1	Introduction	1
1.1	Concept of Laser Imaging	1
1.1.1	Origin of Laser Imaging	1
1.1.2	Characteristics of Laser Imaging	3
1.1.3	Types of Laser Imaging	5
1.2	Concept of Target Detection Based on a Laser Imaging System	7
1.2.1	Laser Detection and Laser Imaging	7
1.2.2	Definition of the Target Detection Technology Based on Laser Imaging	8
1.2.3	Characteristics of Target Detection Based on a Laser Imaging System	9
1.3	Principle of the Target Detection Based on a Laser Imaging System	11
1.3.1	Range Equation of Laser Detection	12
1.3.2	Target Sampling of Laser Imaging	15
1.3.3	Information Acquisition and Processing of Target Detection Based on a Laser Imaging System	19
	References	22
2	The Atmospheric and Target Modulations of the Lasers	25
2.1	The Concepts of the Atmospheric and Target Modulations of Lasers	25
2.2	The Atmospheric Modulation of the Lasers	28
2.2.1	The Absorption Characteristics of the Atmosphere for the Lasers	28
2.2.2	The Characteristics of Atmospheric Scattering for the Lasers	31
2.2.3	The Atmospheric Turbulence of Lasers	36

2.3	Target Modulation of Lasers.	42
2.3.1	The Characteristics and Analytical Method of the Target Modulation of Lasers.	42
2.3.2	The Modulation Characteristics of the Laser Echoes Energy	44
2.3.3	The Modulation Characteristics of the Waveform of the Laser Echoes.	53
2.4	Typical Target and Atmospheric Modulations	56
2.4.1	Typical Target Modulation	56
2.4.2	Typical Atmospheric Modulation	61
	References.	63
3	The Target Detection System Based on Laser Imaging	65
3.1	Components of the System	65
3.1.1	Laser Transmitting System	66
3.1.2	Optical Receiving and Detection System.	67
3.1.3	System for Delay Measurement and Echo Acquisition	67
3.1.4	Positioning and Orientation System.	68
3.1.5	Data Processing and Image Generation System.	69
3.1.6	Target Detection and Location System	69
3.1.7	Target Classification and Identification System.	69
3.1.8	Units for Controlling, Monitoring and Recording	70
3.1.9	Photoelectric Transceiving and Calibration System.	70
3.2	Laser Transmitting System	70
3.2.1	Lasers and Laser Trigger Circuits	71
3.2.2	Laser Collimators and Optical Transmitting Systems	73
3.3	Optical Receiving and Detection System	75
3.3.1	Optical Receiving Systems	76
3.3.2	Main Technical Parameters	79
3.3.3	Background Light Suppression	83
3.4	Photoelectric Transceiving and Calibration System.	87
3.4.1	Calibration for Array Transmitting and Receiving Light Path.	87
3.4.2	Calibration for Ranging Precision	89
3.4.3	Calibration of Channel Consistency	94
3.5	POS System	98
3.5.1	Dynamic Differential GPS Positioning System	98
3.5.2	INS-Based Orientation Determination System.	100
3.6	Typical Target Detection Systems Based on Laser Imaging	101
3.6.1	Compositions and Functions of the System.	101
3.6.2	Main Performance Parameters.	103
	References.	103

4	Acquisition of Detection Information	105
4.1	The Target Sampling and Beam Scanning	105
4.1.1	Characteristics of Laser Spot in Emission Sampling	106
4.1.2	The Detection Results Based on Dynamic Beam Scanning	107
4.1.3	Adaptively Variable-Speed Scanning for Target Sampling with Variable Resolutions	111
4.2	The Information Acquisition for the Target Detection Based on a Laser Imaging System	117
4.2.1	The Formation of Transmitting Laser Beam in Array Detections	118
4.2.2	Array Reception and Detection of Laser Echo	125
4.2.3	Amplifying and Processing Laser Echo Signals	131
4.2.4	Waveform Digitization of Laser Echoes	137
4.3	Data Collection for the Detection Based on a Laser Imaging System	140
4.3.1	Discrimination of the Arrival Time of Echo Pulses	141
4.3.2	The High-Resolution Measurement of Time Delay of Multi-channel Echoes	146
4.3.3	The High-Resolution Measurement of the Gray of Multi-Channel Echoes	156
	References	158
5	Detection Data Processing and Image Generation	161
5.1	Processing of Detection Data	161
5.1.1	File Processing	162
5.1.2	Data Processing	164
5.2	Generation of Range Images and Gray Images of Targets	170
5.2.1	Methods for Generating Images	170
5.2.2	Process of Image Generation	172
5.3	Generation of Waveform Images of Targets	176
5.3.1	Expression of the Waveform of Laser Echoes	176
5.3.2	The Data Extraction of Target Waveforms Based on LSM	178
5.3.3	Extraction of Waveform Data Based on EM Algorithm	181
5.4	Generation of Hierarchy Images of Targets	183
5.4.1	Principle of Level Imaging of Targets	184
5.4.2	Processing Multiple Echoes	185
5.4.3	Generation of Hierarchy Images of Targets	190
	References	190
6	Feature Extraction and Processing of Detection Images	191
6.1	Feature Analysis of Laser Images	191

6.1.1	Width Features of Target Echoes	191
6.1.2	Energy Features of Echoes	192
6.1.3	Distribution Characteristics of Waveforms	193
6.1.4	Statistical Characteristics of Waveform Images	197
6.2	Feature Extraction of Laser Images.	199
6.2.1	Extraction of Energy Characteristics Based on Multi-scale Wavelet Transform	200
6.2.2	The Extraction of Waveform Characteristics Through Wavelet Transform Based on WTMMs.	210
6.3	Evaluating the Separability of Characteristics	216
6.3.1	The Measurement of Class Separability	216
6.3.2	Evaluation of Wavelet Characteristics	217
	References.	219
7	The Extraction of the Features of Targets Detected Using a Laser Imaging System.	221
7.1	The Principle of the Extraction of Target Features	221
7.1.1	Extracting Structure Features of Targets Based on the Time Delay and Level of Echoes	222
7.1.2	Extracting Features of Physical Properties of Targets Based on the Echo Energy	224
7.1.3	The Extraction of Comprehensive Features of Targets Based on Echo Waveforms	226
7.2	The Feature Extraction of Ground Targets Based on Echo Waveforms	227
7.2.1	The Model of Laser Echoes Reflected from Ground Targets	229
7.2.2	Parameter Analysis of Ground Targets	231
7.3	Feature Extraction of Aerial Targets Based on Echo Waveforms	233
7.3.1	Expression of Laser Echoes of Aerial Targets.	234
7.3.2	The Model of Extracting the Range Features of Aerial Targets	235
7.3.3	The Model of Extracting the Displacement Features of Aerial Targets	240
7.3.4	The Model of Extracting the Attitude Features of Aerial Targets	244
7.4	The Extraction of Target Features Based on the Reference Echo Pulses	251
7.4.1	Constructing Principle of the Reference Echo Pulse	252
7.4.2	Steps for Constructing the Reference Echo Pulses	253
7.4.3	Features of Reference Echo Pulses	254
	References.	256

8	Target Detection and Location Using a Laser Imaging System	257
8.1	Target Detection Based on Range Images	257
8.1.1	Analyzing Characteristics of Range Images.	257
8.1.2	Range Separation and Layering of Images	259
8.1.3	Target Fitting and Detection	262
8.2	Covered Targets Detection Based on Waveform Images	264
8.2.1	Principles of Target Detection.	265
8.2.2	Laser Echo Model for Hidden Targets	266
8.2.3	The Detecting Algorithm for Hidden Targets	268
8.2.4	Analyzing the Features of Hidden Targets	272
8.2.5	Experiments and Analysis.	278
8.3	Target Location Based on a Laser Imaging System	289
8.3.1	The Principle of Target Location.	289
8.3.2	The Positioning Error	291
	References.	294
9	The Target Classification and Identification for the Target Detection Based on a Laser Imaging System.	297
9.1	Feature Transformation of Detection Images	297
9.2	Target Classification and Identification Based on the Radial Basis Function Neural Network	300
9.2.1	The RBFNN-Based Sorting Algorithm	300
9.2.2	Classification and Identification Methods	301
9.2.3	Experiments and Analysis.	303
9.3	Target Classification and Identification Based on the Support Vector Machine	308
9.3.1	The Principle of the Classification Based on the SVM	308
9.3.2	The Design of Classifiers	311
9.3.3	Experiments and Analysis.	313
	References.	318
10	Analysis of the Errors of the Target Detection Based on a Laser Imaging System	319
10.1	Classification of Error Sources	319
10.2	Data Acquisition Errors	321
10.3	System Errors.	328
10.4	System Integration Errors	331
	References.	333
