1	Introduction	1
1.1	Research Background	1
1.2	Objectives and Significances	3
1.3	Literature Review	4
1.3.1	Rheological Properties	5
1.3.2	Microstructure of Fresh Cement Pastes	17
1.3.3	Working Mechanism of Chemical Admixtures	19
1.3.4	Pore Structure and Impermeability of Hardened Cement Pastes	25
1.4	Summary	27
	References	28
2	Methodology	37
2.1	Raw Materials	37
2.1.1	Cement	37
2.1.2	Superplasticizers	37
2.1.3	Polymer Latexes	39
2.1.4	Asphalt Emulsions	40
2.1.5	Organic Monomers, Homo-polymers and Co-polymers	40
2.1.6	Antifoaming Agent	43
2.1.7	Sand	43
2.1.8	Deionized Water	43
2.2	Characterization of the Synthesized Polymers	43
2.2.1	Size Exclusion Chromatography (SEC)	43
2.2.2	Purification of the Synthesized Polymers	44
2.2.3	Fourier Transform Infrared Spectrum (FTIR)	45
2.3	Specimens Preparation	46
2.3.1	Fresh Cement Pastes with the Three Types of Chemical Admixtures	46

2.3.2	Fresh Cement Pastes with the Organic Monomers and the Polymers.	49
2.3.3	Hardened Cement Pastes and Mortars with the Three Types of Chemical Admixtures.	49
2.4	Testing Methods.	51
2.4.1	Fluidity Measurement	51
2.4.2	Rheological Properties.	52
2.4.3	Viscoelastic Properties.	53
2.4.4	Microstructure Examination.	54
2.4.5	Adsorption Amount.	57
2.4.6	Precipitation Measurement.	57
2.4.7	Particle Size and Zeta Potential	58
2.4.8	Cement Hydration	59
2.4.9	Mercury Intrusion Porosimetry (MIP)	60
2.4.10	Alternating Current (AC) Impedance.	61
	References.	61
3	Rheological Properties of Fresh Cement Pastes	63
3.1	Cement-Superplasticizer-Water System.	63
3.1.1	Fluidity	64
3.1.2	Yield Stress and Plastic Viscosity	73
3.1.3	Viscoelastic Properties.	76
3.2	Cement-Latex-Water System	89
3.2.1	Initial Fluidity	89
3.2.2	Fluidity Retention	92
3.3	Cement-Asphalt-Water System	94
3.3.1	Fluidity	95
3.3.2	Yield Stress.	100
3.4	Summary	103
	References.	105
4	Mesostructure of Fresh Cement Pastes	109
4.1	Theoretical Background	110
4.2	Organization of Cement Grains in Various Dispersion Media	111
4.2.1	Cement-Air (C-A) System.	111
4.2.2	Cement-Ethanol (C-E) System and Cement-Water (C-W) System	111
4.2.3	C-EW System and C-E + C-W System.	115
4.3	Influences of Superplasticizers on the Mesostructure of FCPs	118
4.3.1	Morphologi G3 Optical Microscope	118
4.3.2	ESEM	122
4.3.3	Correlation of Mesostructure with Rheological Behaviors	122
4.4	Influences of Polyacrylate Latexes on the Mesostructure of FCPs	124

4.4.1	Morphologi G3 Optical Microscope	125
4.4.2	ESEM	127
4.5	Influences of Asphalt Emulsion on the Mesostructure of FCPs	128
4.5.1	Morphologi G3 Optical Microscope	128
4.5.2	ESEM	129
4.5.3	3-D Laser Scanning Microscope	129
4.6	Summary	131
	References.	135
5	Mechanism of Chemical Admixtures: Adsorption, Hydration and Rheology	137
5.1	Influences of Organic Monomers and Homo-polymers.	138
5.1.1	Adsorption Behavior	138
5.1.2	Effects on Cement Hydration.	142
5.2	Influences of Comb-Shaped Co-polymers on Adsorption and Hydration	145
5.2.1	Characterization of the Synthesized Co-polymers	145
5.2.2	Co-polymers with Positive Charges and Negative Charges (PAM)	148
5.2.3	Co-polymers with Carboxyl and Sulfonic Groups (PAS)	151
5.3	Cement-Superplasticizer-Water System.	153
5.3.1	Adsorption Behavior	153
5.3.2	Correlation of Adsorption Behavior with Initial Fluidity	159
5.3.3	Effect on Cement Hydration	161
5.3.4	Correlation of Adsorption Behavior with Cement Hydration	166
5.3.5	Correlation of Cement Hydration with Fluidity Retention.	168
5.4	Cement-Latex-Water System	168
5.4.1	Correlation of Adsorption and Initial Fluidity	169
5.4.2	Correlation Between Cement Hydration and Fluidity Retention.	170
5.5	Cement-Asphalt-Water System	172
5.5.1	Correlation Between Adsorption and Initial Fluidity	172
5.5.2	Correlation Between Cement Hydration and Fluidity Retention.	172
5.6	Summary	174
	References.	176

6	Microstructure Model and Rheological Model of Fresh Cement Pastes	179
6.1	Microstructure Model of Fresh Cement Pastes	180
6.1.1	Cement-Water System	180
6.1.2	Cement-Superplasticizer-Water System	180
6.1.3	Cement-Latex/Asphalt-Water System	190
6.2	Rheological Evolution Model of Fresh Cement Pastes	193
6.2.1	Cement-Superplasticizer-Water System	193
6.2.2	Cement-Asphalt-Water System	198
6.3	Rheological Models of Fresh Cement Pastes	199
6.3.1	Yield Stress	199
6.4	Summary	203
