

Contents

1	Introduction	1
1.1	Backgroud	1
1.2	Receptivity and Spectrum of Hypersonic Boundary Layers	1
1.3	Görtler Instability	4
1.4	G-Type/K-Type Streaks and Their Effects on Flow Transition	7
1.5	Thesis Outline and Motivation	8
	References	9
2	Methodology	15
2.1	Framework of the Stability Analysis	15
2.2	Governing Equations and the Base Flow	16
2.2.1	Governing Equations	16
2.2.2	The Base Flow	18
2.3	Stability Equations and Numerical Methods	20
2.3.1	Modal Stability: The Eigenvalue Problem	20
2.3.2	Algebraic Stability: The Singular Value Problem	22
2.3.3	PSE	23
2.3.4	Secondary Instability Equations	25
2.4	Adjoint Equations and Optimal Perturbations	26
2.4.1	Adjoint Equations	26
2.4.2	Optimal Perturbations	27
	References	28
3	Linear Instability	29
3.1	Discrete Spectrum of the Görtler Modes	30
3.2	Competition of the Multiple Görtler Modes	41
3.3	Conclusion	48
	References	49
4	Secondary Instability	51
4.1	Spatial Development of Görtler Vortices	51

4.2	The Secondary Instability	58
4.3	Conclusions	69
	References	71
5	Stabilization of the Hypersonic Boundary Layer	73
5.1	Perturbations in Hypersonic Boundary Layers	73
5.2	The Streaks	74
5.3	The Stabilization	78
5.4	Mechanisms of Stabilization	79
5.5	Nonlinear Effects	83
5.6	Conclusion	86
	References	86
6	Conclusions and Outlook	87
Appendix A: Expressions for the Operators in the Stability		
	Equation	89

Secondary Instabilities of Görtler Vortices in High-Speed
Boundary Layers

Mechanisms and Flow Control on Laminar-Turbulent
Transition

Ren, J.

2018, XVIII, 94 p. 51 illus., 41 illus. in color., Hardcover
