

Structure Data of Free Polyatomic Molecules

179	F₂Fe	Iron difluoride	D_{∞h}
ED		Iron(II) fluoride	FeF ₂
	$r_e^a)$	$\text{\AA}^b)$	
	Fe–F	1.755(6)	

The ED intensity curves were taken from [1].

^{a)} Anharmonic correction (via diagonal cubic force constants) was determined by fitting to the experimental intensity curves. Nonlinear kinematic effect was also taken into account.

^{b)} 2.5 times the estimated standard error including a systematic error.
