

No. 2B-9 LiTaO₃–HTaO₃

2a	Proton-exchange with controlled acidity (review paper): see	90Gan
	Proton-exchange in melts of acids and acidic salts: see	89Gan
	Proton-exchange by pyrophosphoric acid: see	92Yam
3a	Lattice constants of the proton-exchanged waveguides formed on domain-inverted crystal: see	94Kon
9a	Anomalous refractive index change and recovery of electrooptic coefficient r_{33} in proton-exchanged optical waveguides after annealing: see	92Yuh
	Postfabrication changes and dependence on hydrogen concentration of the refractive index of proton-exchanged crystal: see	94Ah11
e	Nonlinear optical properties of proton-exchanged waveguide: see	94Ah12
10a	New low frequency Raman modes from proton-exchanged LiTaO ₃ : see	95WuX
15a	Domain inversion by heat treatment in proton-exchanged LiTaO ₃ : see	93Nak
16	Fabrication of periodically inverted domain structures using proton-exchange: see	92Mak
	Fabrication of periodically domain-inverted structure by proton-exchange with pyrophosphoric acid: see	92Miz
	Characteristics of periodically domain-inverted (by proton-exchange) waveguides for second harmonic generation: see	91Yam
	Fabrication of periodically domain-inverted structure by proton-exchange and heat treatment: see	91Miz
