

CONTENTS

J. McCarthy, A formal description of a subset of ALGOL	1
A. van Wijngaarden, Recursive definition of syntax and semantics	13
T. B. Steel Jr., A formalization of semantics for programming language description	25
A. Caracciolo, On the concept of formal linguistic systems	37
J. Eickel and M. Paul, The parsing and ambiguity problem for Chomsky-languages	52
K. Culik, Well-translatable grammars and ALGOL-like languages	76
S. Ginsburg, A survey of ALGOL-like and context-free language theory	86
M. P. Schützenberger, Classification of Chomsky languages	100
K. Walk, Entropy and testability of context-free languages	105
N. Rochester, A formalization of two-dimensional syntax description	124
J. V. Garwick, The definition of programming languages by their compilers	139
M. Nivat and N. Nolin, Contribution to the definition of ALGOL semantics	148
C. C. Elgot, Machine species and their computation languages	160
C. Böhm, The CUCH as a formal and description language	179
C. Strachey, Towards a formal semantics	198
P. Z. Ingerman, The parameterization of the translation process	221
R. B. E. Napper, A system for defining language and writing programs in "natural English"	231
S. Gorn, Language naming languages in prefix form	249
P. J. Landin, A formal description of ALGOL 60	266
F. G. Duncan, Our ultimate metalanguage	295
Bibliography	300
