

## About the Authors

**Susan L. Albin**

Rutgers University  
Department of Industrial and Systems  
Engineering  
Piscataway, NJ, USA  
[salbin@rci.rutgers.edu](mailto:salbin@rci.rutgers.edu)

Chapter B.12

Susan L. Albin is professor and director of the Graduate Program of Industrial and Systems Engineering at Rutgers University. Dr. Albin's area of research is quality engineering, multivariate statistics, process control, and data mining. Her work has been applied in semiconductor manufacturing, plastics recycling, food processing, and medical devices and has been supported by NSF, FAA, DOD, and industrial organizations. Dr. Albin is secretary of INFORMS and Focus Issue editor for IIE Transactions on Quality and Reliability Engineering.

**Suprasad V. Amari**

Senior Reliability Engineer Relex Software  
Corporation  
Greensburg, PA, USA  
[suprasad.amari@relex.com](mailto:suprasad.amari@relex.com)

Chapter F.54

Dr. Amari is a senior reliability engineer at Relex Software Corporation. He received both his M.S. and Ph.D. in reliability engineering from the Indian Institute of Technology, Kharagpur, India. He is an editorial board member of the International Journal of Reliability, Quality and Safety Engineering and International Journal on Performability Engineering, and management committee member of RAMS. He is an ASQ-certified reliability engineer and is a senior member of IEEE, IIE and ASQ.

**Y. Alp Aslandogan**

The University of Texas at Arlington  
Computer Science and Engineering  
Arlington, TX, USA  
[alp@cse.uta.edu](mailto:alp@cse.uta.edu)  
<http://ranger.uta.edu/~alp>

Chapter D.36

Dr. Aslandogan's main areas of research are biomedical informatics, data mining, multimedia information retrieval and visualization. He received his Ph.D. in computer science from the University of Illinois at Chicago in 2001. He has served and continues to serve on the technical program committees of IEEE International Conference on Information Technology and IEEE International Conference on Information Reuse and Integration. His recent research projects include a 3D change detection system for surface structures, a biomedical data mining web service and a concept-based multimedia search agent.

**Jun Bai**

JP Morgan Chase  
Card Services  
Wilmington, DE, USA  
[jun.bai@comcast.net](mailto:jun.bai@comcast.net)  
<http://www.stat.rutgers.edu/~jbai>

Chapter A.7

Dr. Jun Bai is a senior analyst at JP Morgan Chase Card Services. He obtained his Ph.D. in industrial and systems engineering from Rutgers – the State University of New Jersey in 2004. His research interests include warranty analysis, maintenance, reliability and applied statistics. Currently his research activities focus on risk management and statistical modelling in the financial industry.

**Jaiwook Baik**

Korea National Open University  
Department of Information Statistics  
Seoul, South Korea  
[baik@kno.ac.kr](mailto:baik@kno.ac.kr)

Chapter A.5

Jaiwook Baik received the Ph.D. degree from the Department of Statistics, Virginia Polytechnic Institute and State University in 1991. Since 1992 he has been with the Department of Information Statistics, Korea National Open University, where he is currently a professor of the same department. His current research interests include warranty data analysis and applications of quality control techniques to solve industrial problems. He is a member of the Korean Reliability Society and the Korean Society for Quality Management.

Amit K. Bardhan

University of Delhi – South Campus  
Department of Operational Research  
New Delhi, India  
[amit@or.du.ac.in](mailto:amit@or.du.ac.in)  
<http://people.du.ac.in/amit>

Chapter C.25

Amit Kumar Bardhan is a senior lecturer in the Department of Operational Research, University of Delhi – South Campus. He obtained his Ph.D. in operational research from University of Delhi in 2003. His Ph.D. thesis was judged the best thesis in O.R. of the year by the Operational Research Society of India. His research interests are mathematical modelling, quality and reliability analysis and marketing models.

Anthony Bedford

Royal Melbourne Institute of Technology  
University  
School of Mathematical and Geospatial  
Sciences  
Bundoora, Victoria, Australia  
[anthony.bedford@rmit.edu.au](mailto:anthony.bedford@rmit.edu.au)  
<http://www.rmit.edu.au/math-geo>

Chapter F.52

Dr. Bedford is a senior lecturer and researcher in statistics at Royal Melbourne Institute of Technology (RMIT) University. He completed his Ph.D. in 2003 on multi-priority finite buffer queueing models. His main areas of research are queueing theory in telecommunications systems, advances in medical statistics and sports statistics. He is also involved in postgraduate statistics research in occupation health and safety and the medical sciences.

James Broberg

Royal Melbourne Institute of Technology  
University  
School of Computer Science &  
Information Technology  
Melbourne, Victoria, Australia

Chapter F.52

James Broberg is currently a Ph.D. student working at Royal Melbourne Institute of Technology (RMIT) University, Melbourne (Australia). He is a member of the “Distributed Systems and Networking” discipline at RMIT, and has worked and published in the area of task assignment (e.g. scheduling policies) to enable effective load balancing and load sharing in distributed systems.

Michael Bulmer

University of Queensland  
Department of Mathematics  
Brisbane, Qld, Australia  
[m.bulmer@uq.edu.au](mailto:m.bulmer@uq.edu.au)  
<http://www.maths.uq.edu.au/~mrb>

Chapter A.5

Dr. Bulmer is a senior lecturer in mathematics and statistics at the University of Queensland. He obtained his Ph.D. from the University of Tasmania in 1996 on the topic of automated algebraic reasoning. His current research interests include computational methods in statistics and operations research, stochastic modelling in astrophysics, and mathematics and statistics education.

Zhibin Cao

Arizona State University  
Computer Science & Engineering  
Department  
Tempe, AZ, USA  
[zbcao@asu.edu](mailto:zbcao@asu.edu)  
<http://www.public.asu.edu/~zcaoz/>

Chapter C.24

Mr. Zhibin Cao received his M.S. degree from Computer Science & Engineering Department at Arizona State University. Currently he is a Ph.D. candidate in the department. He worked at Peiking University Research and Development Institute, China and at Bell-Labs China before joining Arizona State University. His research areas include software engineering, service-oriented computing, service-oriented modelling and model-based development.

Philippe Castagliola

Université de Nantes and IRCCyN UMR  
CNRS 6597 Institut Universitaire de  
Technologie de Nantes  
Qualité Logistique Industrielle et  
Organisation  
Carquefou, France  
[philippe.castagliola@univ-nantes.fr](mailto:philippe.castagliola@univ-nantes.fr)  
<http://philippe.castagliola.free.fr/>

Chapter B.17

Philippe Castagliola graduated (Ph.D. 1991) from the Université de Technologie de Compiègne, France (UTC). He is currently a professor at the IUT (Institut Universitaire de Technologie) de Nantes, France, and he is also a member of the IRCCyN (Institut de Recherche en Communications et Cybernétique de Nantes), UMR CNRS 6597. He is associate editor for the Journal of Quality Technology and Quantitative Management and for the International Journal of Reliability, Quality and Safety Engineering. His research activity includes developments of new SPC techniques (non-normal control charts, optimized EWMA type control charts, multivariate capability indices, and monitoring of batch processes).

**Giovanni Celano**

Chapter B.17

University of Catania  
Dipartimento di Ingegneria Industriale e  
Meccanica  
Catania, Italy  
[gcelano@diim.unict.it](mailto:gcelano@diim.unict.it)  
<http://www.diim.unict.it/users/gcelano/>

Giovanni Celano received his Ph.D. in 2003 from the University of Palermo for work on the sequencing of mixed model assembly lines. He is currently assistant professor of technology and manufacturing systems at the University of Catania, Italy. His research is focused on statistical quality control and production scheduling. He is a member of the AITEM and of the ENBIS.

**Ling-Yau Chan**

Chapter B.13

The University of Hong Kong  
Department of Industrial and  
Manufacturing Systems Engineering  
Hong Kong  
[plychan@hku.hk](mailto:plychan@hku.hk)  
<http://www.hku.hk/imse>

Dr. Chan's research areas include design of industrial experiments, optimal design, uniform design, statistical quality control, reliability, maintenance, quality management, and supply chain management. He has published over 80 papers in these areas, and is collaborating with scholars worldwide on various research topics. He is the head of the Department of Industrial and Manufacturing Systems Engineering, University of Hong Kong.

**Ted Chang**

Chapter D.31

University of Virginia  
Department of Statistics  
Charlottesville, VA, USA  
[tcc8v@virginia.edu](mailto:tcc8v@virginia.edu)  
<http://www.stat.virginia.edu/chang.html>

Ted Chang received his Ph.D. in mathematics from the University of California (Berkeley) in 1972. After about a decade of working in algebraic topology, he switched his research concentration to statistical problems in which geometry and symmetries play an important role. The primary applications of his work are in the estimation of the statistical errors in tectonic plate reconstructions, image reconstruction, and human motion data.

**Victoria Chen**

Chapter D.36

University of Texas at Arlington  
Industrial and Manufacturing Systems  
Engineering  
Arlington, TX, USA  
[vchen@uta.edu](mailto:vchen@uta.edu)  
<http://ie.uta.edu/index.cfm?fuseaction=professordescription&userid=1945>

Dr. Victoria Chen joined the University of Texas at Arlington in 2001. From 1993–2001 she was on the Industrial and Systems Engineering faculty at the Georgia Institute of Technology. She earned her Ph.D. in operations research and industrial engineering from Cornell University. Dr. Chen is co-founder of the Informatics Section on Data Mining and is currently serving as chair.

**Yinong Chen**

Chapter C.24

Arizona State University  
Computer Science and Engineering  
Department  
Tempe, AZ, USA  
[yinong.chen@asu.edu](mailto:yinong.chen@asu.edu)  
<http://www.public.asu.edu/~ychen10/>

Dr. Yinong Chen received his Ph.D. from the University of Karlsruhe, Germany. He worked at LAAS-CNRS, France, and at Wits University, South Africa, before joining Arizona State University. His research areas include dependable computing, software engineering, and service-oriented computing. He has coauthored five books and over 80 research papers in these areas.

**Peter Dimopoulos**

Chapter F.52

Royal Melbourne Institute of Technology  
University  
Computer Science and IT  
Melbourne, Australia  
[dimpet@cs.rmit.edu.au](mailto:dimpet@cs.rmit.edu.au)  
<http://www.cs.rmit.edu.au/~dimpet>

Peter is currently completing his Ph.D. in computer science at RMIT University (Royal Melbourne Institute of Technology) in the area of Internet congestion control. Prior to his Ph.D. he worked at Agilent Technologies and completed a double degree in computer science and computer systems engineering at RMIT University.

Fenghai Duan

Department of Preventive and Societal  
Medicine  
Omaha, NE, USA  
fduan@unmc.edu

Chapter D.33

Fenghai Duan was born in Heilongjiang, China. After completing his bachelor's degree in biochemistry at Fudan University in 1995, he received his master's degree in molecular biology from Institute of Biophysics, Academia Sinica in 1998. In the year 2000, Duan joined the Ph.D. program in biostatistics at Yale University and worked on his thesis in the lab of Professor Heping Zhang. Duan's doctoral dissertation was about the analysis of microarray experiments and was awarded the Ph.D. degree in May 2005. Currently, he is an assistant professor of the Department of Preventive and Societal Medicine at University of Nebraska Medical Center. His research interests are in the development of statistical methods for the analysis of high-dimensional biological data.

Veronica Esaulova

Otto-von-Guericke-University  
Magdeburg  
Department of Mathematics  
Magdeburg, Germany  
veronica.esaulova@gmail.com

Chapter C.20

Miss Esaulova has submitted her Ph.D. dissertation devoted to hazard rate modeling in heterogeneous populations and about to defend it in June 2006. She has publications in the fields of survival analysis and nonparametric statistics and is interested in the development of statistical methodology and its applications.

Luis A. Escobar

Louisiana State University  
Department of Experimental Statistics  
Baton Rouge, LA, USA  
luis@lsu.edu  
<http://www.stat.lsu.edu/faculty/Escobar>

Chapter C.22

Luis A. Escobar is a professor at Louisiana State University. His research interests include analysis of reliability data and accelerated testing. Luis is an associate editor for LIDA and past associate editor for Technometrics. He is a Fellow of the ASA and elected member of the ISI. Luis was awarded the 1999 Jack Youden Prize.

Chun Fan

Arizona State University  
Computer Science & Engineering  
Department  
Tempe, AZ, USA  
fanchun@asu.edu  
<http://whoknows.eas.asu.edu/~whoknows/>

Chapter C.24

Mr. Chun Fan is a Ph.D. student in the Department of Computer Science and Engineering at Arizona State University. He received his B.E. degree from the University of Science and Technology of China, China. His research areas include software engineering, software architecture, and computer-based simulation.

Kai-Tai Fang

Hong Kong Baptist University  
Department of Mathematics  
Kowloon Tong, Hong Kong  
ktfang@hkbu.edu.hk  
<http://www.math.hkbu.edu.hk/~ktfang>

Chapter B.13

Professor Fang is an elected fellow of the Institute of Mathematical Statistics and of the American Statistical Association. He was chair professor at the Hong Kong Baptist University from 1993 to 2006. His research interest: involve multivariate analysis, experimental design, data mining and statistical inference. He has been associate editor for Statistics & Probability Letters, Statistica Sinica and Journal of Multivariate Analysis. He has published more than 220 research papers and 18 books.

Qianmei Feng

University of Houston  
Department of Industrial Engineering  
Houston, TX, USA  
qfeng@central.uh.edu

Chapter B.11

Dr. Qianmei Feng is an assistant professor in the Department of Industrial Engineering at the University of Houston, TX. Her research interests are quality and reliability engineering, especially inspection strategies, tolerance design and optimization, experimental design, and Six Sigma. She is a member of IIE, INFORMS and Alpha Pi Mu.

**Emilio Ferrari**

Chapter F.48

University of Bologna  
Department of Industrial and Mechanical  
Engineering (D.I.E.M.)  
Bologna, Italy  
[emilio.ferrari@unibo.it](mailto:emilio.ferrari@unibo.it)

Emilio Ferrari is full professor of industrial logistics at the Department of Mechanical Constructions (DIEM) at the University of Bologna, director of the master degree in “integrated logistics” at the Faculty of Engineering in Bologna and of the Summer School “Francesco Turco” on industrial plants. He is author of more than 70 publications, most of them about industrial logistics and industrial plant design and management.

**Sergio Fichera**

Chapter B.17

University of Catania  
Department Industrial and Mechanical  
Engineering  
Catania, Italy  
[sfichera@diim.unict.it](mailto:sfichera@diim.unict.it)

Sergio Fichera is an associate professor of Technology and Manufacturing System at the Dipartimento di Ingegneria Industriale e Meccanica of the University of Catania, Italy. He holds an M.B.A. degree from the Schools of Management at the University of Turin. His research interests are in production scheduling and statistical quality control. He is a member of the AITEM (Italian association for manufacturing).

**Maxim Finkelstein**

Chapter C.20

University of the Free State  
Department of Mathematical Statistics  
Bloemfontein, South Africa  
[finkelm.sci@mail.uovs.ac.za](mailto:finkelm.sci@mail.uovs.ac.za)  
[www.uovs.ac.za/departments/mathstats/finkelsteinms](http://www.uovs.ac.za/departments/mathstats/finkelsteinms)

Professor Maxim Finkelstein is a specialist in reliability theory and other applications of stochastic modeling. He has published about 140 papers and 4 books on various aspects of reliability and survival analysis. His current major interest is in stochastic modeling of heterogeneity for engineering and biological applications. He is a member of editorial boards of a number of reliability oriented journals.

**Mitsuo Gen**

Chapter E.42

Waseda University  
Graduate School of Information,  
Production & Systems  
Kitakyushu, Japan  
[gen@waseda.jp](mailto:gen@waseda.jp)

Mitsuo Gen received his Ph.D. degree from Kogakuin University, Japan, in 1974. He is a professor at the Graduate School of Information, Production and Systems, Waseda University. He was a visiting professor at the University of California, Berkeley in 1999–2000. His research interests include genetic algorithms, neural networks, fuzzy logic, and the applications to network design, scheduling, system reliability design, and the like.

**Amrit L. Goel**

Chapters D.35, F.53

Syracuse University  
Department of Electrical Engineering  
and Computer Science  
Syracuse, NY, USA  
[goel@ecs.syr.edu](mailto:goel@ecs.syr.edu)

Amrit L. Goel is a professor of EECS at Syracuse University. His Ph.D. was in mechanical engineering from the University of Wisconsin, Madison. His academic activities have included quality control and reliability, software engineering, databases, and data mining using radial basis functions (RBF) and support vector machines. He has advised fifteen Ph.D. dissertations on these and related topics. He is a co-author of a book on object-oriented software testing with Dr. Bashir, of the Goel–Okumoto software reliability model and, most recently, of the Shin–Goel algorithm for RBF design. He was elected a fellow of IEEE for contributions to software reliability.

**Thong N. Goh**

Chapter B.16

National University of Singapore  
Industrial and Systems Engineering Dept.  
Singapore, Republic of Singapore  
[isegohtn@nus.edu.sg](mailto:isegohtn@nus.edu.sg)  
<http://www.ise.nus.edu.sg/staff/gohntn>

Professor Thong N. Goh (Ph.D. University of Wisconsin – Madison, USA) is academican of the International Academy for Quality, fellow of the American Society for Quality, and IEEE Engineering Management Society Educator of the Year 2004. Specializing in statistical methodologies for engineering applications, he now serves on the editorial boards of several leading international research journals on quality management and quality engineering.

Raj K. Govindaraju

Massey University  
Institute of Information Sciences  
and Technology  
Palmerston North, New Zealand  
[k.govindaraju@massey.ac.nz](mailto:k.govindaraju@massey.ac.nz)

Chapter B.15

Dr. Govindaraju holds a Ph.D. degree from Madras University and has been engaged in statistics teaching and consulting for the last 20 years. His research interest is in the statistical aspects of quality and data analysis. He is an associate editor of the International Journal for Economic Quality.

Xuming He

University of Illinois at  
Urbana-Champaign  
Department of Statistics  
Champaign, IL, USA  
[x-he@uiuc.edu](mailto:x-he@uiuc.edu)  
<http://www.stat.uiuc.edu/~x-he>

Chapter D.30

Professor He's research focuses on statistical inference for regression models. He is an elected fellow of the Institute of Mathematical Statistics, and currently serves on the editorial boards of The Annals of Statistics and Journal of the American Statistical Association. His research has been supported by the NSF, NSA and NIH.

Chengcheng Hu

Harvard School of Public Health  
Department of Biostatistics  
Boston, MA, USA  
[cchu@hsph.harvard.edu](mailto:cchu@hsph.harvard.edu)  
<http://www.hsph.harvard.edu/faculty/ChengchengHu.html>

Chapter C.21

Dr. Chengcheng Hu is an assistant professor of biostatistics at the Harvard School of Public Health and a senior statistician at the Statistical and Data Analysis Center of the Pediatric AIDS Clinical Trials Group. He earned his Ph.D. in biostatistics from the University of Washington in 2001. His research interests are in the areas of failure time data analysis, measurement error, missing data, longitudinal data analysis, and design of clinical trials.

Feifang Hu

University of Virginia  
Department of Statistics  
Charlottesville, VA, USA  
[fh6e@virginia.edu](mailto:fh6e@virginia.edu)  
<http://www.stat.virginia.edu/hu.html>

Chapter E.37

Dr. Hu is an associate professor of Statistics at the University of Virginia. He has a Ph.D. from the University of British Columbia and has worked at the National University of Singapore and Cornell University. His main research areas are: bootstrap methods; biostatistics; likelihood inference and data mining.

Hai Huang

Intel Corp CH3-20  
Component Automation Systems  
Chandler, AZ, USA  
[hai.huang2@intel.com](mailto:hai.huang2@intel.com)

Chapter C.24

Dr. Hai Huang received his Ph.D. from the Arizona State University, USA. Currently he works in the Component Automation Systems (CAS) Group at Intel Corp. His research areas include software verification and validation, test automation, Web services, service-oriented architecture, and compiler technology.

Jian Huang

University of Iowa  
Department of Statistics and Actuarial  
Science  
Iowa City, IA, USA  
[jian-huang@uiowa.edu](mailto:jian-huang@uiowa.edu)  
<http://www.stat.uiowa.edu/~jian/>

Chapter E.40

Dr. Jian Huang obtained his Ph.D. in statistics from The University of Washington in Seattle. His current research interests include statistical analysis of high-dimensional data with applications to biomedical research, statistical genetics, survival analysis, and semiparametric models.

**Tao Huang**

Chapter D.34

Yale University, School of Medicine  
Department of Epidemiology and Public Health  
New Haven, CT, USA  
[t.huang@yale.edu](mailto:t.huang@yale.edu)

Dr. Tao Huang is a postdoctoral associate in Department of Epidemiology and Public Health at Yale University School of Medicine. He obtained his Ph.D. degree in statistics from the University of North Carolina at Chapel Hill. His current research interests include nonparametric and semiparametric modeling, functional and longitudinal data analysis, model selection and computational biology and statistical genetics.

**Wei Jiang**

Chapters B.10, D.36

Stevens Institute of Technology  
Department of Systems Engineering  
and Engineering Management  
Hoboken, NJ, USA  
[wjiang@stevens.edu](mailto:wjiang@stevens.edu)  
<http://www.stevens.edu/engineering/seem/People/jiang.html>

Dr. Wei Jiang is an assistant professor of systems engineering and engineering management at Stevens Institute of Technology. He obtained his Ph.D. degree in industrial engineering and engineering management from Hong Kong University of Science and Technology in 2000. Prior to joining Stevens, he worked as a statistical consultant at AT&T Labs, Morristown. His current research activities include statistical methods for quality control, data mining and enterprise intelligence.

**Richard Johnson**

Chapter B.18

University of Wisconsin – Madison  
Department of Statistics  
Madison, WI, USA  
[rich@stat.wisc.edu](mailto:rich@stat.wisc.edu)

Richard A. Johnson is a professor of statistics at the University of Wisconsin. His research and consulting interests include reliability and life length analysis, applied multivariate analysis, and applications to engineering. He is a fellow of the American Statistical Association, fellow of the Institute of Mathematical Statistics, and elected member of the International Statistical Institute. He has been editor of *Statistics and Probability Letters* since it began 25 years ago, and is co-author of six books and several book chapters, and over 100 papers in the statistical and engineering literature.

**Kailash C. Kapur**

Chapter B.11

University of Washington  
Industrial Engineering  
Seattle, WA, USA  
[kkapur@u.washington.edu](mailto:kkapur@u.washington.edu)  
<http://faculty.washington.edu/kkapur/>

Dr. Kailash C. Kapur is a professor of industrial engineering at the University of Washington. He received Ph.D. degree (1969) in industrial engineering from the University of California at Berkeley. He received the Allan Chop Technical Advancement Award and the Craig Award from ASQ. He is a Fellow of ASQ and IIE, and a registered professional engineer. In his present position at the University of Washington, Dr. Kapur is responsible for teaching and research in the areas of quality engineering, design reliability, industrial experimental design, system optimization and control, and productivity improvement.

**P. K. Kapur**

Chapter C.25

University of Delhi  
Department of Operational Research  
Delhi, India  
[pkkapur@or.du.ac.in](mailto:pkkapur@or.du.ac.in)

P.K. Kapur is professor and head in the Department of Operational Research, University of Delhi. He obtained his Ph.D. degree from the University of Delhi in 1977. He has published extensively in Indian journals and abroad in the areas of hardware reliability, optimization, queueing theory, and maintenance and software reliability. He is currently the president of the Operational Research Society of India.

**Kyungmee O. Kim**

Chapter A.9

Konkuk University  
Department of Industrial Engineering  
Seoul, S. Korea  
[kyungmee@konkuk.ac.kr](mailto:kyungmee@konkuk.ac.kr)  
<http://mail.konkuk.ac.kr/~kyungmee>

Dr. Kim is an assistant professor of industrial engineering at Konkuk University in Seoul, Korea. She obtained her Ph.D. degree in the Department of Industrial Engineering from Texas A&M in 1999. Her research interests include statistical quality control, burn-in, yield and reliability optimization, fault diagnosis and condition-based maintenance.

**Taeho Kim**

Korea Telecom  
Strategic Planning Office  
Sungnam, Kyonggi-do, S. Korea  
[taehokim@kt.co.kr](mailto:taehokim@kt.co.kr)

**Chapter A.9**

Taeho Kim received his Ph.D. from Texas A&M University in 1998. He is assistant vice-president of Korea Telecom. Since he joined KT in 1986 he has been doing many projects related with service quality, facility reliability, and network performance. His current fields of interest include six sigma for continuous growth and quality innovation in the telecom industry.

**Way Kuo**

University of Tennessee  
Department of Electrical and Computer  
Engineering  
Knoxville, TN, USA  
[way@utk.edu](mailto:way@utk.edu)  
<http://www.ece.utk.edu/bios/Faculty/Kuo.html>

**Chapter A.9**

Dr. Way Kuo is university distinguished professor and dean of engineering at the University of Tennessee. He is an elected member of the US National Academy of Engineering, Academia Sinica, Taiwan, R.O.C., and the International Academy for Quality. He has co-authored five textbooks and currently serves as the editor of IEEE Transactions on Reliability. He is recognized as one of the principal scholars responsible for developing cost-effective methodologies for reducing infant mortality in the fast-evolving microelectronics industry. His contributions to industry include advancing the development of the fundamentals of reliability design as well as introducing new industrial applications of parametric and nonparametric analysis.

**Paul Kvam**

Georgia Institute of Technology  
School of Industrial and Systems  
Engineering  
Atlanta, GA, USA  
[pkvam@isye.gatech.edu](mailto:pkvam@isye.gatech.edu)  
<http://www.isye.gatech.edu/~pkvam/>

**Chapter A.2**

Paul Kvam is an associate professor in the School of Industrial and Systems Engineering (ISyE). He joined ISyE in 1995 after working for four years as scientific staff at the Los Alamos National Laboratory. Dr. Kvam received his B.S. in mathematics from Iowa State University in 1984, an M.S. in statistics from the University of Florida in 1986, and his Ph.D. in statistics from the University of California, Davis in 1991. His research interests focus on statistical reliability with applications to engineering, nonparametric estimation, and analysis of complex and dependent systems. He is a member of the American Statistical Association, Institute of Mathematical Statistics, Institute for Operations Research and Management Science, and IEEE.

**Chin-Diew Lai**

Massey University  
Institute of Information Sciences  
and Technology  
Palmerston North, New Zealand  
[c.lai@massey.ac.nz](mailto:c.lai@massey.ac.nz)  
<http://www-ist.massey.ac.nz/ResearchGroups/DisplayStaff.asp?StaffID=24>

**Chapter A.3**

Chin-Diew Lai received his Ph.D. in statistics from Victoria University of Wellington, New Zealand in 1975. His main research interests are in quality and reliability engineering. He is a co-author of three books and has published over 90 journal articles and book chapters.

**Jae K. Lee**

University of Virginia  
Public Health Sciences  
Charlottesville, VA, USA  
[jaeklee@virginia.edu](mailto:jaeklee@virginia.edu)  
<http://www.healthsystem.virginia.edu/internet/hes/personnel/leejk.cfm>

**Chapter D.32**

Professor Lee received his Ph.D. in statistical genetics from the University of Wisconsin – Madison in 1995. He has worked on statistical research in molecular genetics and bioinformatics, including genetic population inference, DNA structure analysis, linkage association study, and high-throughput gene chip data analysis on various biomedical studies. In particular, he has pioneered the statistical development of small-sample microarray data analysis techniques such as LPE (local pooled error) and HEM (heterogeneous error model) for practical, genomic biomedical investigations.

**Kit-Nam F. Leung**

City University of Hong Kong  
Department of Management Sciences  
Kowloon Tong, Hong Kong  
[mshkleun@cityu.edu.hk](mailto:mshkleun@cityu.edu.hk)

Chapter F.49

Dr. Kit-Nam Francis Leung received a B.Sc. degree in mathematics in 1984 and M.Sc. degree in operational research in 1985, both from London University, and his Ph.D. in 2003 from Curtin University, Australia. Since 1988 he has been a lecturer in the Management Sciences Department at the City University of Hong Kong and has been responsible for teaching management science and Statistics. His research interests are maintenance, reliability and warranty.

**Ruojia Li**

Global Statistical Sciences  
Lilly Corporate Center  
Indianapolis, IN, USA  
[liru@lilly.com](mailto:liru@lilly.com)

Chapter B.18

Dr. Ruojia Li is a research scientist at Eli Lilly and Company. She received her Ph.D. degree in statistics from the University of Wisconsin – Madison in 2004. Her research interests include multivariate quality monitoring schemes and statistical applications in pharmaceutical research.

**Wenjian Li**

Javelin Direct, Inc.  
Marketing Science  
Irving, TX, USA  
[wenjian.li@javelindirect.com](mailto:wenjian.li@javelindirect.com)

Chapter E.45

Dr. Wenjian Li is a marketing research scientist with Javelin Direct, Inc., whose current work focuses on econometrics, forecasting, and survival analysis. Dr. Li earned his Ph.D. from Rutgers University where his primary research interests included reliability, maintenance theory, applied statistics and manufacturing automation.

**Xiaoye Li**

Yale University  
Department of Applied Mathematics  
New Haven, CT, USA  
[xiaoye.li@yale.edu](mailto:xiaoye.li@yale.edu)

Chapter D.34

Xiaoye Li is currently a Ph.D. candidate in the Applied Mathematics Department of Yale University. He is interested in machine learning and statistical learning theory and the application of machine learning techniques to various data mining problems, especially those arising from genomics and proteomics studies. His dissertation takes an initiative step to analyze the popular classification algorithm Random Forest and to improve the random subspace method.

**Yi Li**

Harvard University  
Department of Biostatistics  
Boston, MA, USA  
[yili@jimmy.harvard.edu](mailto:yili@jimmy.harvard.edu)  
<http://www.hsph.harvard.edu/faculty/YiLi.html>

Chapter E.38

Dr. Li is an associate professor of biostatistics at the University of Cincinnati. He obtained his Ph.D. degree in biostatistics from the University of Michigan in 1999. He has been working on survival analysis, longitudinal/spatial data analysis and observational studies. He is the recipient of several prestigious awards, including the David P. Byar Young Investigator Award, John van Ryzin Award and Roger L. Nichols Excellence in Teaching Award. He is a member of the review panel of Mathematical Reviews and is an associate editor of Biometrics.

**Hojung Lim**

Korea Electronics Technology Institute  
(KETI)  
Ubiquitous Computing Research Center  
Seongnam-Si, Gyeonggi-Do, Korea  
[hlim@keti.re.kr](mailto:hlim@keti.re.kr)

Chapter F.53

Hojung Lim received her Ph.D. in computer and information science from Syracuse University, New York. Her research interests are in support vector machines and software modelling. Currently she is involved in ubiquitous sensor networks and radio frequency identification (RFID).

**Haiqun Lin**

Chapter E.41

Yale University School of Medicine  
Department of Epidemiology and Public Health  
New Haven, CT, USA  
[haiqun.lin@yale.edu](mailto:haiqun.lin@yale.edu)  
<http://publichealth.yale.edu/faculty/lin.htm>

Haiqun Lin received her Ph.D. in biometry from Cornell University. She also holds a medical degree from Beijing Medical University, China. Haiqun Lin's current research focuses on latent variable modelling and missing data issues in longitudinal data. In the last a few years, Haiqun Lin has been collaborating with scientific researchers in the fields of cancer research, psychiatry, and geriatric medicine.

**Nan Lin**

Chapter D.30

Washington University in Saint Louis  
Department of Mathematics  
St. Louis, MO, USA  
[nlin@math.wustl.edu](mailto:nlin@math.wustl.edu)  
<http://www.math.wustl.edu/~nlin>

Dr. Lin received his Ph.D. degree in statistics from the University of Illinois at Urbana-Champaign in 2003. He is an assistant professor in the Department of Mathematics, Washington University in Saint Louis. His research interest includes robust statistics, Bayesian modeling, and applications of statistical methodologies in bioinformatics studies such as protein-protein interaction prediction and topological structure inference in yeast.

**Wei-Yin Loh**

Chapter D.29

University of Wisconsin – Madison  
Department of Statistics  
Madison, WI, USA  
[loh@stat.wisc.edu](mailto:loh@stat.wisc.edu)  
<http://www.stat.wisc.edu/~loh>

Wei-Yin Loh has a Ph.D. from Berkeley. He is a fellow of the American Statistical Association and the Institute of Mathematical Statistics. He invented the GUIDE regression tree algorithm and co-authored the CRUISE, LOTUS, and QUEST algorithms. He currently serves on the editorial boards of the ACM Transactions on Knowledge Discovery from Data and the Journal of Machine Learning Research.

**Jye-Chyi Lu**

Chapter A.2

The School of Industrial and Systems Engineering  
Georgia Institute of Technology  
Atlanta, GA, USA  
[jclu@isye.gatech.edu](mailto:jclu@isye.gatech.edu)  
<http://www.isye.gatech.edu/~JCLU>;  
<http://www.isye.gatech.edu/faculty-staff/profile.php?entry=j1234>

Jye-Chyi (JC) Lu is a professor in the School of Industrial and Systems Engineering (ISYE). He received a Ph.D. in statistics from University of Wisconsin at Madison in 1988, and joined the faculty of North Carolina State University (NCSU) where he remained until 1999 when he joined ISYE. Dr. Jye-Chyi Lu's research areas cover industrial statistics, signal processing, semiconductor and electronic manufacturing, data mining, bioinformatics, supply-chain management, logistics planning and nanotechnology. He has about 58 disciplinary and interdisciplinary publications, which have appeared in both engineering and statistics journals. Currently, he is an associate editor for Technometrics, IEEE Transactions on Reliability and Journal of Quality Technology.

**William Q. Meeker, Jr.**

Chapter C.22

Iowa State University  
Department of Statistics  
Ames, IA, USA  
[wqmeeker@iastate.edu](mailto:wqmeeker@iastate.edu)  
<http://www.public.iastate.edu/~wqmeeker>

Dr. Meeker is distinguished professor of statistics at Iowa State University. He is a fellow of the American Statistical Association and a past editor of Technometrics. He is co-author of the books *Statistical Methods for Reliability Data*, and *Statistical Intervals*, and of numerous publications in the engineering and statistical literature. He has consulted extensively on problems in reliability and accelerated testing.

**Mirjam Moerbeek**

Chapter E.39

Utrecht University  
Department of Methodology and Statistics  
Utrecht, Netherlands  
[m.moerbeek@fss.uu.nl](mailto:m.moerbeek@fss.uu.nl)  
<http://www.fss.uu.nl/ms/moerbeek>

Dr. Mirjam Moerbeek studied biometrics at Wageningen Agricultural University, the Netherlands. She obtained her Ph.D. from Maastricht University, the Netherlands. She is currently employed at Utrecht University, the Netherlands. In 2003 she received a prestigious research grant from the Dutch government for young researchers. Her research topic is on the design and analysis of experiments with nested data.

**Terrence E. Murphy**

Yale University School of Medicine  
Department of Internal Medicine  
New Haven, CT, USA  
[terrence.murphy@yale.edu](mailto:terrence.murphy@yale.edu)

Chapter B.10

Terrence E. Murphy earned his Ph.D. in industrial and systems engineering from the Georgia Institute of Technology in 2004. Prior to his graduate work in engineering statistics, he worked for the Eastman Kodak and Johnson & Johnson companies in the manufacture and development of clinical instrumentation. His interests include multivariate statistics, experimental design and medical decision making.

**D.N. Pra Murthy**

The University of Queensland  
Division of Mechanical Engineering  
Brisbane, QLD, Australia  
[p.murthy@uq.edu.au](mailto:p.murthy@uq.edu.au)

Chapters A.3, A.5

Pra Murthy obtained his Ph.D. degree from Harvard University. He has authored or co-authored 5 books, 20 book chapters and 150 journal papers and co-edited 2 books. His current areas of research deal with various topics in product reliability and product warranty. He has held visiting appointments at several universities in the USA, Europe and Asia and is on the editorial boards of nine international journals.

**H. N. Nagaraja**

Ohio State University  
Department of Statistics  
Columbus, OH, USA  
[hnn@stat.ohio-state.edu](mailto:hnn@stat.ohio-state.edu)  
<http://www.stat.ohio-state.edu/~hnn>

Chapter A.4

H.N. Nagaraja, Ph.D., is a professor in the Departments of Statistics and Internal Medicine and serves as a General Clinical Research Centre Biostatistician at Ohio State University. He is interested in order and record statistics, general distribution theory, stochastic modelling, and biostatistical applications. He is a fellow of the American Statistical Association, and an elected member of the International Statistical Institute.

**Toshio Nakagawa**

Aichi Institute of Technology  
Department of Marketing and  
Information Systems  
Toyota, Japan  
[toshi-nakagawa@aitech.ac.jp](mailto:toshi-nakagawa@aitech.ac.jp)  
<http://www.aitech.ac.jp/>

Chapter E.46

Toshio Nakagawa received his Ph.D. from Kyoto University in 1977. He is now a professor of marketing and information systems at Aichi Institute of Technology in Toyota. His research interests are optimization problems, and computer and information systems in reliability and maintenance theory.

**Joseph Naus**

Rutgers University  
Department of Statistics  
Piscataway, NJ, USA  
[naus@stat.rutgers.edu](mailto:naus@stat.rutgers.edu)  
<http://www.stat.rutgers.edu/people/faculty/naus.html>

Chapter E.43

Joseph Naus is a professor of statistics at Rutgers University. He received his Ph.D. in statistics from Harvard University. He was elected a Fellow of The American Statistical Association based on his research into scan statistics, a continuing research area for more than 40 years.

**Harriet B. Nembhard**

Pennsylvania State University  
Harold and Inge Marcus Department of  
Industrial and Manufacturing Engineering  
University Park, PA, USA  
[hbn2@psu.edu](mailto:hbn2@psu.edu)  
<http://www.ie.psu.edu/People/IEFaculty/facultypage.cfm?FacID=18>

Chapter B.14

Dr. Nembhard's research mission is to investigate the design and implementation of concepts and methods of quality, economics, productivity, and improvement for manufacturing systems. She is also an ASQ certified Six Sigma Black Belt and has served as an expert consultant for several major companies. She is on the editorial boards of Quality Engineering and Quality and Reliability Engineering International.

**Douglas Noe**

Chapter [D.30](#)

University of Illinois  
at Urbana-Champaign  
Department of Statistics  
Champaign, IL, USA  
[dnoe@uiuc.edu](mailto:dnoe@uiuc.edu)

Douglas Noe is a Ph.D. candidate in the Department of Statistics at the University of Illinois at Urbana-Champaign. He earned an M.S. from this department in 2003 and received his M.A. in economics from the University of Michigan in 2000. His research explores statistical aspects of data mining.

**Arrigo Pareschi**

Chapter [F.48](#)

University of Bologna  
Department of Industrial and Mechanical  
Engineering (D.I.E.M.)  
Bologna, Italy  
[arrigo.pareschi@unibo.it](mailto:arrigo.pareschi@unibo.it)

Arrigo Pareschi is full professor of industrial logistics at the Department of Mechanical Constructions (DIEM) of the University of Bologna. He has been dean of Faculty of Engineering of Bologna from 1955 to 2001 and president of the Commission for Scientific Research and of the “Spin-Off” Committee of the University of Bologna. He is author of over 90 scientific papers (both experimental and theoretical) on industrial mechanical plants.

**Francis Pascual**

Chapter [C.22](#)

Washington State University  
Department of Mathematics  
Pullman, WA, USA  
[jpascual@math.wsu.edu](mailto:jpascual@math.wsu.edu)

Dr. Francis Pascual received his Ph.D. in statistics from Iowa State University. He has a joint appointment in the Department of Statistics and the Department of Mathematics at Washington State University. His research interests include statistical analysis of reliability data, accelerated life test planning, statistical process control, and analysis of spatial correlations.

**Raymond A. Paul**

Chapter [C.24](#)

C2 Policy  
U.S. Department of Defense (DoD)  
Washington, DC, USA  
[raymond.paul@osd.mil](mailto:raymond.paul@osd.mil)

Ray Paul has been a professional electronics engineer, software architect, developer, tester and evaluator for the past 24 years, holding numerous positions in the field of software engineering. Currently, he serves as the deputy for C2 Metrics and Performance Measures for Software for the Department of Defense (DoD) Chief Information Officer (CIO). In this position, he supervises development of objective, quantitative data on the status of software resources in DoD information technology (IT) to support major investment decisions. These metric data are required to meet various congressional mandates, most notably the Clinger-Cohen Act. He holds a doctorate in software engineering and is an active member of the IEEE Computer Society. He has published more than 50 articles on software engineering in various technical journals and symposia proceedings, primarily under IEEE sponsorship.

**Alessandro Persona**

Chapter [F.48](#)

University of Padua  
Department of Industrial and Technology  
Management  
Vicenza, Italy  
[alessandro.persona@unipd.it](mailto:alessandro.persona@unipd.it)

Alessandro Persona is a full professor of industrial plants and logistics in the Department of Management and Technology at Padua University. The scientific activity has been carried out in many areas of research in industrial plants, logistic and maintenance topics. He is author of more than 90 publications. In 2005 he received the award for the best paper printed in the Int. Journal of Manufacturing Technology Management. He is member of the editorial board of the International Journal on Operational Research. Currently he manages the Ph.D. on Mechatronics and Industrial Systems and he is the president of mechanical engineering degree at Padua University.

**Daniel Peña**

Universidad Carlos III de Madrid  
Departamento de Estadística  
Getafe (Madrid), Spain  
[daniel.pena@uc3m.es](mailto:daniel.pena@uc3m.es)  
[http://halweb.uc3m.es/daniel\\_pena](http://halweb.uc3m.es/daniel_pena)

Chapter D.28

Daniel Peña is professor of statistics at the Universidad Carlos III of Madrid. He was full professor of statistics at Universidad Politécnica de Madrid and visiting full professor at the Universities of Wisconsin – Madison and Chicago. He has published 13 books and more than 150 research papers on time series, linear models, robust and diagnostic methods, bayesian statistics, econometrics, multivariate analysis and quality methods. He is a member of ISI and IMS fellow.

**Hoang Pham**

Rutgers University  
Department of Industrial and Systems  
Engineering  
Piscataway, NJ, USA  
[hopham@rci.rutgers.edu](mailto:hopham@rci.rutgers.edu)

Chapters A.1, A.7, C.27, E.45

Dr. Hoang Pham is professor in the Department of Industrial and Systems Engineering at Rutgers University. Before joining Rutgers, he was a senior engineering specialist at the Boeing Company, Seattle, and the Idaho National Engineering Laboratory, Idaho Falls. His research interests include software reliability, system reliability modeling, maintenance, fault-tolerant computing, and biological systemability-risk assessment. He is the author/editor of more than 15 books and is currently the editor of the Springer Series in Reliability Engineering. He has published more than 90 journal articles and 30 book chapters. Dr. Hoang Pham is a fellow of the IEEE.

**John Quigley**

University of Strathclyde  
Department of Management Science  
Glasgow, Scotland  
[j.quigley@strath.ac.uk](mailto:j.quigley@strath.ac.uk)  
<http://www.managementscience.org/staff/john.asp>

Chapter A.6

Dr. John Quigley earned a BMath in actuarial science from the University of Waterloo, Canada and a Ph.D. from the Department of Management Science, University of Strathclyde, Scotland. His research interests include applied probability modelling, statistical inference and reliability growth modelling. He is a member of the Safety and Reliability Society, a chartered statistician and an associate of the Society of Actuaries.

**Alberto Regattieri**

Bologna University  
Department of Industrial and Mechanical  
Engineering  
Bologna, Italy  
[alberto.regattieri@mail.ing.unibo.it](mailto:alberto.regattieri@mail.ing.unibo.it)

Chapter F.48

Alberto Regattieri is a professor in the Department of Industrial and Mechanical Engineering at the University of Bologna. He received his Ph.D. degree from Parma University in 1999. His current research interests include the optimal design of manufacturing systems, production planning and control, and the maintenance of industrial plants. In 2005 he received the Williamson Award [Emerald Literati Club (UK)] for his studies. He has authored or co-authored several books and over 50 technical publications.

**Miyoung Shin**

Kyungpook National University  
School of Electrical Engineering  
and Computer Science  
Daegu, Republic of Korea  
[shinmy@knu.ac.kr](mailto:shinmy@knu.ac.kr)

Chapter D.35

Dr. Miyoung Shin is an assistant professor in the School of Electrical Engineering and Computer Science at Kyungpook National University. She earned her Ph. D. degree in computer and information science from Syracuse University in 1998 and was awarded the All-University Doctoral Prize for her outstanding Ph.D. thesis. Prior to joining to Kyungpook National University in 2005, she had worked as a senior member of research staff in the Electronics and Communications Research Institute. Her current research interests include data mining algorithms, bioinformatics and context-awareness computing.

**Karl Sigman**

Columbia University in the City of New York,  
School of Engineering and Applied Science  
Center for Applied Probability (CAP)  
New York, NY, USA  
[karl.sigman@columbia.edu](mailto:karl.sigman@columbia.edu)  
<http://www.columbia.edu/~ks20>

## Chapter A.8

Professor Sigman's areas of research include stochastic modeling, stochastic networks and queueing theory, point process theory, and insurance risk. He was a recipient of the Presidential Young Investigator Award from the National Science Foundation, and continues to be co-director of Columbia's Center for Applied Probability.

**Loon C. Tang**

National University of Singapore  
Department of Industrial and Systems Engineering  
Singapore, Singapore  
[isetlc@nus.edu.sg](mailto:isetlc@nus.edu.sg)  
<http://www.ise.nus.edu.sg/staff/tanglc/index.html>

## Chapter C.23

Dr. Loon Ching Tang, a faculty member of National University of Singapore, obtained a Ph.D. degree in 1992 from Cornell University in the field of operations research. He has published more than 50 papers in international journals in the field of quality, reliability and operations research. In particular, his research interest lies in the application of probability, statistics and optimization techniques in solving real world problems. He is currently the area editor of the International Journal of Performability Engineering.

**Charles S. Tapiero**

Polytechnic University  
Technology Management and Financial Engineering  
Brooklyn, NY, USA  
[ctapiero@poly.edu](mailto:ctapiero@poly.edu)

## Chapter F.47

Charles S. Tapiero is the Topfer Chair Professor of Financial Engineering and Technology Management at the Polytechnic University of New York. He has a worldwide reputation as an active researcher and consultant in risk and computational finance and risk management. He is currently the area editor for finance in the Journal of Applied Stochastic Models for Business and Industry as well as a member of the editorial board of several other journals. Professor Tapiero has published 12 books and over 250 papers on a broad range of issues spanning risk management, stochastic modeling and applied stochastic control in operations, insurance and finance.

**Zahir Tari**

Royal Melbourne Institute of Technology  
University  
School of Computer Science and Information Technology  
Melbourne, Victoria, Australia  
[zahirt@cs.rmit.edu.au](mailto:zahirt@cs.rmit.edu.au)  
<http://www.cs.rmit.edu.au/~zahirt>

## Chapter F.52

Dr. Zahir Tari is a full professor at RMIT University and the director of Distributed Systems and Networking at the School of Computer Science and Information Technology. He has extensively published in the area of middlewares and Web services, especially in the area of performance (caching and load balancing), security (i.e. access control and information flow control) and service discovery.

**Xiaolin Teng**

Time Warner Inc.  
Research Department  
New York, NY, USA  
[xiaolin\\_teng@timeinc.com](mailto:xiaolin_teng@timeinc.com)

## Chapter C.27

Xiaolin Teng received his Ph.D. in industrial engineering from Rutgers University in 2001. He also holds master degrees in statistics, computer science, and automation. He is a member of ASA, INFORMS, IEEE and IIE. Currently Dr. Teng works at Time Warner Inc. as a research manager. His research interests include reliability, quality control, inventory optimization and data mining.

**Wei-Tek Tsai**

Chapter C.24

Arizona State University  
Computer Science & Engineering  
Department  
Tempe, AZ, USA  
[wtsai@asu.edu](mailto:wtsai@asu.edu)  
<http://cse.asu.edu/directory/faculty/tsai.php>

Professor Tsai received his Ph.D. from University of California at Berkeley 1985 and is professor of Computer Science and Science at Arizona State University. His research areas include service-oriented computing, software engineering, dependable computing, software engineering, software testing, and embedded systems. He has coauthored more than 300 research papers in these areas.

**Kwok-Leung Tsui**

Chapters B.10, D.36

Georgia Institute of Technology  
School of Industrial and Systems  
Engineering  
Atlanta, GA, USA  
[ktsui@isye.gatech.edu](mailto:ktsui@isye.gatech.edu)  
<http://www.isye.gatech.edu/~ktsui>

Kwok-Leung Tsui is professor at Georgia Institute of Technology. He has a Ph.D. in statistics from the University of Wisconsin. Dr. Tsui is a (elected) fellow of American Statistical Association and was a recipient of the NSF Young Investigator Award. He is currently the departmental editor of the IIE Transactions.

**Fugee Tsung**

Chapter F.50

Hong Kong University of Science  
and Technology  
Department of Industrial Engineering  
and Logistics Management  
Kowloon, Hong Kong  
[season@ust.hk](mailto:season@ust.hk)

Dr. Fugee Tsung is an associate professor in the Department of Industrial Engineering and Logistics Management at the Hong Kong University of Science and Technology. He received both his M.S. and Ph.D. in industrial and operations engineering from the University of Michigan, Ann Arbor. He is an associate editor of Technometrics, a department editor of the IIE Transactions, and on the editorial boards for the International Journal of Reliability, Quality and Safety Engineering (IJRQSE) and the International Journal of Six Sigma and Competitive Advantage (IJSSCA). He is an ASQ Certified Six Sigma Black Belt, ASQ authorized Six Sigma Master Black Belt Trainer, and former chair of the Quality, Statistics, and Reliability (QSR) Section at INFORMS. He is also the winner of the Best Paper Award for the IIE Transactions focus issue on Quality and Reliability in 2003. His research interests include quality engineering and management, statistical process control, monitoring and diagnosis.

**Lesley Walls**

Chapter A.6

University of Strathclyde  
Department of Management Science  
Glasgow, Scotland  
[lesley.walls@strath.ac.uk](mailto:lesley.walls@strath.ac.uk)  
<http://www.managementscience.org/staff/lesley.asp>

Lesley Walls has a Ph.D. (applied statistics). She is an IEC/TC56/WG2 expert and editorial board member of several reliability journals. Her research includes reliability modelling, business processes and risk assessment. She is a fellow of the UK Safety and Reliability Society, chartered statistician and was awarded the 2002 Simms prize by the Royal Aeronautical Society for REMM modelling research.

**Wei Wang**

Chapter C.21

Dana-Farber Cancer Institute  
Department of Biostatistics  
and Computational Biology  
Boston, MA, USA  
[wwang@jimmy.harvard.edu](mailto:wwang@jimmy.harvard.edu)

Dr. Wang is assistant professor of biostatistics at Harvard School of Public Health and Dana-Farber Cancer Institute. She obtained her Ph.D. degree in statistics from the University of California at Davis. Dr. Wang's current research interests are mainly in developing semi-parametric and non-parametric methods in areas of survival analysis, longitudinal data analysis and functional data analysis. Dr. Wang also works at the statistical center of the Eastern Cooperative Oncology Group (ECOG) on collaborative research in cancer clinical trials.

**Kenneth Williams**

Chapter D.34

Yale University  
Molecular Biophysics and Biochemistry  
New Haven, CT, USA  
[kenneth.williams@yale.edu](mailto:kenneth.williams@yale.edu)  
<http://info.med.yale.edu/wmkeck/>

Dr. Williams received the Ph.D. degree in biochemistry from the University of Vermont in 1976. In 1980 he founded the Keck Laboratory (<http://info.med.yale.edu/wmkeck/>) and in 1986 he was one of the six founding members of the Association of Biomolecular ResourceFacilities (<http://www.abrf.org/>). He has 155 publications and directs the Yale/NHLBI Proteomics Center, NIDA Neuroproteomics Center, and the Proteomics Core of the Northeast Biodefense Center.

**Richard J. Wilson**

Chapter A.5

The University of Queensland  
Department of Mathematics  
Brisbane, Australia  
[rjw@maths.uq.edu.au](mailto:rjw@maths.uq.edu.au)  
<http://www.maths.uq.edu.au/~rjw>

Dr. Wilson is a senior lecturer in statistics at The University of Queensland. His main research interests are in random processes, extremes and reliability, from both theoretical and applied statistics perspectives. Accordingly, he has worked on such diverse topics as modelling mineral phases in ores at the micro level, investigating warranty policies in manufacturing, exploring the relationship between the location of nerves to wisdom teeth and various factors, modelling wind downbursts, fitting models to significant wave height data and investigating aspects of the combustion of metal rods.

**Baolin Wu**

Chapter D.34

University of Minnesota, School of  
Public Health  
Division of Biostatistics  
Minneapolis, MN, USA  
[baolin@biostat.umn.edu](mailto:baolin@biostat.umn.edu)  
<http://www.biostat.umn.edu/~baolin>

Baolin Wu received the B.Sc. degree in probability and statistics from Beijing University in 1999 and the Ph.D. degree in biostatistics from Yale University in 2004. In 2004 he joined the Division of Biostatistics at the University of Minnesota as an assistant professor. His current research areas focus on computational biology and statistical learning.

**Min Xie**

Chapters A.3, B.16

National University of Singapore  
Dept. of Industrial & Systems Engineering  
Singapore, Singapore  
[mxie@nus.edu.sg](mailto:mxie@nus.edu.sg)  
<http://www.ise.nus.edu.sg/staff/xiemin/>

Dr. Min Xie is a professor at National University of Singapore. He received his Ph.D. from Linköping University, Sweden in 1987 and has published over 100 articles in refereed journals and six books. He is an editor of International Journal of Reliability, Quality and Safety Engineering, a regional editor of Economic Quality Control, a department editor of IIE Transactions and associate editor IEEE Trans on Reliability. He is a fellow of IEEE.

**Chengjie Xiong**

Chapter C.19

Washington University in St. Louis  
Division of Biostatistics  
St. Louis, MO, USA  
[chengjie@wubios.wustl.edu](mailto:chengjie@wubios.wustl.edu)  
[http://www.biostat.wustl.edu/faculty\\_staff/xiongcs.shtml](http://www.biostat.wustl.edu/faculty_staff/xiongcs.shtml)

Dr. Chengjie Xiong is a research assistant professor of biostatistics at Washington University School of Medicine. He received a B.S. in Mathematics from Xiangtan University (P.R. China), an M.S. in Applied Mathematics from Peking University (P. R. China), and a Ph.D. in statistics from Kansas State University in 1997. Dr. Xiong's research interests include statistical design of experiments, linear and nonlinear mixed models, longitudinal data analysis, survival analysis and reliability, categorical data analysis, order restricted statistical inferences, and their applications in medicine, biology, education, and engineering. Dr. Xiong has provided statistical consulting for researchers across the US in the areas of biology, medicine, agriculture, marketing and education and is the principal investigator of a NIH-funded project to study the statistical application in medical research. He is a member of the American Statistical Society.

**Di Xu**

American Express  
Dept. of Risk Management and Decision  
Science  
New York, NY, USA  
[di.w.xu@aexp.com](mailto:di.w.xu@aexp.com)

## Chapter B.12

Di Xu is a director in risk management and decision science in the consumer card services group at American Express. His research interests are multivariate statistical modelling, data mining, mathematical optimization, and their application in process control, product design, risk management and direct marketing acquisition. He graduated from Rutgers University with a Ph.D. in Industrial Engineering in 2001.

**Shigeru Yamada**

Tottori University  
Department of Social Systems  
Engineering  
Tottori-shi, Japan  
[yamada@sse.tottori-u.ac.jp](mailto:yamada@sse.tottori-u.ac.jp)  
[http://www.sse.tottori-u.ac.jp/jouhou\\_source/hpsubmit/index.html](http://www.sse.tottori-u.ac.jp/jouhou_source/hpsubmit/index.html)

## Chapter C.26

Dr. Yamada has been working as a professor in the Department of Social Systems Engineering at Tottori University, Japan, since 1993. He received his Ph.D. degree from Hiroshima University, Japan, in 1985. He has published numerous technical papers and books in the area of software reliability engineering, reliability engineering, and statistical quality. Dr. Yamada received the Best Author Award (1992) from the Information Processing Society of Japan, the TELECOM System Technology Award (1993) from the Telecommunications Advancement Foundation, the Best Paper Award (1999) from the Reliability Engineering Association of Japan, and the International Leadership Award in Reliability Engineering Research (2003) from the ICQRIT/SREQOM.

**Jun Yan**

University of Iowa  
Department of Statistics  
and Actuarial Science  
Iowa City, IA, USA  
[jyan@stat.uiowa.edu](mailto:jyan@stat.uiowa.edu)  
<http://www.stat.uiowa.edu/~jyan/>

## Chapter F.51

Dr. Jun Yan earned a Ph.D. in statistics from the University of Wisconsin – Madison in 2003. His research interests are functional data analysis, survival analysis, spatial statistics, statistical computing, and cross-disciplinary statistical applications.

**Shang-Kuo Yang**

Department of Mechanical Engineering  
National Chin Yi Institute of Technology  
Taiping City, Taiwan, R.O.C.  
[skyang@ncit.edu.tw](mailto:skyang@ncit.edu.tw)  
<http://irw.ncit.edu.tw/mechanical/skyang/skyang.htm>

## Chapter E.44

Professor Yang received his B.S. in 1982 and the M.S. in 1985 in automatic control engineering from Feng Chia University, Taiwan. From 1985 to 1991 he was an assistant researcher and instrumentation system engineer of Flight Test Group, Aeronautic Research Laboratory, Chung Shan Institute of Science and Technology, Taiwan. Since 1991, he has been with the Department of Mechanical Engineering at National Chin Yi Institute of Technology, Taiwan, where he is a full professor and the chairperson. He received a Ph.D. in 1999 in mechanical engineering from National Chiao Tung University, Taiwan. His research interests are in reliability, data acquisition, and automatic control.

**Kai Yu**

Washington University in St. Louis, School  
of Medicine  
Division of Biostatistics  
St. Louis, MO, USA  
[yuka@mail.nih.gov](mailto:yuka@mail.nih.gov)

## Chapter C.19

Dr. Yu is a research assistant professor at the Division of Biostatistics at Washington University, St. Louis. He obtained his Ph.D. in biostatistics from University of Pittsburgh in 2000. He completed a one-year postdoctoral training in statistical genetics in 2001 at Stanford University. His current research interests include biostatistics and genetic epidemiology.

## Weichuan Yu

Chapter D.34

Yale Center for Statistical Genomics  
and Proteomics, Yale University  
Department of Molecular Biophysics  
and Biochemistry  
New Haven, CT, USA  
[weichuan.yu@yale.edu](mailto:weichuan.yu@yale.edu)  
<http://noodle.med.yale.edu/~weichuan>

Weichuan Yu received his Ph.D. degree in computer vision and image analysis from the University of Kiel, Germany in 2001. He was a postdoctoral associate at Yale University from 2001 to 2004. Currently he is a research faculty member in the Center for Statistical Genomics and Proteomics at Yale University. He is interested in computational analysis problems with biological and medical applications.

## Panlop Zeephongsekul

Chapter F.52

Royal Melbourne Institute of Technology  
University  
School of Mathematical and Geospatial  
Sciences  
Melbourne, Victoria, Australia  
[panlopz@rmit.edu.au](mailto:panlopz@rmit.edu.au)

Dr. Zeephongsekul received his B.Sc. degree with honors from Melbourne University and a Ph.D. degree in statistics from the University of Western Australia. He is currently an associate professor in the School of Mathematical and Geospatial Sciences at RMIT University, Melbourne, Australia. His research interests are broad, being in stochastic point processes, fuzzy sets, game theory, queuing theory and software reliability analysis. He has published in all those areas and his papers have appeared in many well-known international journals. He is also involved in many consulting projects with diverse clients, especially in applied statistics and the design and analysis of experiments.

## Cun-Hui Zhang

Chapter E.40

Rutgers University  
Department of Statistics  
Piscataway, NJ, USA  
[czhang@stat.rutgers.edu](mailto:czhang@stat.rutgers.edu)  
<http://www.stat.rutgers.edu/people/faculty/zhang.html>

Cun-Hui Zhang received his Ph.D. in statistics from Columbia University in 1984. He is currently a professor in the Department of Statistics at Rutgers University. His research interests include empirical Bayes, nonparametric and semiparametric methods, functional MRI, biased and incomplete data, networks, multivariate data, biometrics, and probability theory.

## Heping Zhang

Chapter D.33

Yale University School of Medicine  
Department of Epidemiology  
and Public Health  
New Haven, CT, USA  
[heping.zhang@yale.edu](mailto:heping.zhang@yale.edu)  
<http://peace.med.yale.edu>

Heping Zhang is professor of biostatistics, child study, and statistics. He is interested in development of statistical methods and software and their applications in biomedical studies, particularly in behavioural science, epidemiology, genetics, psychiatry, and pregnancy outcomes. He publishes extensively on tree- and spline-based methods as well as latent variable models for genetic studies of ordinal traits. He is a fellow of the American Statistical Association.

## Hongyu Zhao

Chapter D.34

Yale University School of Medicine  
Department of Epidemiology  
and Public Health  
New Haven, CT, USA  
[hongyu.zhao@yale.edu](mailto:hongyu.zhao@yale.edu)  
<http://publichealth.yale.edu/faculty/zhao.html>

Hongyu Zhao received a Ph.D. degree from the University of California at Berkeley in 1995. He is the Ira V. Hiscock Associate Professor at Yale University. He is interested in addressing statistical and computational problems in molecular biology and genetics. He has published more than 120 articles and is an associate editor for multiple journals including Biometrics and Statistica Sinica.

## Kejun Zhu

Chapter C.19

China University of Geosciences  
School of Management  
Wuhan, Peoples Republic of China  
[zhubingl@publ.wh.hb.cn](mailto:zhubingl@publ.wh.hb.cn)

Dr. Zhu's main area of research is soft computing where he has been working in the fields of system engineering and information systems. He is an associate editor of the Forecasting Journal. His current research activities include fuzzy systems, neural networks and genetic algorithms. He has presided over two programs of the National Natural Science Foundation of China.
