

Contents

1	Introduction	1
2	Fundamentals	5
2.1	Research Scenario	5
2.2	Human Speech	7
2.2.1	Production	7
2.2.2	Transmission	9
2.2.3	Perception	12
2.3	Quality of Transmitted Speech	14
2.3.1	Definition of Perceived Quality	14
2.3.2	Quality Features and Quality Elements	18
2.3.3	Perceptual Quality Space and the Concept of Diagnosing Speech Quality	19
2.3.4	Assessment Methods	23
2.4	Conclusion	31
3	Speech Quality in a Telephone Conversation	33
3.1	Phases of a Conversation	33
3.2	Quality Elements	35
3.2.1	User Terminal	36
3.2.2	Sidetone	37
3.2.3	Analog to Digital Converter	37
3.2.4	Gain Control	37
3.2.5	Voice Activity Detection	38
3.2.6	Noise	38
3.2.7	Echo	39
3.2.8	Speech Codec	39
3.2.9	Packet-Loss	40
3.2.10	Delay	41
3.3	The Listening Phase	41

3.3.1	Perceptual Quality Space	42
3.3.2	Subjective Methods	45
3.3.3	Instrumental Methods	48
3.4	The Speaking Phase	50
3.4.1	Perceptual Quality Space	51
3.4.2	Subjective Methods	52
3.4.3	Instrumental Methods	53
3.5	The Interaction Phase	54
3.5.1	Perceptual Quality Space	56
3.5.2	Subjective Methods	58
3.5.3	Instrumental Methods	61
3.5.4	Conversational Parameters	64
3.6	Conclusion and Research Topics Covered in This Book	64
4	Perceptual Quality Space in a Telephone Conversation	67
4.1	Introduction	67
4.2	Experimental Paradigms to Analyze the Perceptual Quality Space	67
4.2.1	Multidimensional Scaling	68
4.2.2	Semantic Differential	69
4.3	Uncovering the Perceptual Quality Space in the Speaking Phase	70
4.3.1	Technical Setup	70
4.3.2	Test Design	71
4.3.3	SD Experiment	71
4.3.4	Results	72
4.3.5	MDS Experiment	74
4.3.6	Results	75
4.3.7	Discussion	77
4.4	Uncovering the Perceptual Quality Space in the Interaction Phase	78
4.4.1	Technical Setup	78
4.4.2	Test Design	78
4.4.3	SD Experiment	79
4.4.4	Results	80
4.4.5	MDS Experiment	81
4.4.6	Results	81
4.4.7	Discussion	82
4.5	Conclusion	83

5	Direct Scaling of Perceptual Dimensions in a Conversational Situation	85
5.1	Introduction and Scope	85
5.2	Rating Scales	87
5.3	Test Procedure	88
5.3.1	General	88
5.3.2	Dimension Rating Scheme	90
5.3.3	Reference Conditions	91
5.3.4	Test Duration	92
5.4	Setup	94
5.4.1	Test Rooms and Test Subjects	94
5.4.2	Introduction and Training	94
5.5	Conclusion	96
6	Conversational Validation Experiments	97
6.1	Introduction	97
6.2	Validation of the Perceptual Quality Space	98
6.2.1	Test Design	98
6.2.2	Results	100
6.2.3	Discussion	104
6.3	Validation of the Direct Scaling Test Method	105
6.3.1	Test Design	105
6.3.2	Results	106
6.3.3	Discussion and Conclusion	120
6.4	Comparison of the Two Validation Experiments	121
6.5	Conclusion	123
7	Resulting Quality Profile in a Telephone Conversation	125
7.1	Introduction	125
7.2	Relation Between the Dimension Scores and the Overall Conversational Quality	127
7.3	Relation Between the Dimension Scores and the Quality of Individual Phases	130
7.4	Relation Between the Overall Conversational Quality and the Quality of Individual Phases	134
7.5	Conclusion	137
8	Instrumental Diagnostic Conversational Quality Modeling	139
8.1	Introduction	139
8.2	General Approach	140
8.3	Modeling Perceptual Dimension Scores of the Listening Phase	141
8.4	Modeling Perceptual Dimension Scores of the Speaking Phase	147

8.5	Modeling Perceptual Dimension Scores of the Interaction Phase	153
8.6	Modeling the Overall Conversational Quality	156
8.7	Conclusion	158
9	Conclusions and Future Work	161
	Appendix A: Short Conversation Test (SCT)	167
	Appendix B: Random Number Verification Task (RNVT)	169
	Appendix C: Test Instructions	171
	References	177

Multidimensional Analysis of Conversational Telephone
Speech

Köster, F.

2018, XIII, 184 p. 60 illus., Hardcover

ISBN: 978-981-10-5223-1
