

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Introduction to the World of Polymers	1
1.2	Conventional Polymers with Special Reference to Architectural Polymers	3
1.3	Dendrimers: Advantages and Disadvantages	6
1.4	Introduction to Hyperbranched Polymers	9
1.5	Conclusion	13
	References	13
<b>2</b>	<b>Part I—Synthesis of Hyperbranched Polymers: Step-Growth Methods</b>	<b>15</b>
2.1	Introduction to Theoretical Approaches in Hyperbranched Polymerization	15
2.2	Hyperbranched Polymers from AB <sub>x</sub> -Type Monomers	16
2.2.1	Carbon–Carbon Coupling Reactions	19
2.2.2	Carbon-Hetero Atom Coupling Reactions	35
2.3	Hyperbranched Polymers from A <sub>2</sub> + B <sub>3</sub> Monomer Pairs and Other Couple Monomer Methodologies	49
2.4	Drawbacks of Hyperbranched Polymerization Techniques and Possible Remedies	52
2.5	Conclusion	57
	References	57
<b>3</b>	<b>Part II—Synthesis of Hyperbranched Polymers: Mixed Chain-Growth and Step-Growth Methods</b>	<b>65</b>
3.1	Introduction to Simultaneous Step- and Chain-Growth Methodologies	66
3.2	Radical Polymerization	67
3.3	Proton Transfer Polymerization	72
3.4	Self-Condensing Vinyl Polymerization/Copolymerization, Self-Condensing Ring Opening Polymerization and Controlled/Living Polymerization	76

3.5	Hypergrafting . . . . .	97
3.5.1	Homogeneous Grafting—Hyperbranched-Graft-Hyperbranched Copolymers . . . . .	97
3.5.2	Homogeneous Grafting—Linear-Graft-Hyperbranched Copolymers . . . . .	98
3.5.3	Homogeneous Grafting—Linear-Block-Hyperbranched Copolymers . . . . .	99
3.5.4	Heterogeneous Grafting. . . . .	101
3.5.5	Hypergrafting onto Living Cells . . . . .	102
3.6	Conclusion . . . . .	102
	References. . . . .	102
<b>4</b>	<b>Structure–Property Relationship of Hyperbranched Polymers . . . . .</b>	<b>109</b>
4.1	Introduction to Intrinsic Properties of Hyperbranched Polymers. . . . .	109
4.2	Degree of Branching. . . . .	110
4.2.1	Determination of DB. . . . .	110
4.2.2	Methods to Determine DB . . . . .	111
4.3	Influence of the Branching Architecture on the End Properties . . . . .	115
4.4	Solution Properties with Special Reference to Hyperbranched Architecture . . . . .	116
4.5	Molecular Mass and Molar Mass Distribution . . . . .	118
4.6	Bulk Properties. . . . .	120
4.6.1	Thermal Properties . . . . .	120
4.6.2	Rheological Properties. . . . .	123
4.7	Special Properties Related to Latest Biological Applications . . . . .	126
4.7.1	Biodegradability and Biocompatibility of Hyperbranched Polymers . . . . .	126
4.7.2	Self-Assembly of the Hyperbranched Polymers. . . . .	129
4.7.3	Encapsulation by Hyperbranched Polymers. . . . .	129
4.8	Conclusion . . . . .	132
	References. . . . .	132
<b>5</b>	<b>Latest Biomedical Applications of Hyperbranched Polymers: Part 1: As Delivery Vehicle. . . . .</b>	<b>135</b>
5.1	Introduction to the Concept of Targeted Delivery. . . . .	135
5.2	Encapsulation Ability of Hyperbranched Polymers. . . . .	136
5.3	Hyperbranched Polymers in Controlled Drug Delivery. . . . .	138
5.4	Hyperbranched Polymers in Protein Delivery . . . . .	141
5.5	Hyperbranched Polymers in Gene Delivery . . . . .	143
5.6	Conclusion . . . . .	149
	References. . . . .	149

<b>6</b>	<b>Part II: In Bioimaging</b>	151
6.1	Introduction to Diagnosis via Bioimaging	151
6.2	Hyperbranched Polymers as Fluorescent Probes	152
6.3	Hyperbranched Polymers as MRI Contrast Agents	156
6.4	Hyperbranched Polymers in Nuclear Tomographic Imaging	158
6.5	Hyperbranched Polymers for Multimodal Imaging	160
6.6	Conclusion	163
	References	163
<b>7</b>	<b>Part III: Tissue Engineering</b>	165
7.1	Introduction	165
7.2	Hyperbranched Polymers as Tissue Scaffold Component	165
7.3	Hyperbranched Polymers as Cell and Tissue Adhesives	172
7.4	Conclusion	175
	References	175
<b>8</b>	<b>Conclusion</b>	177

Hyperbranched Polymers for Biomedical Applications

Bandyopadhyay, A.; Sengupta, S.; Das, T.

2018, XI, 178 p. 109 illus., Hardcover

ISBN: 978-981-10-6513-2
