

Preface

The Fifth International Conference on Innovations in Electronics and Communication Engineering (ICIECE 2016) by Department of Electronics and Communication Engineering, Guru Nanak Institutions Technical Campus, was conducted in association with Defense Research and Development Organization and Department of Science Technology on July 8 and 9, 2016. The conference has grown exponentially over the years and has become a platform for scientists, researchers, academicians, and students to present their ideas and share their cutting-edge research in various fields of electronics and communication engineering. The focus for this year conference was “Smart Cities” and we had distinguished speakers from India and abroad who shared innovative solutions and technologies.

Over 290 papers were received of which 100 papers have been selected for Springer Conference Proceedings publication. The papers selected were presented by the authors during the conference. Parallel sessions were conducted to accommodate all the authors and to give them ample time to discuss their ideas. We were happy to note that all the authors were happy with the arrangements and encouraged us to conduct such conferences in the future as well.

We would like to thank all the participants, speakers, session chairs, committee members, reviewers, international and national board members, Guru Nanak Institutions Management, and all the people who have directly or indirectly contributed to the success of this conference. The editors would also like to thank Springer Editorial Team for their support and for publishing the papers in “Lecture Notes in Networks and Systems” series.
