

Fig. 26A-5-001. BaNiF₄. χ_{magn} vs. T [70Cox]. Open circles: $H \parallel b$; full circles: $H \perp b$.

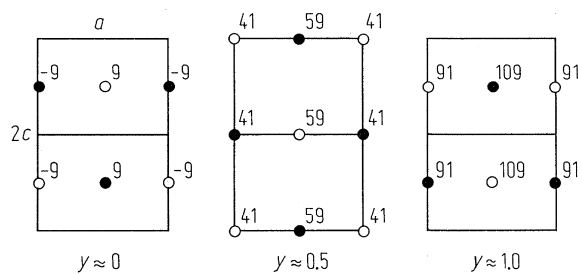

Fig. 26A-5-002. BaNiF₄. Magnetic structure [70Cox]. Open and closed circles depict oppositely directed moments along the b axis. Small numerals denote height in units of $0.01 b$. Only Ni ions are shown.
