

Contents

1	Explicit-Implicit Methods with Applications to Banach Space Valued Functions in Abstract Fractional Calculus	1
1.1	Introduction	1
1.2	Semi-local Convergence for Implicit Methods	3
1.3	Semi-local Convergence for Explicit Methods	9
1.4	Applications to X -valued Fractional Calculus	12
	References	19
2	Convergence of Iterative Methods in Abstract Fractional Calculus	21
2.1	Introduction	21
2.2	Semi-local Convergence for Implicit Methods	23
2.3	Semi-local Convergence for Explicit Methods	27
2.4	Applications to Abstract Fractional Calculus	29
	References	39
3	Equations for Banach Space Valued Functions in Fractional Vector Calculi	41
3.1	Introduction	41
3.2	Semi-local Convergence for Implicit Methods	43
3.3	Semi-local Convergence for Explicit Methods	47
3.4	Applications to X -valued Fractional and Vector Calculi	49
	References	57
4	Iterative Methods in Abstract Fractional Calculus	59
4.1	Introduction	59
4.2	Semi-local Convergence for Implicit Methods	61
4.3	Semi-local Convergence for Explicit Methods	65
4.4	Applications to X -valued Fractional Calculus	67
	References	71

5	Semi-local Convergence in Right Abstract Fractional Calculus . . .	73
5.1	Introduction	73
5.2	Semi-local Convergence for Implicit Methods	75
5.3	Semi-local Convergence for Explicit Methods	79
5.4	Applications to X -valued Right Fractional Calculus	81
	References	86
6	Algorithmic Convergence in Abstract g-Fractional Calculus	87
6.1	Introduction	87
6.2	Semi-local Convergence Analysis	88
6.3	Applications to X -valued Modified g -Fractional Calculus	92
	References	104
7	Iterative Procedures for Solving Equations in Abstract Fractional Calculus	105
7.1	Introduction	105
7.2	Semi-local Convergence for Implicit Methods	107
7.3	Semi-local Convergence for Explicit Methods	113
7.4	Applications to Abstract Fractional Calculus	117
	References	119
8	Approximate Solutions of Equations in Abstract g-Fractional Calculus	121
8.1	Introduction	121
8.2	Semi-local Convergence Analysis	122
8.3	Applications to X -valued g -Fractional Calculus	126
	References	136
9	Generating Sequences for Solving in Abstract g-Fractional Calculus	139
9.1	Introduction	139
9.2	Semi-local Convergence Analysis	140
9.3	Applications to X -valued g -Fractional Calculus of Canavati Type	144
	References	152
10	Numerical Optimization and Fractional Invexity	155
10.1	Introduction	155
10.2	Convergence of Method (10.1.2)	155
10.3	Multivariate Fractional Derivatives and Invexity	157
	References	161

Functional Numerical Methods: Applications to Abstract
Fractional Calculus

Anastassiou, G.A.; Argyros, I.K.

2018, X, 161 p., Hardcover

ISBN: 978-3-319-69525-9
