

# Contents

## Part I Fracture Mechanics

<b>Mathematical Modeling of the Desiccation Cracking</b> . . . . .	3
Sayako Hirobe	
<b>Fatigue Crack Growth Analysis of an Interfacial Crack in Heterogenous Material Using XIGA</b> . . . . .	15
Indra Vir Singh and Gagandeep Bhardwaj	
<b>A Comparison of Delamination Models: Modeling, Properties, and Applications</b> . . . . .	27
Marita Thomas	
<b>Simulation of Ductile Fracture in Amorphous and Polycrystalline Materials by Multiscale Cohesive Zone Model</b> . . . . .	39
Shingo Urata and Shaofan Li	
<b>Critical Scaling and Prediction of Snap-Through Buckling</b> . . . . .	51
Tetsuo Yamaguchi, Hiroshi Ohtsubo and Yoshinori Sawae	

## Part II Shape Optimization

<b>Second Derivatives of Cost Functions and <math>H^1</math> Newton Method in Shape Optimization Problems</b> . . . . .	61
Hideyuki Azegami	
<b>Shape Optimization by Generalized J-Integral in Poisson's Equation with a Mixed Boundary Condition</b> . . . . .	73
Kohji Ohtsuka	

### **Part III Modeling of Earthquakes**

<b>On Applications of Fast Domain Partitioning Method to Earthquake Simulations with Spatiotemporal Boundary Integral Equation Method . . . . .</b>	<b>87</b>
Ryosuke Ando	

<b>Integral Representation and Its Applications in Earthquake Mechanics: A Review . . . . .</b>	<b>101</b>
Shiro Hirano	

### **Part IV Material Structure**

<b>Brief Introduction to Damage Mechanics and Its Relation to Deformations . . . . .</b>	<b>115</b>
Simon Grützner and Adrian Muntean	

<b>Structured Deformations of Continua: Theory and Applications . . . . .</b>	<b>125</b>
Marco Morandotti	

### **Part V Interface Dynamics**

<b>Gradient Flows with Wiggly Potential: A Variational Approach to Dynamics . . . . .</b>	<b>139</b>
Nadia Ansini	

<b>Energy-Stable Numerical Schemes for Multiscale Simulations of Polymer–Solvent Mixtures . . . . .</b>	<b>153</b>
Mária Lukáčová-Medviďová, Burkhard Dünweg, Paul Strasser and Nikita Tretyakov	

### **Part VI Complex Systems**

<b>On Mathematical Modeling and Analysis of Brain Network . . . . .</b>	<b>169</b>
Hirotada Honda	

<b>Convergence Rates for Discrete-to-Continuum Limits in 1D Particle Systems . . . . .</b>	<b>181</b>
Patrick van Meurs	

Mathematical Analysis of Continuum Mechanics and  
Industrial Applications II

Proceedings of the International Conference CoMFoS16

van Meurs, P.; Kimura, M.; Notsu, H. (Eds.)

2018, VIII, 193 p. 44 illus., 25 illus. in color., Hardcover

ISBN: 978-981-10-6282-7
