

Contents

1	Fundamentals of Bistatic SAR	1
1.1	Introduction to BiSAR Development	1
1.1.1	History of Theoretical Research	13
1.1.2	Advantages and Application Prospects	16
1.1.3	Challenges in Bistatic SAR	19
1.2	Bistatic SAR Imaging Geometry	22
1.2.1	Imaging Geometry	22
1.2.2	Classification	23
1.3	Two-Dimensional Resolution	24
1.3.1	Concept of Resolution	24
1.3.2	Range Resolution	25
1.3.3	Azimuth Resolution	27
1.3.4	Geometry Perspective	28
1.3.5	Example	29
1.4	Bistatic Radar Equation and Bistatic RCS	30
1.4.1	Bistatic Radar Equation	30
1.4.2	Bistatic RCS	33
1.5	Summary	36
	References	37
2	Fundamentals of Bistatic SAR Imaging Algorithms	41
2.1	Introduction	41
2.2	Two-Dimensional Bistatic Point Target Reference Spectrum	43
2.2.1	Loffeld Bistatic Formula (LBF)	46
2.2.2	Extended Loffeld Bistatic Formula	51
2.2.3	Method of Series Reversion	57
2.2.4	Two-Dimensional Principle of Stationary Phase	60

Appendix A: The Principle of Stationary Phase	68
Appendix B: Series Reversion	69
Appendix C: Two-Dimensional Principle of Stationary Phase.	70
Appendix D: Overview of Weighting Concept	71
References.	74
3 Frequency-Domain Processing for an Azimuth-Invariant	
Configuration.	77
3.1 Introduction	77
3.2 Algorithm Based on LBF.	79
3.2.1 2D Inverse-Scaled FFT	79
3.2.2 Bistatic Chirp-Scaling Algorithm	85
3.3 Bistatic Range-Migration Algorithm.	93
3.4 Algorithm Based on Numeric Transfer Function	98
3.5 Algorithm Based on MSR	103
References.	112
4 Frequency-Domain Processing for Azimuth-Variant Processing	113
4.1 Introduction	113
4.2 Imaging Algorithm for AV Configurations.	114
4.2.1 Range-Doppler Algorithm (RDA).	115
4.2.2 Chirp Scaling Algorithm (CSA)	116
4.2.3 Wavenumber Domain Algorithm (WDA)	120
4.3 Experiment Validation (TerraSAR-X/PAMIR)	126
References.	132
5 Bistatic SAR Motion Compensation.	133
5.1 Introduction	133
5.1.1 History	134
5.1.2 Challenges.	135
5.2 Error Model	136
5.2.1 Attitude Error Analysis	137
5.2.2 Motion Error Analysis.	139
5.3 Motion Compensation Strategies	144
5.3.1 Methods Based on a Single Dominant Scattering Point.	144
5.3.2 Method Based on IMU/GPS	146
References.	154
6 One-Stationary Processing Algorithms	157
6.1 Introduction	157
6.2 Frequency-Domain Algorithm	158
6.2.1 One-Stationary Range-Doppler Algorithm.	161
6.2.2 NLCS Algorithm.	168

6.3	Time-Domain Algorithm	177
6.3.1	Fast Time-Domain Processing.	178
6.4	Modified Bistatic Polar Format Algorithm	185
6.4.1	ST-Mode SS-BiSAR Configuration.	186
6.4.2	Data Synchronization and Tropospheric Delay Correction.	186
6.4.3	Bistatic Focusing Using a Modified PFA	188
6.4.4	Limitation and Solution.	192
6.4.5	Experimental Result	193
	References.	196
7	Synchronization.	199
7.1	Introduction	199
7.2	Time Synchronization Analysis	201
7.2.1	Time Synchronization Analysis.	201
7.2.2	Time Synchronization Strategy	203
7.3	Phase Synchronization Analysis	204
7.4	Inter-satellite Phase Synchronization.	205
7.4.1	Compensation Model of Phase Error.	205
7.4.2	Phase Synchronization Strategy and Error Analysis	208
7.5	Beam Synchronization	213
7.5.1	Design of the Beam Synchronization Model.	214
7.5.2	The Accurate Geometric Model	216
7.5.3	Relation of the Coordinates.	217
7.5.4	Calculation	220
7.6	Spaceborne/Stationary BiSAR Synchronization Case	221
7.6.1	Time Synchronization	223
7.6.2	Phase Synchronization	226
7.6.3	Integrated Process Flow	227
7.6.4	Experimental Results.	229
	References.	232
8	Bistatic InSAR.	235
8.1	InSAR Technique Overview.	235
8.1.1	History of InSAR	236
8.1.2	Spaceborne Synthetic Aperture Radar Interferometry Applications	240
8.2	Synthetic Aperture Radar Interferometry	242
8.2.1	Geometry of InSAR	243
8.2.2	Important Parameters in the InSAR System	246
8.3	Mission Example	249
8.3.1	Introduction.	249
8.3.2	Performance Analysis	249

8.4	Multi-static Multi-baseline Interferometric Experiment	260
8.4.1	Imaging Geometry	261
8.4.2	System Configuration and Baseline Design	261
8.4.3	Imaging Focusing and Interferogram Generation	264
	References	273

Bistatic SAR System and Signal Processing Technology

Wang, R.; Deng, Y.

2018, XIV, 275 p. 123 illus., Hardcover

ISBN: 978-981-10-3077-2
