

Contents

1	Introduction	1
1.1	Time-Delay Systems and Its Classification	3
1.1.1	Retarded Time-Delay Systems (RTDS)	3
1.1.2	Neutral Time-Delay Systems (NTDS)	6
1.1.3	Stability Definition of Time-Delay Systems	6
1.1.4	Characterization of Stability of Time-Delay Systems	7
1.2	Basic Stability Theorems	10
1.2.1	Lyapunov-Razumikhin Theorem	10
1.2.2	Lyapunov-Krasovskii Theorem	11
1.3	Effect of Time-Delay in the System Dynamics: A Simulation Study	11
1.4	Linear Matrix Inequality (LMI)	13
1.4.1	The LMI Control Toolbox of MATLAB	16
1.4.2	LMI Formulation of Some Standard Problems	16
1.5	Time-Domain Stability Conditions	17
1.5.1	Delay-Independent Stability Condition	18
1.5.2	Delay-Dependent Stability Condition	19
1.6	Review on Delay-Dependent Stability Condition of Time-Delay Systems	21
1.7	Linear Systems with Actuator Saturation	23
1.8	Outline of the Book	27
	References	28
2	Stability Analysis of Time-Delay Systems	33
2.1	Introduction	33
2.2	Description of Time-Delay Systems	34
2.2.1	Nominal Time-Delay System for Stability Analysis	35
2.2.2	Uncertain Time-Delay Systems for Robust Stability Analysis	36

2.3	Delay-Dependent Stability Condition	37
2.3.1	Model Transformation Approach (Based on Newton-Leibniz Formula)	37
2.3.2	Bounding Techniques	45
2.3.3	Descriptor System Approach	48
2.3.4	Free Weighting Matrix Approach	54
2.4	Delay-Range-Dependent Stability Condition	65
2.5	Main Results on Stability Analysis of Time-Delay System	72
2.5.1	Stability Analysis of TDS with Single Time Delay	72
2.5.2	Stability Analysis of TDS with Two Additive Time-Varying Delays	82
2.5.3	Stability Analysis of TDS with Interval Time Varying Delay	87
2.6	Robust Stability Analysis of Time-Delay System	94
2.6.1	Characteristic of Structured Uncertainties	94
2.6.2	Delay-Dependent Robust Stability Analysis	96
2.7	Main Results on Delay-Dependent Robust Stability Analysis of TDS	103
2.7.1	Delay-Dependent Robust Stability Analysis of TDS with Single Time Delay	103
2.7.2	Robust Stability Analysis of TDS with Delay Varying in Ranges	109
2.8	Delay-Range-Dependent Stability Analysis of Uncertain TDS by Delay Partitioning Approach	114
2.9	Conclusion	120
	References	121
3	Stabilization of Time-Delay Systems	125
3.1	Introduction	125
3.2	Problem Statement	126
3.3	Delay-Dependent Stabilization of Nominal TDS	127
3.4	Main Results on Delay-Dependent Stabilization of Nominal TDS	135
3.5	Delay-Dependent Robust Stabilization of an Uncertain TDS	142
3.6	Main Results on Delay-dependent Robust Stabilization of an Uncertain TDS	145
3.7	State Feedback H_∞ Control of TDS	161
3.7.1	Problem Statement	161
3.8	Stabilization of LFC Problem for Time-Delay Power System Based on H_∞ Approach	162
3.8.1	Load-Frequency Control (LFC) of Power Systems with Communication Delay	164
3.8.2	Existing H_∞ Control Design For LFC Model	166
3.9	Main Results on H_∞ Based LFC of an Interconnected Time-Delay Power System	168

3.9.1	One-Term H_∞ Control	168
3.9.2	Two-Term H_∞ Control	169
3.9.3	Simulation Results	175
3.10	Conclusions	179
	References	181
4	Control of Time-Delay Systems with Actuator Saturation	185
4.1	Introduction	185
4.2	Characterization of Actuator Saturation	186
4.2.1	Polytopic Representation	187
4.2.2	Sector Nonlinearities Representation	187
4.3	Problem Formulation and Preliminaries	191
4.4	Main Result on Stabilization of TDS with Actuator Saturation	193
4.4.1	Stabilization Using Sector Nonlinearities Approximation	193
4.4.2	Optimization Algorithm	199
4.4.3	Simulation Results	202
4.4.4	Stabilization Using Polytopic Approximation	204
4.5	Main Result on Robust Stabilization of TDS with Actuator Saturation	212
4.5.1	Uncertain TDS with Actuator Saturation	212
4.5.2	Robust Stabilization Using Sector Nonlinearities Approach	213
4.6	Conclusion	221
	References	222
5	Fuzzy Time-Delay System	225
5.1	Introduction	225
5.2	Problem Formulation and Preliminaries	226
5.3	Stability Analysis	230
5.4	State Feedback Stabilization	234
5.5	Numerical Examples	236
5.6	Conclusion	241
	References	241
	Appendix	243

Stability and Stabilization of Linear and Fuzzy Time-Delay
Systems

A Linear Matrix Inequality Approach

Dey, R.; Ray, G.; E. Balas, V.

2018, XX, 267 p. 43 illus., Hardcover

ISBN: 978-3-319-70147-9
