

Contents

1	Introduction	1
2	LabVIEW Programming	3
2.1	Basic Concepts	3
2.1.1	Virtual Instruments (VI)	3
2.1.2	Front Panel	4
2.1.3	Block Diagram	5
2.2	LabVIEW Features	6
2.3	Virtual Instrumentation	6
2.3.1	Virtual Instrumentation Foundation	6
2.3.2	General Purpose Interface Bus (GPIB)	6
2.3.3	Standard Commands for Programmable Instruments (SCPI)	8
2.3.4	Instrument Control in LabVIEW	8
2.4	Advanced LabVIEW Programming Techniques	9
	References	9
3	Microwave Measurement Systems	11
3.1	Basic Microwave Instruments	11
3.1.1	Microwave Signal Generators	12
3.1.2	Microwave Receivers	12
3.2	Basic Microwave Measurement Methods	14
3.2.1	Attenuation Measurement	14
3.2.2	Microwave Power Measurement	17
3.2.3	Scattering Parameter	17
3.3	Uncertainty Evaluation in Attenuation Measurement	19
3.3.1	Uncertainty in Power Ratio Technique	20
3.3.2	Uncertainty in IF Substitution Technique	21
3.3.3	Comparison of Measurement Results	21

3.4	Summary	22
3.5	Precap.	23
	References.	24
4	Software Development.	25
4.1	LabVIEW-Based Automatic Measurement System	25
4.1.1	Software Requirement Specifications.	26
4.1.2	Design of Graphical User Interface (GUI).	26
4.1.3	Configuring Transmitter, DUT, and Receiver	28
4.1.4	System Architecture	28
4.1.5	System Implementation	30
4.1.6	System Features and Drivers.	32
4.2	Software Validation and Testing.	33
	References.	33
5	Measurement Results	35
5.1	Data Analysis	35
5.2	Uncertainty Evaluation	36
5.3	Comparison of Results with Manual Measurements	39
5.4	Report Generation.	41
6	Conclusion	43
	About the Book	45

LabVIEW based Automation Guide for Microwave
Measurements

Dubey, S.K.; Narang, N.; Negi, P.S.; Ojha, V.N.

2018, XIV, 45 p. 31 illus. in color., Softcover

ISBN: 978-981-10-6279-7
