

Contents

1	Introduction	1
1.1	Background	2
1.1.1	Space Radiation Environment and Radiation Effect	2
1.1.2	Development and Application of SiGe HBT Technology	5
1.2	Radiation Effect and Compact Model of SiGe HBT	7
1.2.1	Radiation Effect of SiGe HBT	7
1.2.2	Compact Model of SiGe HBT	12
1.3	Research Work in This Dissertation	14
	References	16
2	Ionization Damage Effect in SiGe HBT	25
2.1	Interaction Mechanism Between Gamma Rays and Materials	25
2.2	Experiment	26
2.3	Results and Discussion	28
2.3.1	SiGe HBT1 with Emitter and Substrate Connecting Together	28
2.3.2	Ionization Damage in SiGe HBTs with Backside Collector Electrode	34
2.3.3	Degradation Mechanism in Gamma Ray Irradiated SiGe HBTs	38
2.4	Ionization Damage in SiGe HBT at Different Dose Rate	42
2.4.1	Results of Ionization Damage at Different Dose Rate	43
2.4.2	Mechanism of Enhanced Low-Dose-Rate Sensitivity	45
2.5	Bias Dependence of Ionization Damage in SiGe HBT	48
2.5.1	Irradiation Under High-Dose Rate	49
2.5.2	Irradiation Under High-Dose Rate	51
2.6	Conclusion	54
	References	55

3 Displacement Effects in SiGe HBT	57
3.1 Interaction Mechanism Between Swift Heavy Ion and Materials	57
3.2 Experiment	58
3.3 Irradiation Effects of 25 MeV Silicon Ions	60
3.3.1 Sige HBT1 with Emitter and Substrate Connecting Together	60
3.3.2 Performance Degradation of SiGe HBT2	63
3.3.3 Physical Mechanism Analysis for Heavy Ion Radiation	67
3.4 Degradation Difference for Forward and Reverse Current Gain	73
3.4.1 Experimental Result	73
3.4.2 Mechanism Analysis and Discussion	77
3.5 Comparison of Different Heavy Ion Radiation	80
3.5.1 Experimental Samples and Methods	80
3.5.2 Experimental Results Analysis and Discussion	81
3.6 Effect of Bias Conditions	88
3.7 Conclusion	90
References	91
4 Single Event Transients in SiGe HBT	93
4.1 Mechanism of Single Event Effects	93
4.2 Experiment	94
4.3 Results and Discussion	96
4.3.1 Effects of Laser Energy	96
4.3.2 Effects of Load Resistance	100
4.3.3 Effects of Bias Condition	102
4.4 Simulation of Single Event Transient in SiGe HBT	107
4.4.1 Electric Potential and Electric Field	109
4.4.2 Location Sensitivity Analysis of Single Event Transient	112
4.5 Conclusion	115
References	115
5 Small-Signal Equivalent Circuit for SiGe HBT Based on Distributed Network	117
5.1 Significance of SiGe HBT Distributed Equivalent Circuit	117
5.2 Establishment of Small-Signal Model	118
5.2.1 Link Base Region (Region I)	119
5.2.2 Intrinsic Transistor (Region II)	123
5.2.3 Extrinsic Base Region (Region III)	127
5.2.4 Equivalent Circuit for the Whole Transistor	128
5.3 Approximation and Simplification of Proposed Model	128

5.4	Conclusion	131
	References.	132
6	Parameter Extraction of SiGe HBTs	133
6.1	Small-Signal Model Parameter Extraction.	134
6.1.1	Parameter Extraction Under Off-State	134
6.1.2	Parameter Extraction Under Forward-Active Mode.	142
6.2	Parameter Extraction Under Irradiation Environment	149
6.3	Temperature Characteristics of Model Parameter	153
6.3.1	Parameter Extraction Under High and Low Temperature	155
6.3.2	Temperature Dependence Model	157
6.4	Summary	162
	References.	162
7	Summary	165
7.1	Main Work and Research Results.	165
7.2	Innovations.	167
7.3	Suggestions for Further Work.	168

Research on the Radiation Effects and Compact Model
of SiGe HBT
