

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Background	1
1.2	Description of Nonlinear Time-Delay Systems	3
1.2.1	Quasi Nonlinear Time-Delay Systems	3
1.2.2	Pure Nonlinear Time-Delay Systems	4
1.2.3	Interconnected Nonlinear Time-Delay Systems	5
1.3	Problems Studied in This Book	6
1.3.1	High-Order Polynomial Uncertainties	6
1.3.2	General Uncertainties	7
1.3.3	Nonlinear Input	7
1.3.4	System with Lower Triangular Structure	8
1.4	Summary	9
 <b>Part I High-Order Polynomial Nonlinear Uncertainties</b>		
<b>2</b>	<b>Robust Stabilization of Single Nonlinear Time-Delay System</b>	<b>13</b>
2.1	Introduction	13
2.2	System Formulation and Preliminaries	14
2.3	Adaptive Robust State Feedback Controller	16
2.4	Novel Nonlinear Feedback Controller	19
2.5	Simulations	22
2.6	Conclusion	26
<b>3</b>	<b>Robust Model Reference Adaptive Control for Interconnected Time-Delay Systems</b>	<b>27</b>
3.1	Introduction	27
3.2	System Formulation and Preliminaries	28
3.3	Main Results	30
3.4	Numerical Example	35
3.5	Conclusion	39

## Part II General Nonlinear Uncertainties

<b>4</b>	<b>Decentralized Adaptive Control for Interconnected Time-Delay Systems</b>	<b>43</b>
4.1	Introduction	43
4.2	System Formulation and Preliminaries	44
4.3	Decentralized Feedback Control	46
4.4	Application to Decentralized Control for a Class of Interconnected Systems	50
4.5	Illustrative Examples	54
4.6	Conclusion	59
<b>5</b>	<b>Memoryless State Feedback Control for Uncertain Nonlinear Time-Delay System</b>	<b>61</b>
5.1	Introduction	61
5.2	System Description	62
5.3	Controller Design	63
5.4	Simulation Example	71
5.5	Conclusion	73
<b>6</b>	<b>Exponential Stabilization for Interconnected Time-Delay Systems</b>	<b>75</b>
6.1	Introduction	75
6.2	System Formulation and Preliminaries	76
6.3	Controller Design	78
6.4	Numerical Example	88
6.5	Conclusion	90
<b>7</b>	<b>Robust Adaptive Control for Time-Delay System via T-S Fuzzy Approach</b>	<b>93</b>
7.1	Introduction	93
7.2	System Formulation and Assumptions	94
7.3	Virtual Control Design	98
7.4	Controller Design	101
7.5	Simulation	107
7.6	Conclusion	112

## Part III Nonlinear Input

<b>8</b>	<b>Adaptive Tracking of Time-Delay System with Unknown Dead-Zone Input</b>	<b>115</b>
8.1	Introduction	115
8.2	System Description	116
8.3	Controller Design	118
8.4	Simulation Examples	125
8.5	Conclusion	128

<b>9</b>	<b>Decentralized Fuzzy Networked Control Systems Design with Sector Input.</b>	129
9.1	Introduction	129
9.2	System Formulation and Assumptions	130
9.3	Virtual Control Design	133
9.4	Controller Design	136
9.4.1	Parameters Known Case	137
9.4.2	Parameters Unknown Case	144
9.5	Simulations	147
9.6	Conclusion	155
 <b>Part IV Time-Delay System with Lower Triangular Structure</b>		
<b>10</b>	<b>Robust Control for a Class of Time-Delay System via Razumikhin Lemma</b>	159
10.1	Introduction	159
10.2	Problem Formulation and Preliminaries	160
10.3	Main Results	162
10.4	Conclusion	171
<b>11</b>	<b>Backstepping Control for Nonlinear Time-Delay System via L-K Function</b>	173
11.1	Introduction	173
11.2	System Description and Preliminaries	174
11.3	Controller Design for the Second-Order System	176
11.4	Extension to the $n$ th-Order System	180
11.5	Application to Chemical Reactor Systems	185
11.6	Simulations	187
11.7	Conclusion	191
<b>12</b>	<b>NN-Based Output Feedback Tracking of Nonlinear Time-Delay System</b>	193
12.1	Introduction	193
12.2	System Formulation and Some Assumptions	194
12.3	Preliminary Knowledge	197
12.4	Observer Design	198
12.5	Controller Design	200
12.6	Choosing Proper Functions	208
12.7	Simulation Example	211
12.8	Conclusion	214
<b>13</b>	<b>Output Feedback Stabilization for Interconnected Time-Delay Systems</b>	215
13.1	Introduction	215
13.2	System Formulation	216

13.3	Robust Controller Design . . . . .	220
13.3.1	Observer Design . . . . .	220
13.3.2	Controller Design . . . . .	222
13.4	Adaptive Neural Network Control . . . . .	232
13.5	Simulation Investigation . . . . .	240
13.6	Conclusion . . . . .	246
<b>14</b>	<b>Robust Control of Time-Delay System with Unknown Control</b>	
	<b>Direction . . . . .</b>	247
14.1	Introduction . . . . .	247
14.2	Problem Formulation . . . . .	248
14.3	Preliminaries . . . . .	249
14.4	Observer Design . . . . .	251
14.5	Controller Design: Known Bound Functions . . . . .	253
14.6	Controller Design: Unknown Bound Functions . . . . .	260
14.7	Simulation Example . . . . .	264
14.8	Conclusion . . . . .	270
<b>15</b>	<b>Decentralized Prescribed Performance Tracking of Stochastic Time-Delay System . . . . .</b>	271
15.1	Introduction . . . . .	271
15.2	System Formulation and Preliminaries . . . . .	272
15.2.1	Problem Formulation . . . . .	272
15.2.2	Basic Knowledge on Stochastic System . . . . .	275
15.3	Controller Design . . . . .	276
15.3.1	Reduced-Order Observer Design . . . . .	276
15.3.2	Prescribed Performance Transformation . . . . .	278
15.3.3	Adaptive Neural Network Controller Design . . . . .	278
15.4	Simulation Example . . . . .	287
15.5	Conclusion . . . . .	290
	<b>References . . . . .</b>	291

Robust Control for Nonlinear Time-Delay Systems

Hua, C.; Zhang, L.; Guan, X.

2018, XII, 300 p. 67 illus., 22 illus. in color., Hardcover

ISBN: 978-981-10-5130-2
