1	Introduction	1
1.1	The Significance of Wireless Monitoring Technology for Sleep Apnoea and MIMO	1
1.2	The Hypothesis and Motivation of the Book	3
1.3	Outline of the Book	7
1.4	Conclusion	11
	References	12
 Part I Wireless Monitoring Technology and MIMO in WBAN		
2	Vision of the Wireless Monitoring Techniques in Sleep Apnoea	15
2.1	Introduction	15
2.2	Traditional Sleep Monitoring Systems	17
2.2.1	Cable Based System	17
2.2.2	Wireless System	18
2.3	Challenges and Limitations of Current Monitoring Systems	20
2.4	Motivations for a Novel Microwave Sleep Apnoea System	21
2.5	Conclusion	22
	References	23
3	Wireless Monitoring of Sleep Apnoea Patients	25
3.1	Overview of the Main Physiological Parameters for Diagnosis of Sleep Apnoea	26
3.1.1	Electroencephalogram (EEG)	27
3.1.2	Electrocardiogram (ECG)	27
3.1.3	Electrooculogram (EOG)	28
3.1.4	Electromyogram (EMG)	29
3.2	Sleep Apnoea Detection	29
3.3	Wireless Monitoring Technologies for Sleep Apnoea	31
3.3.1	Sleep Apnoea Monitoring	34

3.3.2	RF-Based Monitoring System	35
3.3.3	Conclusion and Motivation	36
	References	38
4	Background of MIMO in Sleep Apnoea Monitoring	41
4.1	Introduction	41
4.2	Existing Work on Sleep Apnoea Monitoring Systems	42
4.3	WBANs and Its Challenges in Sleep Apnoea Monitoring System	43
4.4	Propagation Channel Model for WBAN	46
4.4.1	Channel Model Scenarios for Dynamic WBAN System	46
4.4.2	Statistical Fading Channel Model for WBAN	48
4.5	MIMO in Wireless Communication	50
4.6	MIMO in WBAN Communication	52
4.6.1	MIMO Channel Model for WBAN	53
4.7	Cooperative Communications	54
4.8	Network Coding Techniques	55
4.9	Proposed Research for Wireless Sleep Apnoea Monitoring	56
4.10	Conclusion	57
	References	58
5	Network Coding Techniques in WBAN	63
5.1	Introduction	63
5.2	Energy-Efficient Network Coding Techniques for Dynamic WBAN System	64
5.3	Network Coding Enhances Throughput	67
5.3.1	Network Coding for Reliable Handling of Data from Large Numbers of Sensors	69
5.3.2	Network Coding Techniques for Very Highly Fading or Dynamic Environments	70
5.4	Outage Probability Analysis of Sensor Cooperation	71
5.5	Conclusion	73
	References	74
 Part II RF Wireless On-Body Sensor Designs		
6	Wireless On-Body Sensor Architecture	79
6.1	Introduction	79
6.2	Overview	80
6.3	System Architecture	82
6.3.1	Layer 1: On-Body Patch Antenna	82
6.3.2	Layer 2: Passive High Selectivity BPF	83
6.3.3	Layer 3: Integrated ECG Detection and Frequency Upconversion Circuits	83

6.3.4	Layer 4: Electrode and Power Management	84
6.3.5	System Integration	84
6.3.6	System Integration Considerations	85
6.4	Biomedical Signal Sensing	85
6.4.1	ECG Signal Acquisition	86
6.4.2	ECG Detection Circuit Design	87
6.5	Frequency Planning	93
6.5.1	Frequency Upconversion	94
6.5.2	Bandpass Filters	96
6.6	Proposed Wireless Power Supply for On-Body Transducer	97
6.7	Conclusion	98
	References	99
7	Microstrip Bandpass and Low-pass Filters	101
7.1	Overview	101
7.2	Application Background	102
7.3	Design Considerations of Wireless Sleep Apnoea Monitoring System	103
7.4	Compact Ring Resonator	104
7.5	Inter-digital and Spiral DGSs	107
7.6	Integrated DGS Engineered Ring Resonator Filter	109
7.7	Equivalent Circuit of Bandpass Filter	110
7.8	Performance Analysis	113
7.8.1	Ring Resonator	113
7.8.2	Inter-digital DGS and Improved Selectivity of BPF	114
7.8.3	Spiral DGS	115
7.8.4	Inter-digital and Spiral DGSs Engineered BPF	115
7.8.5	Group Delay Investigation	116
7.9	Bandpass Filter Performance	117
7.10	Summary—Part A	117
7.11	Overview	119
7.12	Design of Novel Microwave Low-pass Filters Using Compact Microstrip Resonant Cell and Defected Ground Structure	120
7.12.1	Application Background	120
7.12.2	Design Theory and Equivalent Circuit—First Prototype	121
7.12.3	Filter Realization and Discussion—First Prototype	123
7.12.4	Simulated and Measured Results—First Prototype	125
7.12.5	Low Profile Microwave Low-pass Filter—Second Prototype	126
7.13	Design of Novel Microwave Low-pass Filters Using Split Ring Resonator and Complementary Split Ring Resonator	129
7.13.1	Split Ring Resonator and Complementary Split Ring Resonator	129

7.13.2	Characteristics of SRR, CSRR and SRR-CSRR	130
7.13.3	Design of Low-pass Filter	133
7.13.4	Measurement Results	134
7.14	Summary—Part B	135
	References	136
8	Wearable Antenna Design and Signal Propagation	141
8.1	Introduction	141
8.2	Shape and Material Considerations of Patch Antennas	143
8.3	Feeding Methods	144
8.4	Cavity Model Analysis of Circular Microstrip Patch Antenna	144
8.5	Fields and Currents Analysis of Circular Microstrip Patch Antenna	145
8.6	Resonant Frequency	148
8.7	Radiation Pattern	149
8.8	Input Impedance	151
8.9	Antenna Gain	151
8.10	Design of Circular Patch Antenna	152
8.10.1	Design Procedure	152
8.10.2	Antenna Prototype	153
8.11	Simulation and Measurement	153
8.11.1	Evaluation of Antenna Gain	155
8.11.2	2.43 GHz Circular Patch Antenna	156
8.11.3	5.8 GHz Circular Patch Antenna	157
8.12	Propagation Characteristics of 5.8 GHz Radio Wave in Wireless Body Area Network Environment	159
8.12.1	Introduction	159
8.12.2	5.8 GHz Signal Propagation Trials	160
8.12.3	Free Space	160
8.12.4	Propagation Test	161
8.12.5	Experimental Results—Return Loss	162
8.12.6	Experimental Results—Radiation Pattern	163
8.12.7	Experimental Results—Antenna Gain	164
8.13	Dual-Band Wearable Antenna	166
8.13.1	Antenna Geometry	166
8.14	Frequency-Reconfigurable Flexible Antenna	167
8.15	Embroidery Flexible Antenna	169
8.16	Conclusion	171
	References	171
9	Power Amplifier and Oscillator Design for Wireless Power Transmission	173
9.1	Introduction	173

9.2	Design Principles of Power Amplifiers and Oscillators	174
9.2.1	Classification of Power Amplifiers	174
9.2.2	Power Amplifiers	175
9.2.3	Oscillators	177
9.3	Design of Class AB Power Amplifiers	178
9.3.1	Operating Point and DC Biasing	178
9.3.2	Load-Pull Analysis and I/O Impedance Matching	181
9.3.3	Results	184
9.4	Design of Class E Oscillators	186
9.4.1	Operating Point	186
9.4.2	Design of Schematics	186
9.4.3	Results of Harmonic Balance Analysis and Transient Analysis	187
9.4.4	Circuit Layout	188
9.4.5	Measured Results	190
9.5	Inaccuracy of IC Fabrication	191
9.6	Conclusion	192
	References	192

Part III Virtual MIMO in WBAN

10	MIMO Implementation Using FPGA	197
10.1	Introduction	197
10.2	Performance Investigation of MIMO Using Alamouti STBC in WBAN Channel	198
10.2.1	Space-Time Coding	198
10.3	FPGA Implementation of MIMO Wireless Communication System	200
10.3.1	Implementation of Alamouti Transmitter Using FPGA	201
10.3.2	Implementation of Alamouti Receiver Using FPGA	202
10.4	Results and Discussion	204
10.4.1	BER Performance of MIMO Using Alamouti STBC in WBAN Channel	204
10.4.2	FPGA Implementation of MIMO	206
10.5	Conclusion	210
	References	211
11	Correlation Coefficient Measurement for WBAN Channels	213
11.1	Introduction	213
11.2	Diversity and Correlation Coefficient	214
11.2.1	Antennas for WBAN Applications	215
11.3	Practical Implementation	216

11.3.1	Patch Antenna Design	216
11.3.2	Experiment Setup and Procedure	218
11.4	Experimental Results	220
11.4.1	Antenna Performance	221
11.4.2	Antenna Radiation Pattern Measurement	222
11.4.3	Calculation of Correlation Coefficient	222
11.5	Conclusion	224
	References	225
12	Cooperative Communication in WBAN	227
12.1	Introduction	227
12.2	Background of Virtual MIMO and Relay Protocol in WBAN System	228
12.3	Log-Likelihood-Ratio (LLR)	229
12.4	Sensor Cooperation in WBAN	230
12.4.1	Sensor Cooperation Using LLR-Based Network Coding in WBAN	231
12.4.2	LLR-Based Amplify-and-Forward (AF) Protocol in WBAN	235
12.4.3	LLR-Based Decode-and-Forward (DF) Protocol in WBAN	239
12.4.4	LLR-Based Estimate-and-Forward (EF) Protocol in WBAN	241
12.4.5	Distributed Space-Time Coding (DSTC) Protocol in WBAN	245
12.5	Simulation Results and Discussion	247
12.5.1	Performance Comparison of Network Coding and DSTC-Based Cooperative Communication	250
12.6	Conclusion	250
	References	252
13	Software and Hardware Design of Virtual MIMO in WBAN	255
13.1	Introduction	255
13.2	WBAN Sensor Node	256
13.2.1	2.4 GHz Transceiver	257
13.3	Software and Hardware Design for Virtual MIMO Implementation	258
13.3.1	Time Slot Is Controlled by the Sensor Nodes	259
13.3.2	Time Slot Is Controlled by the Base Station	263
13.4	Results and Discussion	266
13.5	Conclusion	270
