Part I Magnetoelastic Waves in Electroconductive Nonferromagnetic Media

1 Basics of the Theory of Magnetoelasticity	3
1.1 Main Equations and Relations of Magnetoelasticity of Electroconductive Non-ferromagnetic Bodies	3
1.1.1 Equations and Relations of Electrodynamics in Euler Variables	3
1.1.2 Equations and Relationships of the Theory of Elasticity in Account of Forces of Electromagnetic Origin in Euler Variables	7
1.1.3 Equations of Electrodynamics for Vacuum	9
1.1.4 Boundary and Initial Conditions. Conditions at Infinity.	9
1.1.5 Equations and Relations of the Theory of Magnetoelasticity of Conducting Media in the Lagrange Variables	11
References.	15
2 Some General Issues of Propagation of Magnetoelastic Waves in Electroconductive Isotropic and Anisotropic Media	17
2.1 Basics of the Linear Theory of Magnetoelasticity of Electroconductive Media.	17
2.2 Equations of Magnetoelastic Waves in Displacements. One-Dimensional Quasi-longitudinal and Quasi-transversal Magnetoelastic Waves	22
2.2.1 The Equations of Magnetoelastic Waves in Displacements	22
2.2.2 One-Dimensional Quasi-longitudinal and Quasi-transverse Waves.	24

2.3	Propagation Character of Two-Dimensional Magnetoelastic Waves.	30
2.3.1	Equations of Two-Dimensional Magnetoelastic Waves	30
2.3.2	The Condition of Complete Hyperbolicity. The Area of Values of the Coefficients of the Equations of Magnetoelastic Waves	33
2.4	Investigation of the Roots of Characteristic Equation of Two-Dimensional Magnetoelastic Waves and Drawing of the Acceptable Area on the Basis of the Roots	37
2.4.1	Characteristic Equation of Two-Dimensional Magnetoelastic Waves	38
2.4.2	Investigation of the Roots of the Characteristic Equation	41
2.5	Classification of Plane Magnetoelastic Waves. Behavior of Their Velocities	50
2.5.1	Classification of Plane Magnetoelastic Waves. Fast and Slow Magnetoelastic Waves	51
2.5.2	Behavior of the Phase Velocity of Plane Magnetoelastic Waves	55
2.5.3	The Case of an Isotropic Medium	60
	References.	63
3	Magnetoelastic Waves in Electroconductive Half-Space	65
3.1	Reflection of Magnetoelastic Waves from the Boundary of a Conductive Half-Space	65
3.1.1	The Problem Statement	66
3.1.2	Solution of the Problem.	67
3.2	Magnetoelastic Vibrations in an Anisotropic Perfectly Conductive Half-Space Under Normal Pressure	69
3.2.1	The Problem Statement and Solution of Inhomogeneous Boundary Problem	70
3.2.2	The Case of an Orthotropic Half-Space	77
3.3	Magnetoelastic Rayleigh Waves with Consideration of the Initial Stresses Caused by Magnetic Pressure of a Longitudinal Magnetic Field	81
3.3.1	The Problem Statement	82
3.3.2	Solution of the Addressed Problem. Investigation of Characteristic Equation	86
3.3.3	Character of Wave Propagation	88
3.4	Influence of Magnetic Pressure of Transversal Magnetic Field on the Propagation Character of Rayleigh Waves	90
3.4.1	The Problem Statement	90
3.4.2	Solution of the Problem. Investigation of Characteristic Equation	94

3.4.3	Character of Wave Propagation.	98
3.5	Surface Magnetoelastic Rayleigh Waves in Absence of Magnetic Pressure.	100
3.5.1	The Problem Statement	101
3.5.2	Solution of the Problem.	102
3.6	Solution of the Two-Dimensional Magnetoelastic Lamb Problem	106
3.6.1	The Problem Statement	106
3.6.2	Solution of the Problem.	108
	References.	115

Part II Magnetoelastic Waves in Magnetoactive Nonconductive Media

4	Magnetoelastic Waves in Magnetically Active Non-conductive Media	119
4.1	Main Equations, Boundary Conditions and Relations of Magnetoelasticity of Magnetoactive Dielectric Media and Their Linearization.	119
4.1.1	Non-linear Equations and Relations of Magnetoelasticity.	119
4.1.2	Linearization of Basic Equations, Relations and Boundary Conditions of Magnetoelastic Waves in Magnetoactive Non-conductive Media.	126
4.2	Two-Dimensional Equations and Relations of the Linear Theory of Magnetoelasticity of Magnetostrictive and Piezomagnetic Media	134
4.2.1	Propagation of Magnetostrictively Coupled Quasilongitudinal and Quasitransverse Plane Waves	141
4.3	Reflection of Magnetoelastic Shear Waves from the Boundary of Magnetostrictive Half-Space.	144
4.3.1	The Statement of Reflection Problem	144
4.3.2	Generation of ASMO Caused by the Magnetostrictive Effect.	146
4.4	Tunneling of Magnetoelastic Shear Waves in Magnetostrictive Media	150
4.4.1	Possibility of Contactless Transmission of Magnetoelastic Wave from One Medium to Another . . .	151
4.5	Reflection and Tunneling of Magnetoelastic Shear Waves in Piezomagnetic Media	154
4.5.1	The Reflection Problem. The Possibility of Amplification of the Magnetic Field Near the Boundary.	155
4.5.2	The Tunneling Problem. Possibility of Complete Percolation.	160

4.6	Surface Magnetoelastic Love Waves in Magnetostrictive Media	164
4.6.1	The Problem Statement. The Basic Equations and Boundary Conditions.	164
4.6.2	Love Waves in the Case of a Dielectric Layer	166
4.6.3	Love Waves in the Case of an Ideally Conducting Layer.	168
4.7	Gap Waves in Magnetostrictive Media	170
4.7.1	The Statement and Solution of the Problem. Symmetric and Anti-symmetric Waves	170
4.7.2	Generation of Gap Waves Localization at the Surfaces of Media	174
4.8	Gap Waves in Piezomagnetic Media	176
4.8.1	The Statement and Solution of the Problem. Symmetric and Anti-symmetric Waves	176
4.8.2	Determination of the Main Characteristics of Gap Waves	179
4.9	Existence and Propagation Character of Two-Dimensional Surface Waves in a Magnetostrictive Half-Space	183
4.9.1	Linearized Equations and Boundary Conditions for the Perturbed State of Magnetostrictive Media	183
4.9.2	The Equations and the Boundary Conditions for Plane Magnetoelastic Waves	186
4.9.3	Magnetoelastic Rayleigh Waves in a Magnetostrictive Half-Space	188
4.9.4	Shear Surface Magnetoelastic Waves	191
4.10	Generation of Surface Shear Waves in a Half-Space by the Rayleigh Wave	193
4.10.1	The Statement of the Problem of Magnetoelastic Waves Propagation in a Magnetically Soft Ferromagnetic Medium	194
4.10.2	Equations and Boundary Conditions for Two-Dimensional Surface Magnetoelastic Waves	196
4.10.3	Solution of the Problem of Propagation of a Magnetoelastic Rayleigh Wave	198
4.10.4	Rayleigh Wave as a Source of Generation of a Shear Surface Wave	199
	References.	199
5	Propagation of Spin and Elastic-Spin Waves in Ferromagnetic Medium	203
5.1	Existence and Propagation Character of Spatial Spin Surface Waves.	203
5.1.1	Problem of Propagation of Spin (Magnetic) Waves in Ferromagnetics	205

5.1.2	Dispersion Equation of Spatial Spin Surface Waves	209
5.1.3	Solution of Dispersion Equation. Condition of Existence and Character of Propagation of Surface Waves	212
5.2	Surface Spin Waves in Laminated Ferromagnetic Media	216
5.2.1	Propagation of Surface Spin Waves in a Piecewise Homogeneous Ferromagnetic Medium Consisting of Two Half-Spaces	221
5.2.2	Propagation of Surface Spin Waves in a Piecewise Homogeneous Space, When the Ferromagnetic Layer Lies Between Two Ferromagnetic Half-Spaces ($n = 3$)	222
5.2.3	Propagation of Spin Waves in Piecewise Homogeneous Ferromagnetic Media with Screened Surfaces	227
5.3	Reflection of Magnetoelastic (Elastic-Spin) Waves from the Boundary of Ferromagnetic Elastic Half-Space.	230
5.3.1	The Problem Statement	231
5.3.2	The Problem Solution. Plane Magnetoelastic Waves	233
5.3.3	Reflected Magnetoelastic Waves. Emergence of Accompanying Surface Magnetoelastic Vibrations	235
5.4	Elastic-Spin Surface Shear Wave in a Ferromagnetic Half-Space	238
5.5	Propagation of Surface Interrelated Elastic and Spin Waves in a Piecewise Homogeneous Ferromagnetic Half-Space	245
5.5.1	The Case of a Magnetoelastic Medium Composed of Two Ferromagnetic Half-Spaces	245
5.5.2	Magnetic and Magnetoelastic Homogeneous and Inhomogeneous Waves	247
5.5.3	The Problem Solution	249
