

Contents

Simulating Evolutional Symport/Antiport by Evolution-Communication and vice versa in Tissue P Systems with Parallel Communication	1
<i>Henry Adorna, Artiom Alhazov, Linqiang Pan, and Bosheng Song</i>	
Hierarchical P Systems with Randomized Right-Hand Sides of Rules	15
<i>Artiom Alhazov, Rudolf Freund, and Sergiu Ivanov</i>	
Controlled Reversibility in Reaction Systems	40
<i>Bogdan Aman and Gabriel Ciobanu</i>	
Multiset Patterns and Their Application to Dynamic Causalities in Membrane Systems	54
<i>Roberto Barbuti, Roberta Gori, and Paolo Milazzo</i>	
Counting Membrane Systems	74
<i>Luis Valencia-Cabrera, David Orellana-Martín, Agustín Riscos-Núñez, and Mario J. Pérez-Jiménez</i>	
APCol Systems with Teams	88
<i>Lucie Ciencialová, Luděk Cienciala, and Erzsébet Csuhaj-Varjú</i>	
Bi-simulation Between P Colonies and P Systems with Multi-stable Catalysts	105
<i>Erzsébet Csuhaj-Varjú and Sergey Verlan</i>	
Computationally Complete Generalized Communicating P Systems with Three Cells	118
<i>Erzsébet Csuhaj-Varjú and Sergey Verlan</i>	
Event-Based Life in a Nutshell: How Evaluation of Individual Life Cycles Can Reveal Statistical Inferences Using Action-Accumulating P Systems	129
<i>Thomas Hinze and Benjamin Förster</i>	
On Evolution-Communication P Systems with Energy Having Bounded and Unbounded Communication	151
<i>Richelle Ann B. Juayong, Nestine Hope S. Hernandez, Francis George C. Cabarle, Kelvin C. Buño, and Henry N. Adorna</i>	
Generalized P Colony Automata and Their Relation to P Automata.	167
<i>Kristóf Kántor and György Vaszil</i>	

Modelling and Validating an Engineering Application in Kernel P Systems	183
<i>Raluca Lefticaru, Mehmet Emin Bakir, Savas Konur, Mike Stannett, and Florentin Ipate</i>	
Solving a Special Case of the P Conjecture Using Dependency Graphs with Dissolution	196
<i>Alberto Leporati, Luca Manzoni, Giancarlo Mauri, Antonio E. Porreca, and Claudio Zandron</i>	
Most Common Words – A cP Systems Solution	214
<i>Radu Nicolescu</i>	
Tissue P Systems with Rule Production/Removal	230
<i>Linqiang Pan, Bosheng Song, and Gexiang Zhang</i>	
Reversing Steps in Membrane Systems Computations	245
<i>G. Michele Pinna</i>	
Families of Languages Encoded by SN P Systems	262
<i>José M. Sempere</i>	
On the Robust Power of Morphogenetic Systems for Time Bounded Computation	270
<i>Petr Sosík, Vladimír Smolka, Jan Drastík, Jaroslav Bradík, and Max Garzon</i>	
Author Index	293

Membrane Computing

18th International Conference, CMC 2017, Bradford, UK,

July 25-28, 2017, Revised Selected Papers

Gheorghe, M.; Rozenberg, G.; Salomaa, A.; Zandron, C.

(Eds.)

2018, XVI, 293 p. 33 illus., Softcover

ISBN: 978-3-319-73358-6
