

Contents

1	Introduction	1
2	Modeling and Hardware Components of Control System of the OTV	5
2.1	Introduction	5
2.2	System of Coordinate Systems	5
2.2.1	System of Proprio-coordinate	5
2.2.2	Geocentric Inertial Coordinate System	5
2.2.3	Launching Coordinate System	6
2.2.4	Launching Inertial System	6
2.2.5	Orbital Coordinate System of Injection Point	6
2.2.6	Relations of Coordinate System Transformation	6
2.3	Mechanical Model	7
2.4	Equations of Motion	8
2.4.1	Mass-Center Dynamics and Kinematics Equation	8
2.4.2	Around Mass-Center Dynamics and Kinematics Equation	9
2.4.3	Orbital Elements	10
2.5	Hardware Components of Control System	11
	Reference Documentation	12
3	Orbit Prediction Technology	13
3.1	Introduction	13
3.2	Numerical Integration Algorithm	14
3.2.1	Fundamental of Numerical Integration Method	14
3.2.2	Common Numerical Integration Methods	15
3.3	Analysis of Simulation Results	20
	Reference Documentation	25

4	Inertial Navigation and Initial Alignment Technology	27
4.1	Introduction	27
4.2	Inertial Navigation Technology	29
4.2.1	Fundamental of Inertial Navigation	29
4.2.2	Attitude Matrix Updating Algorithm	30
4.2.3	Analysis on Error of SINS	32
4.3	Alignment Technology Based on Inertial System	33
4.3.1	Digital Filter Processing Technology of Disturbing Acceleration	33
4.3.2	Inertial System Alignment Technology with Digital Filter	34
4.3.3	Analysis on Limiting Accuracy of Alignment Method of Inertial System	36
4.4	Analysis on Simulation Results	37
4.4.1	Analysis on Simulation of Digital Filtering	37
4.4.2	Analysis on Alignment Simulation of Inertial System	39
	Reference Documentation	41
5	INS/GNSS Integrated Navigation Technology	43
5.1	Introduction	43
5.2	Principle of Satellite Navigation	44
5.2.1	Principle of Satellite Navigation Pseudo-range Positioning	45
5.2.2	Principle of Determining Velocity of Satellite Navigation	47
5.2.3	Principle of Satellite Navigation Attitude Determination	49
5.3	Principle of INS/GNSS Integrated Navigation System	50
5.3.1	Combination Mode of INS/GNSS Integrated Navigation	50
5.3.2	Fundamentals of INS/GNSS Integrated Navigation	51
5.4	Design of INS/GNSS Integrated Navigation System	52
5.4.1	Design of Loose Integration Navigation System	52
5.4.2	Design of Tight Integrated Navigation System	55
5.5	Analysis of Simulation Results	58
5.5.1	Analysis of Loose Integration Simulation	65
5.5.2	Analysis on Tight Integration Simulation	68
	Reference Documentation	72
6	INS/CNS-Integrated Navigation Technology	73
6.1	Introduction	73
6.2	Starlight Navigation Principle	73

6.2.1	Starlight Attitude Determination Principle.	73
6.2.2	Principle of Starlight Positioning.	79
6.3	Design of INS/CNS-Integrated Navigation System.	81
6.4	Analysis of Simulation Results.	84
	Reference Documentation	87
7	Redundant Fault Tolerance and Failure Reconfiguration	
	Technology of Inertial Devices	89
7.1	Introduction	89
7.2	Redundant Configuration of Inertial Devices	90
7.2.1	Multi-table Redundant Configuration of Single Inertial Group	91
7.2.2	System-Level Redundant Configuration of Multi-inertial Group	98
7.3	Fault Detection of Inertial Device.	101
7.3.1	Fault Detection of Multi-table Fault for Single IMU.	101
7.3.2	System-Level Fault Detection of Multi-IMUs	107
7.4	Fault Reconfiguration of Inertial Devices	110
7.4.1	Multi-table Fault Reconfiguration of Single IMU	111
7.4.2	System-Level Fault Reconfiguration of Multi-IMUs	119
	Reference Documentation	120
8	Guidance and Midcourse Correction Technology	121
8.1	Introduction	121
8.2	Guidance Technology.	122
8.2.1	Perturbation Guidance Technology	122
8.2.2	Iterative Guidance Technology	129
8.2.3	New Direct Guidance Technology	143
8.3	Transfer Orbit Midcourse Correction Technology.	147
8.3.1	Description of Midcourse Correction.	147
8.3.2	Strategy of Midcourse Correction	149
8.3.3	Illustration on Actual Execution of Midcourse Correction	155
8.4	Analysis of Simulation Results.	155
8.4.1	Simulation of Iterative Guidance.	155
8.4.2	Simulation of Midcourse Correction	161
	Reference Documentation	161
9	Orbital Control Strategy.	163
9.1	Introduction	163
9.2	Orbital Control Strategy	165
9.2.1	Design of Initial Alignment.	165

9.2.2	Design of INS/GNSS Integrated Navigation	167
9.2.3	Reconfiguration of IMU	168
9.2.4	Design of Orbital Prediction	169
9.2.5	Design of INS/RCNS Integrated Navigation	170
9.2.6	Design of Midcourse Correction	170
9.2.7	Design of Transfer Orbital Control	172
	Reference Documentation	174

Navigation and Guidance of Orbital Transfer Vehicle

Li, X.; Li, C.

2018, XIV, 174 p. 121 illus., Hardcover

ISBN: 978-981-10-6333-6
