

Page 50. Figure 9. The fluorescence intensity images (up panels) and the fluorescent lifetime images (lower panels) of CFP in the L929 cell expressing both the CFP-hsp27 and YFP-p38 fusion proteins before and after stimulation by 10 μ M arachidonic acid.

Page 50. Figure 10. The fluorescence intensity images (up panels) and the fluorescent lifetime images (lower panels) of CFP in the L929 cell expressing both the CFP-hsp27 and YFP-p38 fusion proteins and in the presence of 100 nM wortmannin, the PI3K inhibitor, after stimulation by 10 μ M arachidonic acid.
