

Contents

1	Electrochemical Fundamentals of Corrosion and Corrosion Protection	1
1.1	Introduction of Corrosion Electrochemistry	1
1.2	Electrochemical Model of Corrosion	2
1.3	Local Cell Model of Corrosion	4
1.4	Classification of Corrosion	6
1.4.1	Wet Corrosion and Dry Corrosion	6
1.4.2	Homogeneous Corrosion and Heterogeneous Corrosion	7
1.4.3	Enhancement of Corrosion by the Mechanical Action	8
1.5	Corrosion Protection	9
1.5.1	Anodic and Cathodic Protection	9
1.5.2	Corrosion Inhibitor	12
1.6	Atmospheric Corrosion of Steels and Surface Layer of Oxides and Corrosion Products	12
1.7	Hydrogen Entry into Steels and Delayed Failure	14
1.8	Summary	15
	References	15
2	Electrochemical Measurement of Wet Corrosion	17
2.1	Electrochemistry Related to the Corrosion Process	17
2.2	Redox Potential of Metals and Potential-pH Diagram	18
2.2.1	Electrochemical Potential and Equilibrium Potential	19
2.2.2	Equilibrium Potential of Metal/Metal Ion Reaction	20
2.2.3	Equilibrium Potential of Metal/Metal Oxide Reaction	21
2.2.4	Equilibrium of Metal Ion/Metal Oxide Reaction	21
2.2.5	Potential-pH Diagram of Iron	22
2.2.6	Prediction of Corrosiveness from the Potential-pH Diagram	23
2.2.7	Comparison of Current-Potential Relation with Potential-pH Diagram	24

2.3	Estimation of Corrosion Rate from Electrochemical Measurement	25
2.4	Tafel Plot	25
2.4.1	Estimation of Corrosion CD from Extrapolation of Tafel Lines	26
2.4.2	Limitation of Tafel-Line Extrapolation	27
2.5	Linear Polarization Resistance	29
2.5.1	Measurement of Linear Polarization Resistance	30
2.5.2	Requirement of Period (or Frequency) and Amplitude	31
2.5.3	“K” Value for Calculation of Corrosion Rate	33
2.6	AC Impedance	34
2.6.1	Differential AC Impedance	34
2.6.2	Electric Elements Constructing Impedance	35
2.6.3	Equivalent Circuit and Frequency Response	37
2.7	Summary	38
	References	38
3	Identification of Passive Films and Corrosion Products	41
3.1	Detection Techniques of Surface Compounds	41
3.2	In Situ Analytical Methods by Using Optical Reflection Techniques	44
3.2.1	Optical Reflection	45
3.2.2	Ellipsometry and Differential Reflectance	47
3.3	Molecular Vibration Spectroscopy	50
3.4	Photoexcitation Technique	55
3.5	Ex-Situ Measurement by Using Electron Spectroscopy	59
3.5.1	X-Ray Photoelectron Spectroscopy (XPS)	59
3.5.2	Auger Electron Spectroscopy (AES)	60
3.6	Summary	61
	References	62
4	Electrochemical Measurement of Atmospheric Corrosion	65
4.1	Electrochemistry in a Thin Solution Layer on Metal Electrode	65
4.2	Electrochemical Measurement Cell Under Thin Electrolyte Film	66
4.2.1	Electrochemical Cell	66
4.2.2	Control of the Solution Film Concentration and Thickness	67
4.3	Electrochemical Impedance Under Thin Electrolyte Film	68
4.4	Example of Electrochemical Measurement Under a Thin Electrolyte Film	70
4.4.1	EIS Measurement	70
4.4.2	Polarization Curve Measurement Under a Thin Electrolyte Film	73

4.4.3	Pitting Corrosion Monitoring in Wet and Dry Cyclic Condition	74
4.4.4	Corrosion Monitoring in Real Seashore Environment [12].	75
4.5	Summary	77
	References	77
5	Hydrogen Embrittlement and Hydrogen Absorption	79
5.1	Delayed Failure by Corrosion	79
5.1.1	Delayed Failure and Hydrogen Embitterment	79
5.1.2	Hydrogen Absorption Induced by Corrosion	81
5.2	Detection of Hydrogen Absorbed in Metals	82
5.2.1	Methods for Detecting Hydrogen in Metal	82
5.2.2	Electrochemical Detection of Permeated Hydrogen Through Metals	84
5.2.3	Analysis of the Hydrogen Permeation Current	85
5.3	Measurement of Hydrogen Through the Steel by a Microelectrode	91
	References	94
6	Micro-electrochemical Approach for Corrosion Study	97
6.1	Heterogeneous Surface and Corrosion	97
6.2	Micro-electrochemical Techniques	98
6.2.1	Reducing Size of Electrode	98
6.2.2	Microelectrode Cell (MEC)	100
6.2.3	Microcapillary Cell (MCC)	101
6.2.4	Integration of Microelectrochemical Data	102
6.3	Scanning Microelectrode Techniques	104
6.3.1	Scanning Reference Electrode Technique (SRET)	105
6.3.2	Local Electrochemical Impedance Spectroscopy (LEIS) and Scanning Vibrating Electrode Technique (SVET)	107
6.3.3	Scanning Electrochemical Microscopy (SECM)	108
6.3.4	Deepening of Scanning Microelectrode Technique for Corrosion Research	112
	References	113

Electrochemistry for Corrosion Fundamentals

Ohtsuka, T.; Nishikata, A.; Sakairi, M.; Fushimi, K.

2018, IX, 116 p. 69 illus., 28 illus. in color., Softcover

ISBN: 978-981-10-6819-5
