

Contents

1	Introduction	1
1.1	Overview	1
1.1.1	Cogeneration and Cooling Plant in Brief	4
1.1.2	Common Faults in a Cogeneration and Cooling Plant	5
1.2	Research Gaps	7
1.3	Objectives to be Addressed	8
	References	9
2	Literature Review	11
2.1	Introduction	11
2.1.1	Basic Definitions	12
2.1.2	Available Signals Versus Faults	12
2.1.3	Classification of Fault Detection and Diagnosis (FDD) Methods	14
2.2	Model-Based Fault Detection and Diagnosis Techniques	16
2.2.1	Quantitative Model Based Methods	16
2.2.2	Qualitative Model Based Methods	23
2.3	Fault Detection and Diagnosis Techniques as Applied to CCP	23
2.4	Summary	26
	References	28
3	Model Identification Using Neuro-Fuzzy Approach	37
3.1	Introduction	37
3.2	Model Identification	37
3.2.1	Orthonormal Basis Functions	41
3.2.2	Construction of Nonlinear Models in the Framework of OBFs	44

3.3	Neural Network and Fuzzy Systems	46
3.3.1	Artificial Neural Networks	46
3.3.2	Fuzzy Systems and Fuzzy Modelling	53
3.4	Neuro-Fuzzy Model Identification	56
3.4.1	Neuro-Fuzzy Singleton	57
3.4.2	Takagi Sugeno Kang (TSK) Based Neuro-Fuzzy Network	58
3.5	Neuro-Fuzzy Model Training	60
3.5.1	Least Squares Based Learning Algorithms	60
3.5.2	Estimation of Rules Consequent Parameter	61
3.5.3	Gradient Descent Learning Algorithm	63
3.5.4	Particle Swarm Optimization	64
3.6	A New Optimization Algorithm Based on Mating Behavior of Simien Jackal	68
3.7	Summary	69
	References	70
4	Model Uncertainty, Fault Detection and Diagnostics	75
4.1	Introduction	75
4.2	Model Uncertainty Calculation for Robust Fault Detector Design	75
4.2.1	Linear in Parameter Models	76
4.2.2	Uncertainty Calculation for Nonlinear in Parameter Models	85
4.3	Fault Detection	88
4.4	Fault Diagnostics	89
4.4.1	Mapping Binary Diagnostic Signals into the Space of Faults	89
4.4.2	Diagnostics Using Fuzzy Systems	91
4.4.3	Rules of Inference and Fault Diagnostics	91
4.5	Summary	95
	References	95
5	Intelligent Fault Detection and Diagnostics	99
5.1	Introduction	99
5.2	Structure of the Proposed IFDD Framework	99
5.2.1	Data Pre-processing Module (DPM)	100
5.2.2	Fault Detection Module (FDEM)	102
5.2.3	Fault Diagnosis Module (FDIM)	104
5.3	Overall Plant Level Fault Detection and Diagnosis System	105
5.4	Techniques to Accommodate Effects of Scheduled and Forced Operating Conditions on NOC Models	107

5.5	Steps in OBF Based Nonlinear Model Construction	110
5.6	New Model Training Algorithm	112
5.7	Summary	115
	References	116
6	Application Studies, Part-I: Model Identification and Validation	119
6.1	Introduction	119
6.2	Description of the Sub-Systems in the CCP Selected for the Case Study	119
6.2.1	Gas Turbine Generator	120
6.2.2	Heat Recovery Steam Generator	129
6.2.3	LiBr-H ₂ O Steam Absorption Chiller	131
6.3	Validation and Analysis of Nonlinear Models for Normal Operating Conditions	133
6.3.1	Models for the Gas Turbine Generator	134
6.3.2	Identified Models for the HRSG and SAC	160
6.3.3	Validation of First Principle Model for the HRSG	165
6.4	Summary	168
	References	169
7	Application Studies, Part-II: Fault Detection and Diagnostics	171
7.1	Introduction	171
7.2	Variable Geometry Gas Turbine Generator	172
7.2.1	Fault Detection in the Gas Turbine Generator	172
7.2.2	Fault Diagnosis in the Gas Turbine Generator	182
7.3	12 Ton/Hr Rated Heat Recovery Steam Generator	189
7.3.1	Fault Detection in the HRSG	189
7.3.2	Fault Diagnosis in the HRSG	191
7.4	LiBr-H ₂ O Steam Absorption Chiller	197
7.4.1	Fault Detection in the SAC	198
7.4.2	Fault Diagnosis in the SAC	198
7.5	Summary	205
8	Conclusion and Recommendation	207
8.1	Introduction	207
8.2	Conclusions	208
8.3	Recommendation for Further Research	209
	Appendix A: Fuzzy Operators	211
	Appendix B: First Order Derivatives of Neural Network Based Output Functions	215
	Appendix C: Data Pre-processing Techniques and Model Performance Measures	225

Appendix D: Flowcharts Related to the Developed FDD System.	235
Appendix E: Semi-empirical Models for GTG and HRSG	247
Appendix F: Schematic Diagram, Design Point or Alarm Setting Data for SAC, HRSG and GTG.	263
Appendix G: Thermodynamic Properties of Air, Combustion Products, Steam and LiBr + H₂O Solution.	271
Appendix H: Fault Names and Input–Output Relations for GTG, HRSG, and SAC.	275
Appendix I: ProFDD Main Pages	281

A Hybrid Approach for Power Plant Fault Diagnostics

Lemma, T.A.

2018, XII, 283 p. 161 illus., 138 illus. in color.,
