

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
<b>2</b>	<b>Literature Survey</b>	<b>5</b>
2.1	Structure of an Electrical Power System	5
2.2	Power System Stability	5
2.3	Why Power System Instability Situations Occur?	6
2.4	Disturbances	7
2.4.1	Effects of the Disturbances on the Power System	8
2.5	Reliability of a Power System	10
2.6	Quality of a Power System	10
2.6.1	Addressing Instability Situations Due to Perturbations in the Power System	10
2.6.2	Classification of Power System Dynamics	11
2.7	Process for Generation-Load Balance	14
2.7.1	Primary Control (Is by Governors)	15
2.7.2	Secondary Control (Is by Automatic Generation Controls)	17
2.7.3	Tertiary Control	21
2.7.4	Time Control	23
2.8	Under-Frequency Load Shedding	25
<b>3</b>	<b>Modelling the Power System</b>	<b>31</b>
3.1	Power System Components	32
3.2	Configuring Power System Components/Mathematical Modeling	32
3.2.1	Transmission Lines	34
3.2.2	Under-Ground Cables	36
3.2.3	Transformers	42
3.2.4	Generators	47
3.2.5	Exciters	59

3.2.6	Turbines . . . . .	64
3.2.7	Governors . . . . .	71
3.3	Control System of the Overall Power System . . . . .	78
3.3.1	LS Logic1 Control System Module. . . . .	78
3.3.2	U_Frequency Control System Module. . . . .	86
3.3.3	Add_Ld Control System Module . . . . .	86
3.4	Verifying the Simulation Model Performance . . . . .	87
3.4.1	Steady State Operation . . . . .	87
3.4.2	Generator Tripping/Sudden Generation Deficit Situation . . . . .	90
<b>4</b>	<b>Designing the Load Shedding Scheme . . . . .</b>	<b>97</b>
4.1	Overview of the Power System of Sri Lanka . . . . .	97
4.2	Identification of Parameters . . . . .	97
4.2.1	Power System Regulations and Practice of Sri Lanka . . . . .	98
4.2.2	Identifying Settling Frequency . . . . .	99
4.2.3	Deciding the Number of Steps in the Load Shedding Scheme . . . . .	99
4.2.4	First Step of Load Shedding Scheme . . . . .	100
4.2.5	Identifying When to Implement Load Shedding Based on Rate of Change of Frequency (ROCOF). . . . .	100
4.2.6	Delay Time . . . . .	101
4.3	Ahsans' Scheme as a Pilot Model [56] . . . . .	104
4.4	Proposed Methodology . . . . .	107
4.4.1	Load Shedding Scheme-I (Based on Prevailing Facilities Available with the CEB) . . . . .	107
4.4.2	Load Shedding Scheme-II (Based on Disintegration of the Power System). . . . .	111
<b>5</b>	<b>Results and Discussion . . . . .</b>	<b>121</b>
5.1	Discussion: Load Shedding Scheme-I with Generation Deficit of 829.6 MW . . . . .	121
5.2	Discussion: Load Shedding Scheme-II with Generation Deficit of 495.14 MW . . . . .	123
5.2.1	Performance of the National Grid . . . . .	124
5.2.2	Performance of Island Rantembe . . . . .	126
5.2.3	Performance of Island Matugama . . . . .	130
5.2.4	Performance of Island Embilipitiya . . . . .	135
5.2.5	Performance of Island Kiribathkumbura . . . . .	139
5.3	Performance Comparison on Selected Load Shedding Schemes (LSS). . . . .	145
<b>6</b>	<b>Conclusion . . . . .</b>	<b>155</b>

**Appendix A: Transmission Lines** . . . . . 159

**Appendix B: Composite Loads** . . . . . 163

**Appendix C: Generation Characteristic** . . . . . 165

**Appendix D** . . . . . 171

**References** . . . . . 173

Modeling, Simulation, and Control of a Medium-Scale  
Power System

Bambaravanage, T.; Rodrigo, A.; Kumarawadu, S.

2018, XXVI, 175 p. 129 illus., 81 illus. in color.,

Hardcover
