1	Review of the Development of Dedicated Mobile Communications for High-Speed Railway	1
1.1	Railway Development in China	1
1.2	High-Speed Railway Development in the World	3
1.2.1	High-Speed Railway Development in China	5
1.3	The Active Role of Mobile Communications for Railway	8
1.4	GSM for Railway	9
1.4.1	The Development of GSM-R	10
1.4.2	GSM-R Key Technology and Engineering Measures	11
1.5	Next-Generation Mobile Communication System for Railway	14
	References	17
2	Key Issues for GSM-R and LTE-R	19
2.1	GSM-R Architecture	19
2.1.1	GSM-R Network Composition	19
2.1.2	Mobile Switching Subsystem	19
2.1.3	Mobile Intelligent Network Subsystem	21
2.1.4	General Packet Radio Service (GPRS) Subsystem	22
2.1.5	Base Station Subsystem	23
2.1.6	Operation and Support Subsystem (OSS)	24
2.1.7	Terminal	25
2.2	GSM-R Network Hierarchical Structure	25
2.2.1	Mobile Switching Network	25
2.2.2	Intelligent Network	26
2.2.3	General Packet Radio Service Network	26
2.3	LTE-R Architecture	27
2.4	Key Technologies for GSM-R	37
2.5	Key Technologies for LTE-R	42
2.5.1	The Application Requirements of the Next-Generation Railway Mobile Communication System	44

2.5.2	The Technology System and Network Architecture of the Next-Generation Railway Mobile Communication System	45
2.5.3	Frequency and Bandwidth Requirements of the Next-Generation Railway Mobile Communication System	46
2.5.4	The Key Technology in the Next-Generation Railway Mobile Communication System	46
2.5.5	Hybrid Networking of GSM-R and the Next-Generation Mobile Communication System	50
2.5.6	The Evaluation and Optimization of High-Speed Railway Wireless Resource Management Mechanism. . . .	51
2.6	Summary	53
	References	53
3	Radio Propagation and Wireless Channel for Railway Communications	57
3.1	High-Speed Railway Propagation Scenarios.	57
3.1.1	High-Speed Railway Propagation Scenarios Definition	57
3.1.2	Propagation Scenarios of Wide-Sense Vehicle-to-X Communications	60
3.2	High-Speed Railway Channel Measurements.	68
3.2.1	Measurement Methods and System.	68
3.2.2	Measurement Campaign	71
3.3	Narrowband Channel Characterization of High-Speed Railways	75
3.3.1	Path Loss	75
3.3.2	Shadow Fading.	78
3.3.3	Small-Scale Fading.	86
3.4	Wideband Channel Characterization of High-Speed Railways	100
3.4.1	Delay Characteristics	100
3.4.2	Doppler Effect	104
3.4.3	Angular Characteristics.	109
3.5	Summary	116
	References	116
4	Cooperation and Cognition for Railway Communications.	125
4.1	Cooperation Scenarios	125
4.1.1	Improved Channel Reliability	129
4.1.2	Improved System Throughput.	130
4.1.3	Seamless Service Provision.	133
4.2	Key Techniques for Cooperation	133
4.2.1	Relay Protocol	133
4.2.2	MIMO and Cooperative Communication	144
4.2.3	Distributed Space-Time Coding	147
4.2.4	Physical Layer Network Coding and Cooperative Communication.	151

4.3	Signal Classification in Cognitive Radio	155
4.3.1	Spectrum Sensing	159
4.3.2	Automatic Modulation Classification	165
4.3.3	Specific Emitter Identification	172
4.4	Cooperation and Cognition for High-Speed Railway	176
4.4.1	Relay Selective Cooperation in Railway Network	178
4.4.2	A Cooperative Handover Scheme for High-Speed Railway	181
4.4.3	Cognition for High-Speed Railway	185
4.5	Summary	190
4.5.1	Cooperative Diversity in Wireless Sensor Networks	194
4.5.2	Cooperative Diversity in Cognitive Radio	194
4.5.3	Summary of Cognitive Radio	198
	References	199
5	Resource Management for High-Speed Railway Mobile Communications	205
5.1	Introduction	205
5.2	Overview and Survey	207
5.2.1	Admission Control	207
5.2.2	Level-Based Admission Control	208
5.2.3	Handover-Based Admission Control	209
5.2.4	Priority-Based Admission Control	209
5.2.5	Resource Allocation	210
5.2.6	Interference-Aware Resource Allocation	211
5.2.7	QoS-Aware Resource Allocation	212
5.2.8	Cross-Layer Dynamic Resource Allocation	213
5.2.9	Power Control	214
5.3	Resource Allocation and Power Control	216
5.3.1	System Model	216
5.3.2	Time-Distance Mapping	217
5.3.3	BS-RS Link Capacity	218
5.3.4	Utility-Based Resource Allocation	218
5.3.5	Problem Formulation	219
5.3.6	PAT Problem	220
5.3.7	PAS Problem	221
5.3.8	Problem Transformation	223
5.3.9	The Greedy Algorithm	226
5.3.10	Numerical Results and Discussions	228
5.4	Dynamic Resource Management	235
5.4.1	System Model	235
5.4.2	Problem Formulation	238
5.4.3	Dynamic Resource Management Schemes	240
5.4.4	Lyapunov Drift-Plus-Penalty Approach	241
5.4.5	Dynamic Resource Management Algorithm	242

5.4.6	Dual Optimization Framework	245
5.4.7	Simulation Results	247
5.5	Challenges and Open Issues.	251
5.5.1	Location-Aware Resource Management	252
5.5.2	Cross-Layer Based Resource Management	252
5.5.3	Energy-Efficient Resource Management	253
5.5.4	Robust Resource Management	253
5.5.5	Resource Management for 5G Communications	254
5.6	Summary	254
	References	255
6	LTE-R Network	259
6.1	LTE-R Network Services	259
6.2	LTE-R Network Architecture	262
6.3	LTE-R Network Performance Evaluation	265
6.3.1	Queueing Theory	265
6.3.2	Petri Nets	266
6.3.3	Network Calculus	266
6.3.4	System Model	270
6.3.5	Stochastic Arrival Curve for Train Control Service	277
6.3.6	Stochastic Service Curve for HSR Fading Channel	278
6.3.7	Performance Evaluation	284
