

Installing the Play-Engine

The Play-Engine is installed from the installation CD on to the local drive of your workstation. The installation process automatically adds the Play-Engine to the **Start → Programs** menu.

➤ **To install the Play-Engine:**

- 1** Insert the Play-Engine installation CD into the CD drive. In Windows Explorer, double-click the CD-ROM directory. The folders and files for the Play-Engine are displayed.
- 2** If the workstation operating system is Windows 98 or NT, double-click **setup.exe** in the file list. If the operating system is Windows 2000, XP or higher, double-click **Play In Scenario Engine.msi**. The Play-Engine Setup Wizard is displayed.
- 3** Follow the steps presented to install the application.
- 4** When you have completed the installation, click **Close**.

Play-Engine On-Line Registration

After the Play-Engine is successfully installed, you have to register your copy, to be able to use it.

➤ **To register the Play-Engine:**

- 1** Click **Help->Get Registration Info**, and write down the key that is displayed by the Play-Engine.
- 2** Click **Help->Play-Engine On Line**, and follow the registration instructions on the web page. During this process you have to enter your email and the key you wrote down, and in return, a license number will be sent to you.
- 3** Click **Help->Register**, and enter your license number.
- 4** The registration process is completed. You can now use the Play-Engine.
