

# Contents

- 1 Introduction** . . . . . 1
  - 1.1 Turbine Blade of Aero-Engine . . . . . 1
    - 1.1.1 Introduction of Aero-Engine . . . . . 1
    - 1.1.2 Turbine Blade of Aero-Engine . . . . . 3
  - 1.2 Investment Casting Process of Turbine Blade . . . . . 7
    - 1.2.1 The Main Processes of Investment Casting . . . . . 7
    - 1.2.2 Main Issues in Investment Casting of Turbine Blade . . . . . 8
  - 1.3 Literature Review of Investment Casting Die Technology . . . . . 9
    - 1.3.1 Parametric Modeling for Turbine Blade . . . . . 9
    - 1.3.2 Intelligent Design for Investment Casting Die . . . . . 10
    - 1.3.3 Optimization of Investment Casting Die Cavity . . . . . 13
    - 1.3.4 NDT of Investment Casting Blade  
and Rapid Finalization . . . . . 14
  - 1.4 The Developmental Trends in Turbine Blade Investment  
Casting Technology . . . . . 16
  - References . . . . . 18
- 2 Digitized Modeling Technology of Turbine Blade** . . . . . 21
  - 2.1 Structural Features Classification of Turbine Blade . . . . . 21
    - 2.1.1 Structural Elements Classification of Turbine Blade . . . . . 21
    - 2.1.2 Feature Modeling . . . . . 24
    - 2.1.3 Feature Definitions of Turbine Blade Structure . . . . . 25
  - 2.2 Parametric Modeling of Structural Features . . . . . 27
    - 2.2.1 Design Process of Turbine Blade . . . . . 27
    - 2.2.2 Basic Principle of Parametric Modeling . . . . . 28
    - 2.2.3 Datum Feature of Turbine Blade Modeling . . . . . 31
    - 2.2.4 Surface Modeling of Turbine Blade . . . . . 32
    - 2.2.5 Internal Profile Feature Modeling of Turbine Blade . . . . . 44
    - 2.2.6 Typical Feature Modeling . . . . . 50

2.3 Case Study .....	60
References. ....	61
<b>3 Cavity Design Method for Investment Casting Die of Turbine Blade</b> .....	<b>63</b>
3.1 Multistate Model Transformation Method for Investment Casting Die Cavity of Turbine Blade .....	63
3.1.1 Definition of Multistate Model of Investment Casting Die Cavity .....	64
3.1.2 Investment Casting Process Driven Multistate Model Transformation .....	65
3.1.3 Geometric Information Mapping for Multistate Model Based on Rules .....	67
3.2 Parting Technologies for Investment Casting Die Cavity .....	74
3.2.1 The Parting Principle Based on Feature Decomposition ...	75
3.2.2 The Die Cavity Feature Decomposition Method .....	76
3.2.3 Rule-Based Parting Method of Die Cavity .....	78
3.3 Design Examples of Investment Casting Die Cavity .....	82
References. ....	83
<b>4 Design of the Die Base for the Investment Casting Turbine Blade</b> .....	<b>85</b>
4.1 Definition and Structure of the Knowledge Template of Die Base .....	87
4.1.1 Typical Structure of the Base of the Investment Casting Die .....	87
4.1.2 The Definition of the Knowledge Template for the Die Base .....	88
4.1.3 Structure and Data Model of the Knowledge Template for the Die Base .....	91
4.2 The Method to Construct a Knowledge Template for Investment Casting Die .....	94
4.2.1 The Procedures to Construct a Knowledge Template for the Die Base .....	94
4.2.2 Extraction of the Knowledge Template .....	95
4.2.3 Customization of the Knowledge Template for the Die Base .....	98
4.3 Rapid Design of Investment Casting Die Base Based on the Knowledge Template .....	101
4.3.1 Rapid Design Method of the Die Base .....	101
4.3.2 Design Example with the Template .....	103
References. ....	104

<b>5 Deformation Simulation of Investment Casting and Die Cavity</b>	
<b>Optimization of Turbine Blade</b> . . . . .	105
5.1 Deformation Simulation of Turbine Blade Investment Casting . . . . .	105
5.1.1 Investment Casting Simulation Modeling . . . . .	105
5.1.2 Finite Element Modeling Investment Casting . . . . .	112
5.1.3 Investment Casting Simulation . . . . .	115
5.2 The Analysis Calculation of the Simulation of Investment Casting Deformation. . . . .	134
5.2.1 The Distribution Regularity of Turbine Blade Surface Size Errors . . . . .	134
5.2.2 The Definition of the Displacement Field of Solidification Process . . . . .	135
5.2.3 The Calculate Method of Displacement Field . . . . .	136
5.2.4 Vector Expression and Vector Resolution of the Displacement Field . . . . .	136
5.2.5 The Establishment of Displacement Field Model . . . . .	141
5.3 Reserve Deformation Optimization and Virtual Mold Repair of the Mold Cavity . . . . .	142
5.3.1 Calculating Methods of Cavity Size . . . . .	142
5.3.2 The Method of Reverse Deformation of Cavity . . . . .	146
5.3.3 Reverse Superposition Method of Grid Displacement Field . . . . .	151
5.3.4 Cavity Optimization Based on Superimposed Displacement Field . . . . .	152
5.3.5 Scaling Method Based on Shrinkage Ratio . . . . .	156
5.4 The Rapid Verification Technologies of Cavity Optimization. . . . .	166
5.4.1 Die Cavity Validation Scheme Based on Wax Pattern NC Machining . . . . .	166
5.4.2 Wax Material Craft Process and Machining Parameter Optimization . . . . .	168
5.4.3 NC Machining Post Processing of Wax Material . . . . .	169
References. . . . .	169
<b>6 The Manufacturing and Finalization of the Turbine Blade Investment Casting Die</b> . . . . .	173
6.1 The Manufacturing Process of the Turbine Blade Investment Casting Die. . . . .	173
6.1.1 The Structural Features of the Turbine Blade Investment Casting Die. . . . .	173
6.1.2 The Manufacturing Process of the Turbine Blade Investment Casting Die. . . . .	174

6.2	The Process Plan of the Turbine Blade Investment Casting Die. . . . .	176
6.2.1	Materials Selection for Die Manufacturing . . . . .	176
6.2.2	The Process Planning for Die Manufacturing . . . . .	178
6.2.3	The Design of the Second Tooling Electrode . . . . .	182
6.2.4	The Selection of the Process Ball . . . . .	185
6.3	The Machining Technology of the Turbine Blade Investment Casting Die. . . . .	185
6.3.1	The Machining Technology . . . . .	185
6.3.2	Nontraditional Machining Technologies in Die Manufacturing. . . . .	188
6.3.3	The Surface Treatment Technology. . . . .	198
6.3.4	The Repairing Technique . . . . .	204
6.4	The Finalization of the Turbine Blade Investment Casting Die. . . . .	206
6.4.1	The Inspection of the Investment Casting Die. . . . .	206
6.4.2	The Testing of the Investment Casting Die. . . . .	207
6.4.3	The Finalization of the Investment Casting Die . . . . .	208
	References. . . . .	209
<b>7</b>	<b>Turbine Blade Investment Casting Experiment and Measurement Evaluation . . . . .</b>	<b>211</b>
7.1	Investment Casting Experiment Process . . . . .	211
7.2	Blade Casting Geometrical Dimension Measurement and Evaluation. . . . .	212
7.2.1	Measurement Data Acquisition . . . . .	213
7.2.2	Model Alignment . . . . .	227
7.2.3	Geometrical Shape Analysis . . . . .	234
