

Contents

Part I Background and Fundamental

1	Introduction	3
1.1	Background and Motivation	3
1.1.1	Classification of Forging Forming	4
1.1.2	Characteristics of Forging System	5
1.1.3	Complexity of Forging Process and Unsolved Problems	8
1.2	Objectives of the Book	16
1.3	Contribution and Organization of the Book	17
	References	20

Part II Modeling of Forging Loads and Processes

2	Process/Shape-Decomposition Modeling for Deformation Force Estimation	29
2.1	Introduction	29
2.2	Process/Shape-Decomposition Modeling Method	31
2.2.1	Process/Shape-Decomposition and Sub-process Modeling	33
2.2.2	Global Deformation Force Model and Modeling Performance Analysis	39
2.3	Model Analysis and Verification	41
2.3.1	Simulation Verification	41
2.3.2	Experiment Verification	45
2.4	Conclusion	48
	References	48
3	Distribution Modeling of Batch Forging Processes	51
3.1	Introduction	51
3.2	Problem Description and Review of Extreme Learning Machine	53

3.2.1	Problem Description	53
3.2.2	Review of Extreme Learning Machine	54
3.3	Online Probabilistic ELM for Distribution Modeling	56
3.3.1	Probabilistic ELM	56
3.3.2	Model Update Strategy	61
3.3.3	Reliability Measure	62
3.3.4	Modeling Procedure	62
3.4	Model Analysis and Verification	63
3.4.1	Model Verification Using Free Forging	63
3.4.2	Model Verification Using Open Die Forging	66
3.4.3	Performance Comparison	70
3.5	Conclusion	71
	References	72
4	Multi-level Parameter Identification Approach	75
4.1	Introduction	75
4.2	Problem Description	76
4.3	Multi-level Modeling and Parameter Identification Method	77
4.3.1	Model of the Deformation Process	79
4.3.2	Parameter Identification	82
4.4	Verification of Both Simulation and Experiment	85
4.5	Conclusion	92
	References	93
5	Novel LS-SVM Modeling Method for Forging Processes with Multiple Localized Solutions	95
5.1	Introduction	95
5.2	Process Description and Modeling Problem	96
5.3	Novel LS-SVM Modeling Method	98
5.3.1	Region Decomposition and Local LS-SVM Model	100
5.3.2	Global Regularization and Model Optimization	100
5.3.3	Summary	103
5.4	Experiment Studies	103
5.5	Conclusion	107
	References	107
6	Forging Process Modeling via Multi-experiment Data	111
6.1	Introduction	111
6.2	Problem Description	112
6.3	Modeling Method	113
6.3.1	Data Collection	114
6.3.2	SVD-Based Separation Method and Model Reduction	115
6.3.3	Neural Network Modeling	117
6.3.4	Model Reconstruction	118

6.4	Experiment Verification	118
6.5	Conclusion	123
	References	123
7	Online Modeling Approach for Time-Varying Forging Processes	125
7.1	Introduction	125
7.2	Online Modeling Method	127
7.2.1	Construction of Model Set	128
7.2.2	Parameter Identification	129
7.2.3	Error Minimization Based Model Match Method	129
7.2.4	Update of Model Set	130
7.2.5	Modeling Procedure	130
7.3	Case Studies	131
7.4	Conclusion	137
	References	138
 Part III Dynamic Analysis of Forging Processes		
8	Model-Based Estimation and Prediction of System Dynamics	143
8.1	Introduction	143
8.2	Modeling of Forging Process and Its Solving Process	145
8.2.1	Modeling of Forging Process	145
8.2.2	Solving Process	146
8.3	Dynamic Analysis Under Linear Pressure	150
8.3.1	Condition of Stable Run	151
8.3.2	Conditions of Velocity Vibration and Creep	152
8.4	Dynamic Analysis Under Nonlinear Pressure	153
8.5	Verification	156
8.5.1	Model Verification	156
8.5.2	Simulation Verification of Run Conditions	156
8.5.3	Experiment Verification of Run Conditions	162
8.6	Conclusion	165
	References	165
9	Dynamic Analysis of Closed-Loop Forging System	167
9.1	Introduction	167
9.2	Modeling of Closed-Loop Forging Process and Its Solving Method	169
9.2.1	Modeling of Closed-Loop Forging Process	169
9.2.2	Solving Method	171
9.3	Dynamic Characteristics of Closed-Loop Forging System	174

9.3.1	Stability Condition and Stability Domain	174
9.3.2	Velocity Vibration Condition	175
9.3.3	Flow Limitation Condition	176
9.4	Feasible Domain of Controller Parameters	177
9.5	Case Studies	178
9.5.1	Feasible Domain of Control Parameters	179
9.5.2	Simulation Verification of Control Performance	179
9.5.3	Experiment Verification of Control Performance	182
9.6	Conclusion	184
	References	186

Part IV Intelligent Control of Complex Forging Processes

10	System-Decomposition Based Multi-level Control Approach	191
10.1	Introduction	191
10.2	Problem Description	192
10.3	System Decomposition Based Multi-level Control Method	196
10.3.1	System Decomposition	198
10.3.2	Design of Level-One Control	198
10.3.3	Design of Level-Two Control	201
10.4	Case Studies	202
10.5	Conclusion	205
	References	208
11	Intelligent Integration Control for Time-Varying Forging Processes	211
11.1	Introduction	211
11.2	Problem Description	212
11.3	Intelligent Integration Control	213
11.4	Case Studies	218
11.5	Conclusion	223
	References	223
12	Conclusion and Challenge	225
12.1	Summary and Conclusion	225
12.2	Challenge	227

Modeling, Analysis and Control of Hydraulic Actuator for
Forging

Lu, X.; Huang, M.

2018, X, 228 p. 115 illus., 93 illus. in color., Hardcover

ISBN: 978-981-10-5582-9
