Contents

1 Introduction 1
1.1 Basic Introduction of Graphene 1
1.1.1 Overview of the Development History of Graphene 1
1.1.2 Structure and Properties of Graphene 3
1.1.3 Main Preparation Methods of Graphene 6
1.1.4 Applications of Graphene 8
1.2 Processing of Graphene 10
1.2.1 Joining of Graphene 10
1.2.2 Fabrication of Graphene Nanopore 11
1.2.3 Doping of Graphene 11
1.3 Particle Beam Processing and Its Application in Graphene Structure 13
1.3.1 Introduction of Particle Beam Processing 13
1.3.2 Research Status of Particle Beam Processing Graphene . . . 14
1.4 Problem Introduction 16
1.5 Research Content 18
References 19

2 Experiment Approaches and Simulation Methods 23
2.1 Synthesis and Characterization of Graphene Specimen 23
2.1.1 Preparation of Monolayer and Multilayer Graphene Specimens 23
2.1.2 The Main Characterization Methods of Graphene Sample 26
2.1.3 The Main Experimental Equipment for Graphene Processing 28
2.2 Introduction of MD Simulation 29
2.2.1 Concepts 29
2.2.2 Basic Principles of Classic MD 29
2.2.3 Atomic Interaction Force 30
2.2.4 Integral Algorithm 34

2.2.5 Simulation Ensemble . . . 35
2.2.6 Averaging of Statistical Results . . . 36
2.2.7 Introduction of Simulation Software . . . 38
2.3 Electronic Transport Theory . . . 38
2.3.1 Introduction . . . 38
2.3.2 DFT . . . 38
2.3.3 Green Function Theory . . . 43
2.3.4 Solution Process of the Electronic Transport Properties of Graphene . . . 47
2.3.5 Introduction to Simulation Software . . . 48
2.4 Chapter Summary . . . 48
References . . . 50

3 General Mechanisms During the Interaction Between Particle Beam and Graphene . . . 51
3.1 Introduction . . . 51
3.2 Interaction Between Laser Beam and Graphene . . . 52
3.2.1 Damage Threshold of Graphene Irradiated by Single Pulse Laser . . . 52
3.2.2 The Change of the Morphology of Graphene Under Ultrafast Laser . . . 54
3.2.3 Experimental Processing of Graphene Structure Under Ultrafast Laser Irradiation . . . 56
3.3 Interaction Between Ion Beam and Graphene . . . 57
3.3.1 The Phenomenon of Graphene Irradiated by Different Energy Ion Beam . . . 57
3.3.2 Effect of Substrate on Ion Beam Irradiation of Graphene . . . 60
3.4 Interaction Between Electron Beam and Graphene . . . 64
3.4.1 Experimental Study on the Change of Graphene Structure by Electron Beam Irradiation . . . 65
3.4.2 Mechanism of the Destruction of Graphene Structure Under Electron Beam Irradiation . . . 67
3.5 Chapter Summary . . . 71
References . . . 72

4 Doping of Graphene Using Low Energy Ion Beam Irradiation and Its Properties . . . 73
4.1 Introduction . . . 73
4.2 Experimental Studies of Graphene Doping by Ion Beam Irradiation . . . 73
4.2.1 Experiment Procedure . . . 73
4.2.2 Experiment Results of Low Energy Ion Implantation Doping . . . 74
4.2.3 Summary of the Experiment . . . 78

4.3 Theoretical Analysis of the Doping Mechanism 78
4.3.1 Research Model 79
4.3.2 Variation of Graphene Structure Under Nitrogen Ion Implantation 79
4.3.3 The Energy of the System Corresponding to the Different Doping Configurations 80
4.3.4 Influence of the Energy and Dose of Implanted Ion Beam 83
4.4 Mechanical Properties of Doped Graphene by Ion Beam Irradiation 84
4.4.1 MD Simulation Model 85
4.4.2 Effect of Implantation Doping on Tensile Stress Distribution of Graphene 86
4.4.3 The Influence of Doping Concentration and Doping Ion Distribution 87
4.4.4 Influence of Defect Concentration and Doping Element Type 89
4.5 Electronic Transport Properties of Doped Graphene 90
4.5.1 Research Model 91
4.5.2 Electronic Transport Properties Under Different Doping Forms 92
4.5.3 Effect of Doping Position on Electrical Performance 95
4.6 Summary 97
References 98

5 Joining of Graphene by Particle Beam Irradiation and Its Properties 99
5.1 Introduction 99
5.2 Experimental Studies of Graphene Joining by Particle Beam Irradiation 99
5.2.1 Preparation and Characterization of Graphene Joining Samples 100
5.2.2 Graphene Joining by Ion Beam Irradiation 104
5.2.3 Graphene Joining by Laser Irradiation and Thermal and Annealing 106
5.2.4 Experiment Summary 110
5.3 Theoretical Analysis of the Joining Mechanism 110
5.3.1 Graphene Joining Under Laser Beam Irradiation 111
5.3.2 Joining of Graphene by Ion Beam Irradiation 116
5.4 Mechanical Properties of the Graphene Joint 120
5.4.1 Mechanical Properties of Butt Joint of Graphene 120
5.4.2 Mechanical Properties of Overlapped Graphene Joint 125
5.4.3 Mechanical Properties of Butt Joint Constituted by Multi Pieces of Graphene 129

5.5 Electric Transport Properties of the Graphene Joint 131
5.5.1 Electronic Transport Properties of Butt Joint. 131
5.5.2 Electronic Transport Properties of Overlap Joint. 136
5.6 Chapter Summary. 140
References. 141

6 Fabrication of Graphene Nanopore by Particle Beam Irradiation and Its Properties 143
6.1 Introduction 143
6.2 Experimental Studies of Fabrication of Graphene Nanopore by Particle Beam Irradiation. 144
6.2.1 Experiment Procedure. 144
6.2.2 Morphology Analysis of Graphene Nanopore. 145
6.2.3 Effect of Ion Beam Dose on the Properties of Graphene Nanopore 148
6.2.4 Summary of the Experiment. 149
6.3 Theoretical Analysis of the Fabrication Mechanism of Graphene Nanopore 149
6.3.1 Research Model 149
6.3.2 Processing Mechanism of Nanopore. 152
6.3.3 Influencing Factors of Nanopore Processing. 155
6.4 Mechanical Properties of Graphene Nanopore 160
6.4.1 Research Model 160
6.4.2 Tensile Failure Process of Graphene Nanopore. 161
6.4.3 Effect of Graphene Chirality on Dynamic Failure Process 162
6.4.4 Effect of Nanopore Size on Mechanical Properties. 164
6.4.5 Effect of Vacancy Defect on Mechanical Properties of Nanopore 165
6.5 Electronic Transport Properties of Graphene Nanopore 169
6.5.1 Research Model 169
6.5.2 Effect of Nanopore Size on Electrical Properties. 170
6.5.3 Effect of Vacancy Defect on Electrical Performance. 172
6.5.4 Effect of Nanopore Shape on Electrical Properties 173
6.6 Summary 175
References. 175

7 Conclusion 179
7.1 The Main Conclusions 179
7.2 Future Plan. 182
