# Contents

**Measurement of Disease Severity of Rice Crop Using Machine Learning and Computational Intelligence** . . . . . 1
Prabira Kumar Sethy, Baishalee Negi, Nalini Kanta Barpanda, Santi Kumari Behera and Amiya Kumar Rath
1 Introduction . . . . . 1
2 Literature Review . . . . . 2
3 Proposed Methodology . . . . . 4
4 Experimental Results . . . . . 7
5 Conclusion and Future Scope . . . . . 8
References . . . . . 10

**Flue-Cured Tobacco Leaves Classification: A Generalized Approach Using Deep Convolutional Neural Networks** . . . . . 13
Siva Krishna Dasari, Koteswara Rao Chintada and Muralidhar Patruni
1 Introduction . . . . . 13
2 Convolutional Neural Networks . . . . . 14
2.1 Convolutional Layer (CL) . . . . . 14
2.2 Pooling Layer . . . . . 14
2.3 Back Propagation on Conv Layer . . . . . 15
3 Tobacco Leaves Classification System . . . . . 16
3.1 Convnet Architecture and Model . . . . . 16
3.2 Details of Learning . . . . . 17
4 Resultant Outputs . . . . . 18
5 Compartive Study . . . . . 19
6 Conclusion . . . . . 20
7 Future Scope . . . . . 20
References . . . . . 20

**The Adaptive Strategies Improving Web Personalization Using the Tree Seed Algorithm (TSA)** . . . . . 23
P. Srinivasa Rao, D. Vasumathi and K. Suresh
1 Introduction . . . . . 23
2 Motivation . . . . . 25
3 Problem Statement . . . . . 26
4 Proposed Work . . . . . 26
5 Conclusion . . . . . 28
References . . . . . 28

**An Experimental Evaluation of Integrated Dematal and Fuzzy Cognitive Maps for Cotton Yield Prediction** . . . . . 31
N. Manoharan and Arunkumar Thangavelu
1 Introduction . . . . . 31
2 Materials and Methods . . . . . 32
2.1 The DEMATEL Approach . . . . . 32
2.2 The Model of Fuzzy Cognitive Map . . . . . 34
3 Results and Discussion . . . . . 38
3.1 Classification Results . . . . . 38
3.2 Simulation of FCM Tool . . . . . 41
4 Conclusion . . . . . 42
References . . . . . 43

**A Refined K-Means Technique to Find the Frequent Item Sets** . . . . . 45
A. Sarvani, B. Venugopal and Nagaraju Devarakonda
1 Introduction . . . . . 45
2 Calculation of Minkowski Distance Measure . . . . . 46
3 Clustering Methods . . . . . 47
3.1 Hierarchical Methods . . . . . 47
3.2 Partitioning Methods . . . . . 47
3.3 Model-Based Clustering Methods . . . . . 48
3.4 Grid-Based Methods . . . . . 48
4 K-Means Clustering . . . . . 48
5 GSP Algorithm . . . . . 49
6 Methodology . . . . . 50
6.1 Acquiring the Data . . . . . 50
6.2 Data Pre-processing . . . . . 50
6.3 Applying the Refined K Means . . . . . 50
6.4 Applying the GSP Algorithm . . . . . 51
7 Experiment . . . . . 51
8 Conclusion . . . . . 53
References . . . . . 53

**Finger Vein Detection Using Gabor Filter and Region of Interest** . . . . . 55
Saritha Reddy Venna, Suresh Thommandru and Ramesh Babu Inampudi
1 Introduction . . . . . 55
2 Related Work . . . . . 58
3 Proposed Work . . . . . 58
4 Acquiring the Image . . . . . 59
5 Image Enhancement . . . . . 60
6 Feature Extraction . . . . . 60
6.1 Region Growing . . . . . 60
6.2 Image Histogram . . . . . 61
6.3 Gabor Filter and Region of Interest (ROI) . . . . . 62
7 Experimental Results . . . . . 63
8 Conclusion . . . . . 64
References . . . . . 64

**Design of Rheumatoid Arthritis Predictor Model Using Machine Learning Algorithms** . . . . . 67
S. Shanmugam and J. Preethi
1 Introduction . . . . . 67
2 Related Works . . . . . 70
2.1 Survey Based on Clinical Research . . . . . 70
2.2 Survey Based on Machine Learning Algorithms . . . . . 72
3 Objectives . . . . . 73
4 Proposed Architecture . . . . . 73
5 Conclusion and Future Scope . . . . . 76
References . . . . . 76

**Feature Based Opinion Mining and Sentiment Analysis Using Fuzzy Logic** . . . . . 79
B. Vamshi Krishna, Ajeet Kumar Pandey and A. P. Siva Kumar
1 Introduction . . . . . 79
2 Related Works . . . . . 81
3 Research Background . . . . . 82
4 Proposed Work . . . . . 85
5 Results and Discussion . . . . . 86
6 Conclusion . . . . . 88
References . . . . . 88

**Hexagonal Image Processing and Transformations: A Practical Approach Using R** . . . . . 91
E. Ramalakshmi and Neeharika Kompala
1 Why Is R Used in Processing and Transformations . . . . . 91
2 Hexagonal Grid: Compendium . . . . . 92
3 Structure and Addressing . . . . . 93
3.1 Tessellations . . . . . 93

4 Operations On The Grid . . . . . 94
4.1 Construction of Hexagonal Pixels . . . . . 94
5 Simulations . . . . . 96
6 Results . . . . . 97
7 Conclusion . . . . . 98
References . . . . . 98

**EEG Based Emotion Recognition Using Wavelets and Neural Networks Classifier** . . . . . 101
S. Thejaswini, K. M. Ravi Kumar, Shyam Rupali and Vijayendra Abijith
1 Introduction . . . . . 101
2 Related Work . . . . . 102
3 Methodology . . . . . 103
3.1 SEED Database . . . . . 104
3.2 Feature Extraction and Selection . . . . . 105
3.3 Classification . . . . . 107
3.4 Confusion Matrix . . . . . 108
4 Results . . . . . 109
5 Conclusion . . . . . 111
References . . . . . 111
