

Table 5.7: Probability values for ANOVAs for data on root length of beech and Norway spruce at the root windows at different sites for three sampling dates.

| Source of variation | Primary roots | | | Higher order roots | | |
|---------------------|---------------|--------|--------|--------------------|--------|--------|
| | 04/95 | 10/95 | 04/96 | 04/95 | 10/95 | 04/96 |
| Sites (gradient) | <0.001 | <0.001 | <0.001 | <0.001 | <0.001 | <0.001 |
| Tree species | 0.108 | <0.001 | <0.001 | <0.001 | 0.206 | 0.755 |
| Site x tree species | 0.012 | 0.002 | <0.001 | 0.003 | <0.001 | <0.001 |
