
Contents

1	An Overview of Project and Its Environmental Issues	1
1.1	Features of the Three Gorges Project (TGP)	1
1.1.1	The Dam Project	3
1.1.2	The Resettlement Project	4
1.1.3	The Power Transmission Project	5
1.1.4	The Reservoir Characteristics	5
1.1.5	Main Benefits of the TGP	6
1.1.6	TGP Construction	7
1.2	Pre-Dam Environment	8
1.2.1	Overview of the Environment of the River Basin	8
1.2.2	Environment of the Reservoir Area	10
1.2.3	Main Environmental Problems of the Yangtze River Basin and the Reservoir Area	12
2	TGP Environmental Impact Evaluation	15
2.1	Related Studies	15
2.1.1	Research and Scrutinization	15
2.1.2	Environmental Impact Statement (EIS)	16
2.1.3	Scope, Hierarchical System, and Methodology of EIA	17
2.2	Major TGP Impact on Environment and Comments	19
2.2.1	Hydrology, Water Quality, and Underground Water	19
2.2.2	Fish and Aquatic Life	25
2.2.3	Terrestrial Animals and Plants	30
2.2.4	Local Climate	36
2.2.5	Agricultural Ecology and Environment	38
2.2.6	Impact on the Ecology and Environment of the Estuary Area	38
2.2.7	Public Health	40
2.2.8	Social Environment	41
2.2.9	Construction Sites	42
2.2.10	Reservoir Sedimentation and Scouring of Riverbed Downstream	43
2.2.11	Environmental Geology	47
2.3	Major Countermeasures Adopted Since the Start of TGP	49
2.4	Summary	50
3	Eco-Environmental Protection and Monitoring of the Famous Dams in the World	51
3.1	Environmental Protection and Monitoring of the Aswan High Dam in Egypt	51
3.1.1	Aswan High Dam	51
3.1.2	Impact of the Project	54
3.1.3	Protection and Monitoring	54
3.1.4	Causes for Arousing International Concern	59

3.2	Environmental Protection and Monitoring of the Itaipu Dam in Brazil	60
3.2.1	Itaipu Dam in Brazil	60
3.2.2	Environmental Impact of the Dam	60
3.2.3	Monitoring	61
3.2.4	Environment Protection and Improvement Measures.	64
3.3	Environmental Protection and Monitoring of the Glen Canyon Dam in USA.	67
3.3.1	Glen Canyon Dam of USA	67
3.3.2	Project Impact	69
3.3.3	Monitoring	77
3.4	Environmental Protection and Monitoring of the Ertan Project of China . . .	85
3.4.1	Project Impact	86
3.4.2	Monitoring	87
3.4.3	Environmental Protection	87
4	Structure of the TGP Eco-Environmental Monitoring System.	89
4.1	Eco-environmental Monitoring in the Pre-dam Period.	89
4.1.1	Hydrology and Water Quality	89
4.1.2	Pollution Sources Monitoring	91
4.1.3	Climate.	91
4.1.4	Fishery Resource and Environment	91
4.1.5	Water Loss and Soil Erosion	92
4.1.6	Public Health	92
4.1.7	Monitoring of Other Targets Associated with Eco-environment . . .	92
4.1.8	Environmental Monitoring and Research.	92
4.2	Establishment and Improvement of the TGP Eco-environmental Monitoring System.	93
4.2.1	TGP Monitoring System	93
4.2.2	Establishment of the Monitoring System.	94
4.2.3	Adjustment of the Monitoring System	95
4.3	General Structure.	98
4.3.1	Master Design of the System.	98
4.3.2	Monitoring Scope	98
4.3.3	Monitoring Indicator System	102
4.4	Characteristics of the Monitoring System	104
4.4.1	Project-Oriented.	104
4.4.2	Wide Coverage	104
4.4.3	Multiple Monitoring Factors	104
4.4.4	Systematic and Long Term in Nature	109
4.4.5	Involving Multiple Areas, Sectors, Disciplines and Levels.	109
4.4.6	Integration of Monitoring and Experiments/Demonstration	109
4.4.7	Information Management	110
5	Sub-systems of TGP Eco-Environment Monitoring System.	111
5.1	Hydrology and Water Quality Sub-system.	111
5.1.1	Main Synchro-Monitoring Station of Hydrology and Water Quality of the Mainstem	113
5.1.2	Main Monitoring Station of Typical City River Section and Pollution Belt	117
5.1.3	Main Groundwater Monitoring Station (Xiaogang).	119

5.2	Pollution Sources Sub-system	121
5.2.1	Main Monitoring Station of Industrial and Domestic Pollution Sources	121
5.2.2	Main Monitoring Station of Floating Pollution Sources of Vessels.	123
5.2.3	Main Monitoring Station of Non-point Pollution of Pesticide and Fertilizer.	127
5.3	Fish and Aquatic Life Sub-system	128
5.3.1	Fish Resources and Environment Monitoring Leading Stations . . .	130
5.3.2	Main Monitoring Station of Fish and Rare Aquatic Animals	133
5.4	Terrestrial Animal and Plant Sub-system.	135
5.4.1	Monitoring Targets and Requirements	138
5.4.2	Monitoring Units (1996–2003)	138
5.5	Local Climate Sub-system.	139
5.5.1	Regular Monitoring	139
5.5.2	Vertical Climate Monitoring	139
5.5.3	Monitoring Organizations (1996–2003).	141
5.6	Agro-Ecology and Environment Sub-system	145
5.6.1	Monitoring Targets and Requirements	145
5.6.2	Monitoring Organizations (1996–2003).	147
5.7	Estuary Ecology and Environment Sub-system	147
5.7.1	Monitoring Targets and Requirements	148
5.7.2	Monitoring Organizations	150
5.8	People's Health Sub-system	152
5.8.1	Monitoring Targets and Requirements	152
5.8.2	Monitoring Unit (1996–2003)	153
5.9	Sub-system of Socioeconomic Environment for the Reservoir Area	155
5.9.1	Socioenvironment Monitoring Station in the Hubei Reservoir Area	155
5.9.2	Socioenvironment Monitoring Station in the Chongqing Reservoir Area	157
5.10	Remote Sensing Dynamic Monitoring Sub-system	159
5.10.1	Monitoring Targets and Requirements	159
5.10.2	Monitoring Unit (1996–2003)	160
5.11	Ecological and Environment Experimental Station	163
5.11.1	Terrestrial Plant Observation and Experimental Station	163
5.11.2	Endemic Fish Experimental Station	167
5.11.3	Zigui Ecological and Environment Experimental Station	170
5.11.4	Wanzhou Ecological and Environment Experimental Station	173
5.12	Other Ecological and Environment Monitoring Sub-systems	175
5.12.1	Monitoring of the Construction Site	175
5.12.2	Sedimentation and Scouring Observation	176
5.12.3	Induced Earthquake Monitoring	178
5.12.4	Geological Hazards Monitoring	179
6	TGP Eco-environmental Monitoring Information System	183
6.1	Orientation of the Information System	183
6.2	Objectives of the Information System.	183
6.3	Architecture of the Information System.	184
6.3.1	The Middle Layer	184
6.3.2	Database.	185

6.4	Functions of the Information System	188
6.4.1	Functional Modules of the System	188
6.4.2	Data Transmission Sub-system	188
6.4.3	Data Processing Sub-system	188
6.4.4	Information Release Sub-system	192
6.4.5	Query and Analysis Sub-system.	192
6.4.6	Decision Support System	195
6.4.7	System Maintenance and Management	195
7	TGP Ecological and Environmental Impact Monitoring Achievements	
	Before Impoundment	199
7.1	Hydrology and Water Quality Monitoring	199
7.1.1	Yangtze Monitoring Results	199
7.1.2	Pollution Belts Monitoring Results	203
7.1.3	Groundwater (Xiaogang) Monitoring Result	205
7.2	Pollution Sources Monitoring Results	206
7.2.1	Industrial and City Pollution	206
7.2.2	Pollution by Floating Vessels	209
7.2.3	Farm Chemicals and Fertilizer Non-point Pollution	209
7.3	Fish and Other Aquatic Life Monitoring Results	213
7.3.1	Fish Resource and Environment Monitoring	213
7.3.2	Aquatic Animal Mobile Monitoring	215
7.4	Terrestrial Animals and Plants Monitoring Results	220
7.4.1	Terrestrial Plants in the Reservoir Area.	220
7.4.2	Terrestrial Animals in the Reservoir Area	221
7.5	Local Climate Monitoring Results	222
7.5.1	Features of the Local Climate in the Reservoir Area.	222
7.5.2	Principal Meteorological Disasters	225
7.5.3	Vertical Climate Before the Reservoir Impoundment	227
7.6	Agro-Ecology and Environment Monitoring Results.	234
7.6.1	Soil Ecosystem in the Reservoir Area.	234
7.6.2	Dynamic Monitoring of Plant Diseases and Pests.	235
7.6.3	Impact of Eco-Environmental Changes on Orange Belt in the Reservoir Area	238
7.6.4	Dynamic Changes in Rural Energy Demand and Supply.	238
7.6.5	Crop Diversity in the Reservoir Area	239
7.7	Estuary Eco-Environment Monitoring Results	243
7.7.1	Soil Salinization	243
7.7.2	Ecological Environment and Fish Resources	243
7.8	People's Health Monitoring Results	247
7.8.1	Population Life Statistics and Health Resources.	247
7.8.2	Communicable and Endemic Diseases and People's Serology	247
7.8.3	Monitoring of Rodents, Mosquitoes, and Pathogen Carried by Rodents	248

7.9	Socioeconomic Environment Monitoring Results	250
7.9.1	Socioeconomic Environment of Hubei	250
7.9.2	Social Environment in Chongqing	252
7.10	Remote Sensing Dynamic Monitoring Results	254
7.10.1	Time and Space Characters of Land Coverage.	254
7.10.2	Land Cover Dynamic Changes in the Reservoir Area.	256
7.10.3	10-Year Land Use and Land Cover (LULC) Change and Causes	257
7.11	Achievements of Eco-Environmental Experimental Stations.	259
7.11.1	Terrestrial Plant Experimental Stations	259
7.11.2	Endemic Fish Experimental Stations.	262
7.11.3	Zigui Eco-environment Experimental Station.	267
7.11.4	Wanzhou Eco-environmental Station	271
7.12	Construction Site Monitoring Results	274
7.12.1	Water Quality	274
7.12.2	Air Quality	275
7.12.3	Noise	276
7.12.4	Conclusions	277
8	Ecological and Environmental Monitoring After Reservoir Impoundment	279
8.1	Necessity of Updating	279
8.2	Adjustment of the Monitoring Indicator System.	280
8.3	Targets of Monitoring of All Sub-systems After Impoundment	283
8.3.1	Pollution Sources Sub-system	283
8.3.2	Hydro-Environment Sub-system.	287
8.3.3	Aquatic Life Sub-system.	291
8.3.4	Terrestrial Ecology Sub-system	292
8.3.5	Wetland Sub-system.	294
8.3.6	Climate Sub-system (Local Climate).	295
8.3.7	Social Environment Sub-system.	296
8.4	Comprehensive Analysis.	297
8.4.1	Hydro-Environment	297
8.4.2	Biodiversity	299
8.4.3	Socioeconomic Environment	300
8.4.4	Assessment of Ecology and Environment Security	301
8.4.5	Remote Sensing Analysis of the Ecology and Environment.	303
8.4.6	Development Sustainability	304
9	TGP Eco-Environmental Protection Measures	307
9.1	Special Environmental Protection Measures.	307
9.1.1	Adjustment of Resettlement Policies.	307
9.1.2	Water Pollution Control Plan for the Reservoir Area and Upper Reaches of the Yangtze	308
9.1.3	Geological Disaster Prevention and Control Plan and Its Execution.	309
9.1.4	Green Belt Project Around the Reservoir and Its Execution.	310

9.2	Ecological and Environmental Protection Project Covered by the Project Estimates	311
9.2.1	TGP Eco-Environmental Monitoring System	311
9.2.2	Protection of Terrestrial Animals and Plants and Aquatic Life	311
9.2.3	Strengthen TGP Ecological and Environmental Research	315
9.2.4	Environmental Protection in the Construction Site	317
9.3	Eco-Environmental Protection Program Incorporated into the Resettlement Estimates and Its Implementation	318
9.3.1	Environmental Protection in the Resettlement Areas	318
9.3.2	Reservoir Bottom Clearance	318
9.3.3	Protection of Cultural Relics	318
9.4	Supervision and Management of Eco-Environmental Protection	318
9.4.1	Supervision and Management by Environmental Protection Departments	319
9.4.2	Supervision and Management by Industrial Departments	319
	Appendix 1: Organization or Institutions Abbreviation List	323
	Appendix 2: Monitoring Indicators' Abbreviation	325
	Appendix 3: Animal and Plant Names in Latin, English	327
