

Contents

1	Introduction	1
1.1	Motivation and Objectives	1
1.2	Geological Fractures	2
1.3	Fracture Models and Assumptions	3
1.4	Forward Modeling of the Fracture	5
1.5	AVO Inversion of a Fractured Medium	6
1.6	Outline of This Book	7
1.7	Conclusions	10
	References	10
2	Geological Fractures and Geophysical Assumptions	15
2.1	Rock Deformations	15
2.1.1	Stress Tensor	15
2.1.2	Strain Tensor	16
2.1.3	Stages of the Rock Deformation	19
2.1.4	Stresses and Fractures	21
2.2	Geological Fractures in the Reservoir	22
2.2.1	Fracture Parameters	23
2.2.2	Fracture Detection by Integrated Methods	23
2.2.3	Fracture Delineation by Petrophysical Data	24
2.2.4	Fracture-Induced Anisotropy and Intrinsic Anisotropy	26
2.3	Fracture Related Geophysical Assumptions	29
2.3.1	Backus Average Theory	29
2.3.2	Stress, Strain in the Stratified Layers	30
2.3.3	Stiffness and Compliances of the Fracture	32
2.3.4	Linear Slip Interface and Fracture	33
2.3.5	Schoenberg-Muir Calculus Theory	34
2.3.6	Horizontally Fractured Medium Moduli (VTI)	35
2.3.7	Vertically Fractured Medium Moduli (HTI)	38
2.3.8	Orthogonally Fractured Medium Moduli (VTI + HTI)	41

2.4	Boundary Conditions	44
2.4.1	Perfectly Welded Contact Interface	45
2.4.2	Imperfectly Welded (Nonwelded) Contact Interface	47
2.5	Conclusions	51
	References.	53
3	Seismic Forward Modeling of Fractures	57
3.1	Finite-Difference Forward Modeling Formulation Approaches	57
3.2	Fictitious Grid and the Real Grid Points.	58
3.3	Finite-Difference Scheme for Horizontally Fractured Medium	60
3.3.1	Boundary Conditions	60
3.3.2	Fictitious Displacement Formulas	62
3.3.3	Equation of Motion.	66
3.4	Finite-Difference Scheme for Vertically Fractured Medium	68
3.4.1	Boundary Conditions	68
3.4.2	Fictitious Displacement Formulas	71
3.4.3	Equation of Motion	73
3.5	Finite-Difference Scheme for Orthogonally Fractured Medium.	74
3.5.1	Boundary Conditions and Fictitious Displacement Formulas	74
3.5.2	Equation of Motion	76
3.6	Numerical Applications and Discussions	77
3.6.1	Implementation of Seismic Source	78
3.6.2	Stability Condition	78
3.6.3	Model Parameters	80
3.6.4	Horizontal Fracture Model	80
3.6.5	Vertical Fracture Model	86
3.6.6	Orthorhombic Fracture Model	89
3.7	Conclusions	91
	References.	93
4	Fractured Medium AVO Inversion	95
4.1	Approximations of the Zoeppritz Equations	95
4.2	Data Preconditioning for AVO/AVAZ Inversion	97
4.2.1	Deconvolution.	97
4.2.2	Noise Attenuation	98
4.2.3	5D Interpolation	99
4.2.4	PS-Data Layer Stripping	100
4.3	AVO Equations for Fractured Media	105
4.3.1	Exact Reflectivity Equations for Horizontally Fractured Media	106
4.3.2	Approximate AVO Equations for Horizontally Fractured Media	108
4.4	AVO Inversion Algorithm for the Fractured Medium.	112

4.5	Numerical Applications	114
4.5.1	Initial Model	114
4.5.2	Data Preconditioning	115
4.5.3	Preparation of Input Data	116
4.5.4	Results Analysis	117
4.6	Conclusions	119
	References.	121
5	Conclusions and Future Work	123
5.1	Summary	123
5.2	Future Work	127
5.3	Conclusions	127
	References.	127
	Appendix A: Moduli Calculation for Fractured Media	129
	Appendix B: Numerical Operators	137
	Appendix C: PP Reflection Coefficients for the Fractured Medium	141
	Index	149

Seismic Forward Modeling of Fractures and Fractured
Medium Inversion

Cui, X.; Lines, L.; Krebs, E.S.; Peng, S.

2018, XXVII, 153 p. 56 illus., 32 illus. in color., Hardcover

ISBN: 978-981-10-3583-8
