Part I Theoretical Bases

1	The Standard Model of Particle Physics	3
1.1	Elementary Particles and Forces	3
1.2	Standard Model Lagrangian	5
1.3	Scalar Sector	8
1.3.1	Electroweak Symmetry Breaking	8
1.3.2	SM H Production Modes	11
1.3.3	SM H Decay Modes	11
1.3.4	The SM Scalar Boson at the LHC	14
1.4	Chapter Summary	14
	References	15
2	Physics Beyond the Standard Model	17
2.1	Motivations for New Physics	17
2.1.1	Neutrino Masses	18
2.1.2	Dark Matter and Dark Energy	18
2.1.3	Asymmetry Between Matter and Antimatter	18
2.1.4	Free Parameters in the SM	19
2.1.5	Hierarchy Problem	19
2.1.6	Coupling Unification	20
2.2	Two-Higgs-doublet Models	20
2.2.1	Formalism	21
2.2.2	Decoupling and Alignment Limits	23
2.2.3	Light Scalars in 2HDM	24
2.3	Supersymmetry	24
2.3.1	Minimal Supersymmetric Extension of the SM (MSSM)	26
2.3.2	Scalar Sector in the MSSM	27
2.4	Two-Higgs-doublet Models + a Singlet	29

2.4.1	Introduction to 2HDM+S	29
2.4.2	Exotic Decays of the 125-GeV Particle	30
2.5	Search for BSM Physics in the Scalar Sector	31
2.6	Precision Measurements Versus Direct Discovery in the Case of the SM+S	33
2.7	Chapter Summary	35
	References	35
3	Statistics	39
3.1	Likelihood	39
3.1.1	Basics	39
3.1.2	Introducing Systematic Uncertainties	40
3.2	Maximum Likelihood Fit	43
3.3	Exclusion Limits	43
3.4	Significance	46
3.5	Goodness-of-fit Test	48
3.6	Boosted Decision Trees	49
3.7	K-Nearest Neighbor Classifier	51
3.8	Chapter Summary	52
	References	52
 Part II Experimental Bases		
4	Experimental Setup	57
4.1	Large Hadron Collider	57
4.1.1	Proton Production and Acceleration	57
4.1.2	Experiments	59
4.1.3	Data Taking and LHC Schedule	60
4.2	Compact Muon Solenoid	61
4.2.1	Overview of the CMS Detector	61
4.2.2	Tracker	63
4.2.3	Electromagnetic Calorimeter	63
4.2.4	Hadronic Calorimeter	65
4.2.5	Magnet	66
4.2.6	Muon System	67
4.2.7	Trigger	68
4.3	Chapter Summary	69
	References	69
5	Event Generation, Simulation and Reconstruction	71
5.1	Event Generation and Simulation	71
5.2	Object Reconstruction and Identification	72
5.2.1	Particle-Flow	72
5.2.2	Tracks and Vertices	73

5.2.3	Jets	74
5.2.4	Electrons	76
5.2.5	Muons	79
5.2.6	Taus	80
5.2.7	Transverse Missing Energy	81
5.3	Chapter Summary	83
	References	83
6	Tau Lepton Reconstruction and Identification	85
6.1	HPS Algorithm Description	85
6.1.1	Reconstruction	86
6.1.2	Identification	87
6.2	HPS Algorithm Performance in Run-1	91
6.2.1	Expected Performance	91
6.2.2	Tau Identification Efficiency in Data	91
6.2.3	Anti-lepton Discriminator Efficiency	108
6.2.4	$\mu \rightarrow \tau_h$ and $e \rightarrow \tau_h$ Misidentification Rates	110
6.2.5	Other Performance Measurements	112
6.3	HPS Algorithm in Run-2	115
6.3.1	Modifications with Respect to Run-1	115
6.3.2	Performance in 2015 Data	118
6.4	Chapter Summary	123
	References	123
 Part III SM Physics Analyses		
7	Search for the SM Scalar in the $ZH \rightarrow \ell\ell\tau\tau$ Channel	127
7.1	Analysis Overview	127
7.2	Selection	128
7.2.1	Z Boson Candidate Selection	128
7.2.2	H Boson Candidate Selection	128
7.2.3	Other Common Selection Criteria	129
7.3	Background Estimation	131
7.3.1	Irreducible Process Estimation	131
7.3.2	Reducible Process Estimation	131
7.4	Di-tau Mass Reconstruction	137
7.5	Systematic Uncertainties and Simulation Corrections	140
7.6	Results	144
7.7	Chapter Summary	149
	References	151
8	Search for the SM Scalar in the $WH \rightarrow e\mu\tau_h$ Channel	153
8.1	Selection	153
8.2	Background Estimation	154

8.3	Results	158
8.4	Chapter Summary	160
	References	161
9	Combination of Searches for the SM Scalar Boson Decaying to Taus	163
9.1	Gluon–Gluon Fusion and Vector Boson Fusion Production Modes	163
9.2	Vector Boson Associated Production	164
9.3	Combination of All Production Modes	165
9.4	Chapter Summary	168
	References	168
Part IV BSM Physics Analyses		
10	Search for a Heavy Pseudoscalar Boson A Decaying to Zh in the $\ell\ell\tau\tau$ Final State	171
10.1	Differences with Respect to the SM $ZH \rightarrow \ell\ell\tau\tau$ Analysis	171
10.2	Background Estimation Validation	175
10.3	High \cancel{E}_T Excess	177
10.4	Results	179
10.5	Combination with $H \rightarrow hh \rightarrow bb\tau\tau$	183
10.6	Chapter Summary	184
	References	184
11	Search for Exotic Decays of the SM-Like Scalar Boson in the $\mu\mu\tau\tau$ Final State	185
11.1	Selection	185
11.2	Background Estimation and its Validation	189
11.3	Modeling of the Experimental $m_{\mu\mu}$ Distributions	194
	11.3.1 Signal	194
	11.3.2 ZZ Background	197
	11.3.3 Reducible Background	201
11.4	Uncertainties	203
11.5	Results	206
11.6	Interpretation and Comparison with Other CMS Searches	209
11.7	Chapter Summary	214
	References	215
12	Search for a Light Pseudoscalar Decaying to Taus	217
12.1	Analysis Overview	217
12.2	Selection	218
	12.2.1 $\tau_e\tau_\mu$ Final State	219
	12.2.2 $\tau_\mu\tau_h$ Final State	220
	12.2.3 $\tau_e\tau_h$ Final State	220

12.3	Background Estimation	221
12.3.1	$Z/\gamma^* \rightarrow \tau\tau$	221
12.3.2	$Z/\gamma^* \rightarrow \mu\mu/ee$	222
12.3.3	$W + \text{jets}$	222
12.3.4	QCD Multijet	223
12.3.5	$t\bar{t}$ production	224
12.3.6	Other Backgrounds	226
12.3.7	Control Distributions	226
12.4	Systematic Uncertainties	226
12.5	Results	228
12.6	Chapter Summary	231
	References	232
13	Search for a Heavy Di-tau Resonance in the MSSM	233
13.1	Categorization	233
13.2	$\tau_h\tau_h$ Final State	235
13.2.1	Selection	235
13.2.2	Background Estimation	236
13.2.3	Trigger Efficiency	238
13.3	Differences from the Light Pseudoscalar Boson Search Analysis in the $e\tau_h$, $\mu\tau_h$ and $e\mu$ Final States	239
13.3.1	Differences Specific to the $e\mu$ Channel	239
13.3.2	Differences Specific to the $e\tau_h$ and $\mu\tau_h$ Channels	240
13.4	Φ_{p_T} Reweighting	240
13.5	Result Interpretation	242
13.6	Chapter Summary	244
	References	245

Part V Status and Prospects

14	Overview of LHC Results and Prospects for Future Colliders	249
14.1	Overview of CMS Measurements in the Scalar Sector	249
14.1.1	SM Precision Measurements	249
14.1.2	Exotic Scalar Decays	253
14.1.3	MSSM and 2HDM Scalar Searches	254
14.2	Overview of Other SM and BSM Results of the CMS Experiment	255
14.2.1	Standard Model	255
14.2.2	Dark Matter	256
14.2.3	Supersymmetry	257
14.2.4	Others	258

14.3 Future Collider Experiments 258

14.4 Chapter Summary 260

References 260

15 Conclusion 263

Appendix A: Technical Details About Physics Analyses. 267

Scalar Boson Decays to Tau Leptons
in the Standard Model and Beyond

Caillol, C.

2018, XXI, 276 p. 140 illus., 99 illus. in color., Hardcover
