

Contents

List of frequently used symbols	XII
List of abbreviations	XIV
I Survey (Bernhard Kramer)	1
1 Survey of mesoscopic quantum transport	1
1.1 Summary of semi-classical description of electrical transport	1
1.1.1 Semi-classical electron transport	2
1.1.2 Characteristic length scales	3
1.1.3 Conditions for mesoscopic behaviour	4
1.2 Summary of low temperature quantum transport	5
1.3 Description of the experimental observations	6
1.3.1 Quantum corrections to metallic conductivity	6
1.3.2 Aharonov-Bohm oscillations of magneto-resistance	7
1.3.3 Conductance fluctuations	8
1.3.4 The quantum Hall effect	10
1.3.5 Resistance quantization in mesoscopic point contacts	12
1.3.6 Conductance oscillations in quantum dots	13
1.3.7 Persistent currents in non-superconducting rings	16
1.4 References for Section 1	17
Reference key and author index for Part I	19
II Quantum point contacts (David Wharam)	22
2 Overview of systems	22
2.1 Si-based systems	23
2.2 AlGaAs/GaAs heterostructures	24
2.3 Other III-V and metallic systems	25
2.4 Preparation and structuring	25
2.5 References for Section 2	27
3 Quantized transport	28
3.1 Overview of the theory	28
3.1.1 The adiabatic model	28
3.1.2 The Wide-Narrow-Wide geometry	29
3.1.3 Quantization	30
3.1.4 Finite temperature	33
3.1.5 Sample geometry	33
3.1.6 Magnetic field	36
3.1.7 Impurities	38
3.1.8 Interactions	40
3.1.9 Electron spin	42
3.1.10 Non-linear effects	42
3.1.11 Series configurations	44
3.1.12 Electromagnetic environment	45
3.1.13 Thermal transport properties	45
3.1.14 Superconducting weak links	47

3.2	Quantization	47
3.3	Finite temperature	48
3.4	Sample geometry	49
3.5	Magnetic field	53
3.6	Impurities	57
3.7	Interactions	59
3.8	Electron spin	60
3.9	Statistical properties	61
3.10	Non-linear effects	62
3.11	Thermal transport properties	68
3.12	Coulomb blockade	69
3.13	Superconducting QPCs	70
3.14	Effect of radiation	71
3.15	References for Section 3	72
4	Frequency- and time-dependent effects	77
4.1	Overview of the theory	77
4.1.1	Frequency-dependent effects in quantized transport	78
4.1.2	Photon-assisted tunneling	78
4.1.3	Infrared absorption	80
4.1.4	Surface acoustic wave spectroscopy	82
4.1.5	Noise phenomena	82
4.2	Frequency-dependent effects in quantized transport	84
4.3	Photon-assisted tunneling	85
4.4	Infrared absorption	86
4.5	Surface acoustic wave spectroscopy	87
4.6	Noise phenomena	87
4.7	References for Section 4	93
5	Applications	95
5.1	Transport applications	95
5.2	High-frequency devices	96
5.3	References for Section 5	99
	Reference key and author index for Part II	100
III	Quantum Wires (Andrea Fechner)	109
6	Overview over systems	109
6.1	Si-based systems	109
6.2	AlGaAs/GaAs-heterostructures	109
6.3	Quantum wires based on other III-V and II-VI materials	110
6.4	Preparation and structuring	110
6.5	Characterization	111
6.6	References for Section 6	112
7	Single wires	115
7.1	Geometrical quantization	116
7.1.1	Magnetic depopulation	116
7.1.2	Quantized conductance	118
7.2	Fermi energy	124
7.2.1	Aperiodic conductance fluctuations	124

7.2.2	Periodic conductance oscillations	130
7.3	Finite temperature	132
7.3.1	Conductance in general	132
7.3.2	Conductance fluctuations and oscillations	134
7.3.3	Magneto resistance	136
7.3.4	Phase coherence length	138
7.3.5	Current heating	142
7.4	Sample geometry	144
7.4.1	Width and length	144
7.4.2	Crossed-wire junctions	150
7.4.3	Special geometries	152
7.5	Impurities	157
7.5.1	General	157
7.5.2	Boundary scattering	159
7.6	Interactions	162
7.6.1	Electron–electron interaction	162
7.6.2	Electron–phonon interaction	165
7.6.3	Spin–orbit interaction	167
7.7	Magnetic field	167
7.7.1	General	167
7.7.2	Weak localization	176
7.7.3	Aperiodic conductance fluctuations	182
7.7.4	Shubnikov–de–Haas oscillations	194
7.7.5	Quantum Hall effect	200
7.7.6	Bend resistance	206
7.8	Electron spin	209
7.9	Non–linear effects	210
7.10	Localization	212
7.11	References for Section 7	214
8	Lateral superlattices	224
8.1	Geometrical quantization	224
8.1.1	Magnetic depopulation	224
8.1.2	Quantized conductance	226
8.2	Finite temperature	228
8.2.1	Conductance in general	228
8.2.2	Magneto resistance	229
8.2.3	Phase coherence length	230
8.2.4	Current heating	232
8.3	Sample geometry	232
8.3.1	Width and length	232
8.3.2	Special geometries	233
8.4	Impurities	234
8.4.1	General	234
8.4.2	Boundary scattering	234
8.5	Interactions	234
8.5.1	Electron–electron interaction	234
8.5.2	Electron–phonon interaction	235
8.6	Magnetic field	236
8.6.1	General	236
8.6.2	Weak localization	241
8.6.3	Aperiodic conductance fluctuations	243

8.6.4	Shubnikov–de–Haas oscillations	244
8.6.5	Quantum Hall effect	246
8.7	Non–linear effects	246
8.8	Localization	247
8.9	References for Section 8	249
9	Isolated rings	251
9.1	Impurities	251
9.2	Interactions	251
9.3	Magnetic field	251
9.3.1	Persistent current	251
9.4	References for Section 9	254
10	Connected rings	255
10.1	Quantized conductance	255
10.2	Finite temperature	255
10.3	Sample geometry	259
10.3.1	Width and length	259
10.3.2	Special geometries	260
10.4	Impurities	262
10.5	Interactions	262
10.6	Magnetic field	262
10.6.1	General	262
10.6.2	Magnetostatic Aharonov–Bohm effect	264
10.7	Non–linear effects	273
10.8	Electrostatic Aharonov–Bohm effect	274
10.9	Dispersion relation	275
10.10	Indium oxide rings	275
10.11	References for Section 10	280
11	Frequency– and time–dependent effects	282
11.1	Single wires	282
11.1.1	Photoconductivity	282
11.1.2	Photovoltaic effect	284
11.1.3	Acoustoelectric current	284
11.1.4	Noise	285
11.1.5	Higher harmonic generation and rectification	288
11.2	Lateral superlattices	288
11.2.1	Microwave transmission	288
11.2.2	Photoconductivity	288
11.3	Isolated rings	289
11.3.1	Complex conductance	289
11.4	Connected rings	289
11.4.1	Photovoltaic effect	289
11.4.2	Noise	292
11.4.3	Higher harmonic generation	293
11.5	References for Section 11	294

12 Overview of the theory	296
12.1 Quasi-1D ideal quantum wires	296
12.2 Impurity scattering and localization	296
12.3 Electrical Transport and quantum transmission	298
12.3.1 Recursive Green function method	298
12.3.2 Conductance and quantum transmission	299
12.3.3 The Thouless conjecture	300
12.4 Conductance fluctuations	300
12.5 Persistent currents	301
12.6 Electron-electron interaction	302
12.7 Monographs and edited volumes	303
12.8 References for Section 12	304
 Reference key and author index for Part III	 307
