

User Instructions

The CD-ROM version of the [Springer Handbook of Engineering Statistics](#) contains a PDF version of the book. The Acrobat Reader (Adobe) tools allow the user to read, search, navigate, zoom etc. through the book. An especially useful tool is the **full text search** which allows users to search throughout the entire book. The Acrobat Reader offers comprehensive **online help** for working with the tools.

To enable all the features of this PDF files we recommend the use of Acrobat Reader 7.0 with search function.

The following features of the document are available for navigation:

- The **bookmarks** provide access to all parts of the book. You can directly choose chapters, sections etc.
- Cross-references to sections, figures, tables, literature and equations are **link-enabled** and are shown in blue in the text.
- The text passages can be accessed directly from the subject index by clicking on the respective page number.
- The Tables of Contents and the List of Tables are fully linked to the chapters and sections.
- Abbreviations in the text are linked to the List of Abbreviations.
- By clicking on a reference number in the “References” at the end of each chapter you will be led to the place where it is cited from the text. If it is cited several times a selection box with the corresponding pages will open.

Please note the “back” button of Acrobat Reader.
