

Contents

1	Introduction	1
	References	2
2	Fragility Curves	3
2.1	Historical Background	3
2.2	Structural Types	10
2.3	Earthquake Records	11
2.4	Simulation Methods	19
2.4.1	Nonlinear Static Analysis	19
2.4.2	Nonlinear Dynamic Analysis	20
2.5	Performance-Based Seismic Design (PBSD)	22
2.6	Methods to Develop Fragility Curves	23
2.6.1	Expert-Based Method	23
2.6.2	Empirical Method	25
2.6.3	Analytical Method	25
2.6.4	Hybrid Method	26
	References	26
3	Moment-Resisting Frames (MRFs)	31
3.1	Structural Model	31
3.2	Design Loads	31
3.3	Ground Motion Records	34
3.4	Development of Elastic Response Spectrum	35
3.5	Scaling for Ground Motion Records	36
3.6	Fragility Curve	36
	References	38

4 Performance of MRFs Due to Nonlinear Analysis	39
4.1 Performance of Regular and Irregular MRF Due to POA	39
4.1.1 Capacity Curves	39
4.1.2 Plastic Hinges	41
4.1.3 Interstorey Drift	45
4.2 Performance of Regular and Irregular MRFs Due to IDA	48
4.2.1 Near-Field (NF) Ground Motion Records	48
4.2.2 Far-Field (FF) Ground Motion Records	50
4.3 Fragility Curve	52
4.3.1 Fragility Curve for Near-Field (NF) Ground Motion Records	54
4.3.2 Fragility Curve for Far-Field (FF) Ground Motion Records	60
References	64
5 Closing Remarks	65
Appendix A: Design of Regular and Irregular Moment-Resisting Concrete Frames (MRCF)	67
Appendix B: Design of Regular and Irregular Moment-Resisting Steel Frames (MRSF)	87
Bibliography	111
Index	113

Seismic Fragility Assessment for Buildings due to
Earthquake Excitation

NAZRI, F.M.

2018, VIII, 114 p. 38 illus., 32 illus. in color., Softcover

ISBN: 978-981-10-7124-9
