

Contents

1	Introduction	1
1.1	The History of Time Measurement	1
1.2	Quality of Clocks	5
1.3	Advantages of a Nuclear Clock	6
1.4	Gamma Decay Versus Internal Conversion	7
1.5	What Makes $^{229\text{m}}\text{Th}$ Unique	8
1.6	The ^{229}Th Nuclear Clock Proposal	8
1.7	Constraining the Transition Energy	10
1.8	Prospects for a ^{229}Th Frequency Standard	10
	References	12
2	Theoretical Background	15
2.1	Nuclear Shell Models	15
2.1.1	Nuclear Single Particle Shell Model	16
2.1.2	The Nilsson Model	17
2.1.3	Rotational Bands	21
2.2	Nuclear γ Decay and Internal Conversion	22
2.2.1	Nuclear γ Decay	22
2.2.2	Internal Conversion	29
2.3	Nuclear Laser Excitation	34
2.3.1	The Optical Bloch Equations	35
2.3.2	The Low-Saturation Limit	38
2.3.3	Laser Excitation of $^{229\text{m}}\text{Th}$	44
2.3.4	A Comparison to $^{235\text{m}}\text{U}$	47
	References	48
3	The History of $^{229\text{m}}\text{Th}$	51
3.1	First Prediction of Existence	51
3.2	Further Evidence for $^{229\text{m}}\text{Th}$	53
3.3	Constraining the Transition Energy	55

3.3.1	First Energy Constraints	55
3.3.2	Improved Energy Determination	56
3.3.3	A Corrected Energy Value	57
3.4	Potential Applications	59
3.4.1	A Nuclear Clock Based on $^{229\text{m}}\text{Th}$	59
3.4.2	Search for Temporal Variations of Fundamental Constants	62
3.4.3	A $^{229\text{m}}\text{Th}$ -Based Nuclear Laser	64
3.4.4	Further Potential Applications	65
3.5	$^{229\text{m}}\text{Th}$ Excitation and Decay	66
3.5.1	Basic Theoretical Investigations	66
3.5.2	Excitation and Decay Under Special Conditions	69
3.5.3	Other Processes of Isomer Excitation and Decay	70
3.5.4	Coherent Control of Nuclei	71
3.6	Search for a Direct Decay	71
3.6.1	First Claim of a Direct Detection	71
3.6.2	Search for $^{229\text{m}}\text{Th}$ via α Decay	72
3.6.3	Search for $^{229\text{m}}\text{Th}$ in VUV Transparent Material	73
3.6.4	Search for $^{229\text{m}}\text{Th}$ in a Paul Trap	74
3.6.5	Search for $^{229\text{m}}\text{Th}$ via Internal Conversion	75
3.7	Further Experimental Investigations	77
3.7.1	An Improved Energy Determination	77
3.7.2	Probing the $^{229\text{m}}\text{Th}$ Hyperfine Structure	77
3.7.3	The Search for $^{229\text{m}}\text{Th}$ at Storage Rings	78
	References	79
4	Experimental Setup	87
4.1	Experimental Concept	88
4.1.1	Concept of the Ion-Beam Formation System	88
4.1.2	Searching for a Photonic Decay	91
4.1.3	Searching for an Internal-Conversion Decay	92
4.2	The Ion-Beam Formation System	93
4.2.1	The ^{233}U Source	94
4.2.2	The Buffer-Gas Stopping Cell	97
4.2.3	The DC Cage	100
4.2.4	The RF + DC Funnel	101
4.2.5	The Laval Nozzle	102
4.2.6	The Extraction RFQ	103
4.2.7	The Quadrupole Mass-Spectrometer	105
4.2.8	The Triode Extraction System	107
4.3	The Optical System	108
4.3.1	The Collection Surface	110
4.3.2	The First Parabolic Mirror	113

4.3.3	The Second Parabolic Mirror	115
4.3.4	Optical Filters	117
4.3.5	The Optical Chamber	117
4.4	The Detection System	119
4.4.1	The MCP Detector	119
4.4.2	The CCD Camera	122
4.5	Efficiency Estimates	124
4.5.1	Efficiency Estimate for the Ion Extraction	124
4.5.2	Efficiency Estimate for a Photonic Decay	125
4.5.3	Efficiency Estimate for an Internal-Conversion Decay	126
	References	127
5	Measurements	131
5.1	Preparatory Measurements	131
5.1.1	Extraction Rate for ^{229}Th Ions	132
5.1.2	Verification of the Ion Collection	135
5.1.3	Verification of the Optical Performance	138
5.2	Searching for the ^{229}Th Isomeric Decay	141
5.2.1	Investigation of the Photonic Decay Channel	141
5.2.2	Investigation of the Internal-Conversion Decay Channel	144
5.2.3	Investigation of the Isomeric Properties	149
5.3	Confirmation Measurements	151
5.3.1	Background Signals Originating from Setup Components	151
5.3.2	Background Effects Caused by Ionic Impact	152
5.3.3	Nuclear Decay Signals Other Than $^{229\text{m}}\text{Th}$	154
5.3.4	Signals Caused by Excited Shell-States	158
5.3.5	Estimation of the $^{229,228}\text{Th}$ Intrinsic Activity	159
	References	160
6	Conclusion and Outlook	163
6.1	Conclusion	163
6.2	Outlook	166
	References	167
	Appendix A: ^{233}U Source Investigation	169
	Appendix B: Numerical Calculations and Code Implementation	199
