

Logic Selection Guide

June 2000

FAIRCHILD
SEMICONDUCTOR™

Product Overview

The availability of logic products is vast and dynamic. New family offerings are introduced almost every year, even as many manufacturers are reducing their product portfolios. There are sometimes only subtle differences between logic families. With so many options available, it can be hard to know which family or families can best support or differentiate your application.

This easy-to-use *Logic Selection Guide* provides an overview of Fairchild Logic offerings. It will help you choose the best solution for your design.

To use the Guide, select the attribute that is of most concern for you—switching speed, power consumption, drive capability, noise immunity—and note the comparative family information. Then use other criteria to fine-tune your selection.

Fairchild Semiconductor has the right logic solution:

- *Broad range of logic*—get the performance you want
- *Long-term family support*—extend the life of your designs
- *Migration paths*—differentiate your high-performance systems with easy upgrades
- *Responsiveness to market needs*—get the function, specification, and packaging that you need. For example, our *CROSSVOLT™* low-voltage series provides translation capabilities for mixed-voltage applications, while TinyLogic™ delivers the space savings necessary for today's shrinking platforms.
- *Value*—obtain the right performance/availability/reliability/price solution from our broad portfolio of products

For quick response to your technical questions and literature needs visit: www.fairchildsemi.com

Fairchild Logic Families

Product Life Cycle

Product Portfolio and Description

	Buffers / Line Drivers	Transceivers	Registers / Flip-Flops	Latches	Counters	Multiplexers	Comparators	Parity Generator / Checker	FIFOs / Demultiplexers	Gates	Video Support	Voltage Translators	25Ω Series Resistor Options	Bus Switches	Boundary Scan (IEEE 1149.1)	16- 18- 32-bit Functions	8- 10- 12-bit Functions	1-bit Functions
BiCMOS																		
ABT	●	●	●	●			●					●		●	●	●	●	<ul style="list-style-type: none"> High speed, high drive and low noise for superior system performance
LVT	●	●	●	●								●			●	●		<ul style="list-style-type: none"> High-speed, high-drive logic for 3.3V applications
CMOS																		
CROSSVOLT™ VCX	●	●	●	●						●		●			●	●		<ul style="list-style-type: none"> High-speed CMOS enables interoperability between 3.3V and 2.5V systems, with 3.6V-tolerant inputs and outputs
LCX	●	●	●	●		●		●		●		●			●	●		<ul style="list-style-type: none"> 5V-tolerant inputs and outputs Ideal for 3.3V applications requiring balanced drive capability, high speed, and low noise
LVX	●	●	●	●	●	●		●		●		●		●		●		<ul style="list-style-type: none"> 5V input tolerance allows 5V CMOS to interface with 3.3V systems. Includes specialized dual voltage translators and bus switch devices.
FACT™ AC/ACT	●	●	●	●	●	●	●	●	●	●	●					●		<ul style="list-style-type: none"> General-purpose / broad-portfolio AC MOS family
FACT Quiet Series™ ACQ/ACTQ	●	●	●	●			●			●				●	●	●		<ul style="list-style-type: none"> Family extension specifically designed for noise-sensitive applications. Proprietary circuitry guarantees low EMI and low device-generated noise.
Fairchild Switch FS						●				●		●	●	●	●	●		<ul style="list-style-type: none"> High-speed, high-impedance, low-resistance undershoot protected switches
VHC/VHCT	●	●	●	●	●	●		●		●						●		<ul style="list-style-type: none"> The natural migration for HCMOS users who need more speed for their low-power, low-noise, low-drive applications Offered in fine pitch packages
HC/HCT	●	●	●	●	●	●			●	●						●		<ul style="list-style-type: none"> The lowest CMOS device-generated noise and EMI available in the moderate speed performance range Not recommended for new designs
74C	●		●	●	●	●		●		●						●		<ul style="list-style-type: none"> Application-specific, high-voltage CMOS products for high-noise environments
CD4K	●		●	●	●	●		●		●						●		<ul style="list-style-type: none"> Standard high-voltage CMOS products for high-noise environments
TinyLogic™ HS										●						●		<ul style="list-style-type: none"> General-purpose single-gate logic
HST										●						●		<ul style="list-style-type: none"> TTL-compatible single-gate logic
UHS	●									●			●			●		<ul style="list-style-type: none"> High-performance single- and dual-gate logic with 5V over-voltage tolerance on inputs and outputs
Bipolar																		
FASTr™	●	●	●	●								●			●	●		<ul style="list-style-type: none"> Fastest TTL logic available A speed-improved, design-enhanced version of FAST®
FAST®	●	●	●	●	●	●	●	●	●	●		●				●		<ul style="list-style-type: none"> The best speed to power portfolio of Advanced Schottky TTL families
AS	●	●	●	●	●	●		●		●						●		<ul style="list-style-type: none"> A high-speed, high-drive TTL family Not recommended for new designs
ALS	●	●	●	●	●	●	●		●		●					●		<ul style="list-style-type: none"> Low output noise and the lowest power consumption of any advanced TTL logic family
LS / S / TTL	●	●	●	●	●	●		●	●	●	●					●		<ul style="list-style-type: none"> Well-known, mature logic families for which Fairchild provides long-term support Not recommended for new designs
ECL																		
300 Series	●	●	●	●	●	●	●	●		●	●					●		<ul style="list-style-type: none"> Easiest to use ECL with the lowest power and best price / performance of any ECL family Socket replacement of F100K 100 Series
