

Contents

1	General introduction	1
1.1	Composition of milk and its implication on the heat stability	2
1.1.1	Caseins	3
1.1.2	Whey proteins.....	8
1.1.3	Lactose	10
1.1.4	Milk salts.....	13
1.2	Concentration of milk and high heat treatment.....	16
1.2.1	Principles of evaporation and reverse osmosis.....	17
1.2.2	Design of high heat treatments for dairy products	18
1.3	Methods for the determination of the heat stability.....	30
1.3.1	Subjective heat stability test methods	30
1.3.2	Objective determination of heat-induced coagulation	33
1.4	Factors that affect heat stability of milk and concentrated milk.....	35
1.4.1	Dependency of stability on pH and heating temperature.....	36
1.4.2	The effects of processing factors and additives	39
2	Motivation and objectives.....	45
3	Heat stability of concentrated skim milk on lab scale	47
	Abstract	47
3.1	Introduction.....	48
3.2	Materials an methods.....	49
3.3	Results and discussion.....	52
3.4	Conclusion.....	59
	Summary and contribution of the doctoral candidate	60
4	Heat stability of concentrated skim milk on pilot scale.....	63
	Abstract	63
4.1	Introduction.....	64

4.2	Materials and methods	66
4.3	Results and discussion.....	70
4.4	Conclusion.....	79
	Summary and contribution of the doctoral candidate	80
5	Dissociation and coagulation of caseins and whey proteins	83
	Abstract	83
5.1	Introduction.....	84
5.2	Materials and methods	85
5.3	Results and discussion.....	89
5.4	Conclusions	100
	Summary and contribution of the doctoral candidate	101
6	Preparation of simulated milk ultrafiltrate	103
	Abstract	103
6.1	Introduction.....	104
6.2	Materials and methods	106
6.3	Results and discussion.....	112
6.4	Conclusions	120
	Appendix.....	121
	Summary and contribution of the doctoral candidate	121
7	Modelling of the heat stability of concentrated milk.....	123
	Abstract	123
7.1	Introduction.....	124
7.2	Materials and methods	125
7.3	Results and discussion.....	129
7.4	Conclusions	138
	Appendix.....	140
	Summary and contribution of the doctoral candidate	141
8	The effect of calcium and pH on heat treated micellar casein	143
	Abstract	143
	Highlights.....	144
8.1	Introduction.....	144
8.2	Materials an methods.....	146
8.3	Results and discussion.....	151
8.4	Conclusions	162
	Summary and contribution of the doctoral candidate	163
9	Overall discussion and outlook	165
9.1	Heat stability of concentrated milk.....	166

9.2	Mechanisms of the heat coagulation of casein micelles.....	169
9.3	Changes in heat stability induced by preheating, milk fat, and homogenisation	173
9.4	Conclusion and outlook	178
10	Supplementary material	181
10.1	Supplementary note I.....	181
10.2	Supplementary note II	182
10.3	Supplementary note III.....	183
	References.....	185
	Appendix.....	197
	Peer reviewed publications	197
	Non reviewed publications	198
	Oral presentations.....	199
	Poster presentations.....	200

Heat Stability of Concentrated Milk Systems
Kinetics of the Dissociation and Aggregation in High
Heated Concentrated Milk Systems

Dumpler, J.

2018, XXXVI, 201 p. 67 illus., 11 illus. in color., Softcover

ISBN: 978-3-658-19695-0
