5.4.7	Electron Microscopy	80
5.4.8	Statistical Analysis	80
	References	81
<b>6</b>	<b>Outlook for Magnetic Neural Stimulation Techniques</b>	<b>83</b>
6.1	Reporters of Magnetic Stimulation	83
6.2	Nanotechnology	84
6.2.1	Microfluidics for Magnetic Nanoparticle Synthesis	85
6.2.2	Magnetotactic Bacteria for Magnetosomes and Magnetic Nanoparticles	85
6.2.3	Magnetic Nanoparticles for Crossing the Blood–Brain Barrier	86
6.2.4	Minimizing Cytotoxicity from Magnetic Nanoparticles	87
6.3	Energy-Delivering Devices	88
6.4	Conclusions	89
	References	90

Acute and Chronic Neural Stimulation via  
Mechano-Sensitive Ion Channels

Ping, A.T.K.

2018, XVII, 119 p. 33 illus., 32 illus. in color., Hardcover

ISBN: 978-3-319-69058-2
