This documentation, in particular all previous editions, were made possible with the resources and support of the German Remote Sensing Data Center (DFD). My special thanks go to DLR/DFD for the opportunity to complete the 4th edition.

This book is again dedicated to my wife Mechtild  
and to our daughters Monika, Ursula and Mechtild.

My family provided unequivocal support in my long-term book-writing efforts.  
It is the reason why this edition could be completed.
