

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Reservoirs Are Typical “Mercury Sensitive Ecosystems”	1
1.2	Characteristics of Reservoir Systems	2
1.3	Why Study Reservoirs in Wujiang River Basin?	3
1.3.1	Wujiang River Basin Is a Typical Impounded River System with Cascade Reservoirs Built in China	3
1.3.2	Wujiang River Basin Can Be a Model of Yangtze River Catchment and Rivers of Southwestern China	3
1.3.3	Reservoirs with Different Ages in Wujiang River Provide the Possibility to Investigate Mercury Biogeochemical Cycling Characteristics with the Evolution of Reservoirs	5
1.3.4	The Scientific and Special Significance of Studying the Biogeochemical Cycling of Mercury in Reservoirs in Wujiang River Basin	5
	References	6
<b>2</b>	<b>Analysis of Mercury Species in the Environmental Samples</b>	<b>9</b>
2.1	Mercury Speciation in Water	9
2.1.1	Definition of Mercury Species	9
2.1.2	Sample Collection Program in River and Reservoirs	12
2.1.3	Analysis Total Mercury in Water Samples	14
2.1.4	Analysis of Methylmercury in Water Samples	14
2.2	Analysis of Mercury Species in Sediment Samples	15
2.2.1	Sample Collection	15
2.2.2	Total Mercury Analysis in Sediment Samples	15
2.2.3	Methylmercury Analysis in Sediment Samples	15
2.3	Analysis of Mercury Species in Plankton and Fish	16
2.3.1	Sample Collection	16

2.3.2	Total Mercury Analysis in Plankton and Fish Samples . . .	17
2.3.3	Methylmercury Analysis in Plankton and Fish Samples . . .	18
	References . . . . .	18
<b>3</b>	<b>Wet Deposition Flux of Total Mercury and Methylmercury in Wujiang River Basin . . . . .</b>	<b>21</b>
3.1	Sampling Location and Sample Collection . . . . .	21
3.1.1	Sampling Location . . . . .	21
3.1.2	Collection, Processing, and Analysis of Mercury in Precipitation . . . . .	22
3.1.3	Estimation of Wet Deposition Fluxes of Total Mercury and Methylmercury . . . . .	24
3.2	Concentrations of Total Mercury and Methylmercury in Precipitation . . . . .	24
3.3	Wet Deposition Fluxes of Total Mercury and Methylmercury . . .	26
3.4	Comparison with Observations in China and in Other Regions Worldwide . . . . .	28
3.5	Estimates of Wet Deposition of Mercury in Wujiang River . . . .	29
	References . . . . .	31
<b>4</b>	<b>Water/Air Mercury Flux in Reservoirs . . . . .</b>	<b>33</b>
4.1	Sampling Sites and Sampling Techniques . . . . .	33
4.1.1	Studied Reservoirs and Sampling Sites . . . . .	33
4.1.2	Measurements of Water/Air Exchange Flux of Mercury . . .	34
4.1.3	Meteorological and Water Quality Parameters . . . . .	37
4.2	Atmospheric Total Gaseous Mercury Concentrations Over Water of Reservoirs . . . . .	37
4.3	Overall Characteristics of Water/Air Mercury Flux . . . . .	43
4.4	Diurnal and Seasonal Patterns of Water/Air Mercury Flux . . . .	45
4.5	Factors Influencing Water/Air Mercury Flux . . . . .	50
4.6	Estimates of Hg Emission for Water in Wujiang River . . . . .	61
	References . . . . .	63
<b>5</b>	<b>Mercury in Inflow/Outflow Rivers of Reservoirs . . . . .</b>	<b>67</b>
5.1	Sampling Sites Description, Sample Collection, Sample Analyses, Analytical Methods, and QA/QC . . . . .	67
5.2	General Water Quality Characteristics . . . . .	72
5.3	Spatial and Temporal Variations of Mercury Species in River Water . . . . .	72
5.3.1	Total Mercury . . . . .	72
5.3.2	Particulate Mercury . . . . .	78
5.3.3	Dissolved Mercury . . . . .	79

5.3.4	Reactive Mercury . . . . .	81
5.3.5	Methyl Mercury . . . . .	82
5.4	Comparisons with Other Reservoirs . . . . .	85
5.5	Influence of Cascade Reservoirs on the Distributions of Mercury Species in River Water . . . . .	85
	References . . . . .	92
<b>6</b>	<b>Biogeochemical Process of Mercury in Reservoirs in the Main Stream of the Wujiang River . . . . .</b>	<b>95</b>
6.1	Biogeochemical Cycling of Mercury in the Hongjiadu, Suofengying, and Yinzidu Reservoir . . . . .	95
6.1.1	Sampling Location, Sample Collection, and QA/QC . . . . .	96
6.1.2	General Water Quality Characteristics . . . . .	97
6.1.3	Distribution of Mercury Species in Water Column . . . . .	102
6.1.4	Distribution of Mercury Species in Flooded Soil . . . . .	118
6.2	Biogeochemical Cycling of Mercury in the Dongfeng Reservoir and Puding Reservoir . . . . .	123
6.2.1	Sampling Site Descriptions, Sample Collection, Analytical Methods, and QA/QC . . . . .	123
6.2.2	Mercury Species in the Water Column . . . . .	125
6.2.3	Mercury Species in Sediment Cores . . . . .	145
6.2.4	Diffusion Flux of Inorganic Mercury and Methylmercury to Water . . . . .	156
6.3	Biogeochemical Cycling of Mercury in Wujiangdu Reservoir . . . . .	162
6.3.1	Sampling Sites Description, Sample Collection, Analytical Methods, and QA/QC . . . . .	162
6.3.2	Mercury Species in Water Column . . . . .	164
6.3.3	Mercury Species in Sediment Cores . . . . .	177
6.3.4	Diffusion Flux of Inorganic Mercury and Methylmercury to Water . . . . .	189
	References . . . . .	193
<b>7</b>	<b>Biogeochemical Cycling of Mercury in the Hongfeng, Baihua, and Aha Reservoirs . . . . .</b>	<b>201</b>
7.1	Introduction . . . . .	201
7.1.1	Biogeochemical Cycling of Mercury in the Hongfeng Reservoir . . . . .	203
7.1.2	Biogeochemical Processes of Mercury in the Baihua Reservoir . . . . .	240
7.1.3	Biogeochemical Cycling of Mercury in the Aha Reservoir . . . . .	269
	References . . . . .	296

<b>8</b>	<b>Mercury Mass Balance in Reservoirs with Different Ages</b>	<b>303</b>
8.1	Description of the Mass Balance Budget Calculations	303
8.2	Water Balance in Reservoirs	305
8.2.1	Water Input from Wet Deposition	305
8.2.2	Water Input from the Inflow River	308
8.2.3	Water Input from the Surface Runoff	310
8.2.4	Water Output from Reservoirs	310
8.2.5	Input–Output Water Budgets in Reservoirs	310
8.3	Input–Output Budgets for the Total Mercury and Methylmercury in Reservoirs	311
8.3.1	Total Mercury and Methylmercury Inputs from Precipitation	311
8.3.2	Total Mercury, Methylmercury, and Total Suspended Solid Inputs from the Inflow Rivers	313
8.3.3	Total Mercury and Methylmercury Inputs from Surface Runoff	317
8.3.4	Total Mercury and Methylmercury Outputs from Reservoir Discharge	318
8.3.5	Total Mercury and Methylmercury Outputs from Other Pathways	320
8.3.6	Elemental Mercury Emission Over the Water–Air Surface	321
8.4	The Relative Contribution of Different Vectors to the Mercury Input–Output Budgets	328
8.4.1	The Relative Contribution of Different Vectors to the Mercury Input in Reservoirs	328
8.4.2	The Relative Contribution of Different Vectors to the Mercury Output from Reservoirs	332
8.5	Net Fluxes and Stocking Rates of Mercury Species in Reservoirs	333
8.5.1	Net Fluxes of Mercury Species in Reservoirs	333
8.5.2	Storage Rates for Mercury Species in Reservoirs	334
8.5.3	Possible Factors Controlling the Net Fluxes and Storage Rates of Mercury Species in Reservoirs	335
	References	337

Biogeochemical Cycle of Mercury in Reservoir Systems  
in Wujiang River Basin, Southwest China

Feng, X.; Meng, B.; Yan, H.; Fu, X.; Yao, H.; Shang, L.  
2018, IX, 416 p. 242 illus., 45 illus. in color. With The  
book is translated from Biogeochemical Process of  
Mercury and Environmental Effect in Reservoirs in  
Wujiang River Basin, Publisher: Science Press, ISBN:  
978-7-03-043040-3, Publication year: 2015., Hardcover  
ISBN: 978-981-10-6718-1
