Part I Fundamentals

| | |
|--|----|
| 1 Introduction | 3 |
| 1.1 Multi-phase Flow and Enhancement of Metallurgical Reactions in Materials Processing | 3 |
| 1.2 Bubble Shape on Related Dimensionless Variables | 9 |
| 1.2.1 Shape of a Single Bubble Rising in a Still Liquid | 9 |
| 1.2.2 Shape of a Bubble Rising in a Bubbling Jet | 10 |
| 1.3 Earlier Works on Gas/Liquid and Immiscible Two Liquid Multi-phase Flows | 11 |
| 1.3.1 Refining Processes | 12 |
| 1.3.2 Casting Processes | 13 |
| 1.4 Some Related Problems on Wettability | 14 |
| 1.5 Historical Progress of Visualization Techniques | 15 |
| References | 15 |
| 2 Fundamentals of Experimental Visualization | 19 |
| 2.1 Generation Method of Bubble and Droplet | 19 |
| 2.1.1 Generation Method of Bubble | 19 |
| 2.1.2 Generation Method of Droplet | 26 |
| 2.2 Experimental Setup | 27 |
| 2.2.1 Design of Nozzle and Its Mount for Visualization | 27 |
| 2.2.2 Setup of Illumination for Visualization | 28 |
| 2.3 Seeding Particle | 28 |
| 2.4 Image Analysis | 29 |
| 2.4.1 Introductory Remarks | 29 |
| 2.4.2 Classification of PIV | 30 |
| 2.4.3 High-Speed Algorithm Based on Binary Cross-Correlation Method | 34 |

| | | |
|--|---|-----------|
| 2.4.4 | Concluding Remarks | 46 |
| | References | 46 |
| Part II Applications—Multi-phase Flow and Its Visualized Examples in Materials Processing | | |
| 3 | Visualization of Flow Induced by Bubble Dispersion | 51 |
| 3.1 | Shape and Size of Bubble Detaching at Single-Hole Nozzle | 51 |
| 3.1.1 | Generation of Bubble at a Single-Hole Nozzle | 51 |
| 3.1.2 | Generation of Bubble at a Wetted Single-Hole Nozzle ($0^\circ \leq \theta < 90^\circ$) | 53 |
| 3.1.3 | Generation of Bubble at a Poorly Wetted Single-Hole Nozzle ($90^\circ \leq \theta \leq 180^\circ$) | 54 |
| 3.2 | Interaction of Bubbles Near a Nozzle | 55 |
| 3.3 | Flow Around Single Rising Bubble | 57 |
| 3.4 | Merging of Two Bubbling Jets | 59 |
| | References | 61 |
| 4 | Jet-Induced Rotary Sloshing in a Cylindrical Container | 63 |
| 4.1 | Fundamentals | 64 |
| 4.1.1 | Fundamental Theory of Rotary Sloshing | 64 |
| 4.1.2 | Characteristics of Jet-Induced Rotary Sloshing | 68 |
| 4.1.3 | Model of Occurrence Condition | 79 |
| | References | 88 |
| 5 | Behavior of a Rising Bubble Through an Oil/Water Interface | 89 |
| 5.1 | Scenario of a Rising Bubble Through Oil/Water Interface | 89 |
| 5.1.1 | Experimental Setup | 90 |
| 5.1.2 | Computational Procedure | 91 |
| 5.1.3 | Results and Discussion | 91 |
| 5.1.4 | Summary | 97 |
| 5.2 | Observation of a Bubble Surface During the Passage of the Bubble Through an Oil/Water Interface | 98 |
| 5.2.1 | Backgrounds | 98 |
| 5.2.2 | High-Speed Photography and Index Matching Visualization | 99 |
| 5.2.3 | Results and Discussion | 100 |
| 5.2.4 | Summary | 105 |
| 5.3 | Influence of Oppositely Charged Oil/water Interface | 107 |
| 5.3.1 | Backgrounds | 107 |
| 5.3.2 | Experimental Setup and Procedure | 108 |
| 5.3.3 | Results and Discussion | 109 |
| 5.3.4 | Summary | 113 |
| 5.4 | Closing Remarks | 113 |
| | References | 114 |

- 6 Continuous Casting of Molten Steel** 117
 - 6.1 Introductory Remarks 117
 - 6.2 Flow in Tundish 119
 - 6.3 Flow in Immersion Nozzle 119
 - 6.4 Mechanism of Mold Powder Entrapment in Mold 120
 - 6.5 Removal of Nonmetallic Inclusions in Immersion Nozzle 134
 - 6.6 Concluding Remarks 135
 - References. 135

- 7 Wettability Problems in Materials Processing** 137
 - 7.1 Wettability and Water-Repellent Material. 137
 - 7.1.1 Young’s Equation and Models of Wenzel
and Cassie–Baxter. 137
 - 7.1.2 Several Topics of Dynamic Contact Angle 144
 - 7.1.3 Microscope Observation of a Droplet Surface
on a Plate by Spray-Coating of a Water-Repellent
Material. 151
 - 7.1.4 Slip Velocity on a Superhydrophobic Wall Surface
in a Laminar Pipe Flow 153
 - 7.2 Water Entry of Hydrophobic Objects 158
 - 7.2.1 Historical Background. 158
 - 7.2.2 Cavity Formation and Equation of Motion for Spheres
Entering into Water. 159
 - 7.2.3 Cavity Dynamics for Hydrophobic Circular Cylinders 162
 - 7.3 A Bouncing Droplet on a Superhydrophobic Surface 174
 - 7.3.1 Bouncing on a Horizontal Solid Surface. 174
 - 7.3.2 Bouncing on an Inclined Solid Surface. 175
 - References. 178

- 8 Miscellaneous Applications** 183
 - 8.1 Behavior of a Bubble Attaching on a Sliding Gate. 183
 - 8.1.1 Introductory Remarks 183
 - 8.1.2 Experiment 184
 - 8.1.3 Classification of Bubble Attachment Patterns 186
 - 8.1.4 Applicability of the Presently Obtained Findings
to Real Immersion Nozzle. 189
 - 8.1.5 Summary. 191
 - 8.2 PIV Measurement on Inner Flow of a Water Droplet Dripping
from a Nozzle. 191
 - 8.2.1 Introductory Remarks 191
 - 8.2.2 Experiment 192
 - 8.2.3 Experimental Results. 195
 - 8.2.4 Summary. 199

- 8.3 Clean Steel Production Through Wettability Effect. 200
 - 8.3.1 Introductory Remarks 200
 - 8.3.2 Removal of Small Bubbles Contained in Molten Metal
Through Wettability Effect 201
 - 8.3.3 Summary. 201
- References. 204
- Appendix A** 207
- Appendix B** 209
